

Nebraska
TO VALUE THE STOCK YARDS
 Railway Commission Expert to Begin Work Today.
WETTLING IS TO HAVE PART
 He Will Be Assisted by Rate Expert Powell in Securing Information to Assist House of Representatives.

Wetling, valuation expert of the railway commission, will begin an investigation of the South Omaha stock yards tomorrow.

The idea of the commission is to gather figures and information which may be used by the house of representatives in connection with rates which affect the South Omaha industries. Mr. Wetling will be assisted by Rate Clerk Powell in the work.

Edgerton in Demand.
 Deputy Assistant Attorney General Frank E. Edgerton has made such a reputation as a statesman and representative of the people in their fight against the corporations that there has been a general demand upon him by the citizens of Lincoln to run for one of the positions upon the charter commission of fifteen which will be elected at the spring election.

Notes from Nebraska
City and Otoe County

NEBRASKA CITY, March 20.—(Special.)—Mr. Potter, president of the Nebraska City Gas company, was here and effected a settlement with Mayor Houston, who two years ago brought suit against the city to annul the newly granted charter of the Nebraska City Water and Light company on the grounds illegal means were used at the election to secure the new charter. He claimed he had entered into a contract with the bondholders of the water and light company to take their plant over and consolidate it with the gas plant. He secured a written contract with Mayor Houston to dissolve the suit provided he agreed to lower all rates pertaining to water, electric lights and gas from 10 to 35 per cent. The contract is conditioned on his securing control of the water and light company and consolidating the same.

The body of the infant child found a mile below this city yesterday by itonr's James, a fisherman, where it had been washed up and left by the river, was taken in charge by the coroner and sheriff. The child was fully developed and evidently had been in the water several days and traveled some distance in the floating ice, and when the water fell it was left on a sandbar where an eddy had formed. The skull was crushed and looked as if done with some blunt instrument having been hit against the side of some high wall. The matter will be fully investigated, but the officers are inclined to the belief that the body came from some party in the city.

The 6-year-old daughter of Dr. E. M. Whitten, who was dangerously ill with appendicitis, but underwent a surgical operation at the hospital, is better and may live, but for two days no hopes were entertained for her recovery.

The case of the town against Ingram & Tebo, charged with selling intoxicants on Sunday, was tried to a jury in the police court yesterday and the jury after being out two hours returned a verdict in favor of the defendants. This is the first case of this kind in this city for over two years.

The Otoe county boys' and girls' short course in farming and domestic science is being held at Syracuse this week, and there are 128 boys and girls in attendance. Specialists in domestic science and farming are present from the University of Nebraska, giving instructions. This is the first attempt to hold anything of this kind in this county, and next year it is expected that a large number of students will be present.

MADISON CHURCH WILL COST HUNDRED THOUSAND

MADISON, Neb., March 20.—(Special.)—A large portion of the material for the new Catholic church is on the ground and active construction will begin the week following Easter. The church has procured the Armory hall for services during the period of construction of the new church. It will be one of the finest edifices in Nebraska, costing approximately \$100,000. Much credit is due Rev. Father Muenich, pastor, for his untiring devotion to this work which involves many varied and trying responsibilities. The citizens of Madison, regardless of creed, appreciate Father Muenich's great undertaking and have utmost confidence in his ability to carry it through to its final consummation.

Judge McDuffee pronounced the words today which made Julius Cheney of Wahoo and Miss Jessie Beaver husband and wife. The bride's parents reside a few miles south of Madison.

John Kessler is circulating a petition among the freeholders for the purpose of presenting the proposition to Sunday base ball to the citizens of Madison at the general municipal election this spring. The petition was quite generally signed by the business men, which seems to indicate that the sentiment favors Sunday base ball.

MUNICIPAL OWNERSHIP BILL PASSES HOUSE

LINCOLN, Neb., March 20.—The Lincoln municipal ownership bill this morning passed the state house of representatives. The bill empowers the city of Lincoln to purchase or construct all public utilities. Later the house committee on cities and towns voted to favorably report the Omaha bill for a similar purpose.

Child Wife Asks Divorce.
 NEBRASKA CITY, Neb., March 20.—(Special.)—Last December Nadia Bond, a 16-year-old daughter of Mrs. Calvin Chapman, eloped with Paul Heimer, 22, and they went to Kansas City, where they were married. Today she filed a suit in the district court in this city, praying for a divorce on the grounds of cruelty and not being able to contract marriage at the time she did. The girl is back home with her mother.

Nebraska
More Suits Filed in Fight for the Enyart Estate

NEBRASKA CITY, March 20.—(Special.)—There is something doing in the courts all of the time in the matter of the estate of the late Captain L. Enyart. A will was left by the deceased giving to his brother, Abner L. Enyart, all of his interest in all holdings which they held in this state, Colorado, Kansas, Missouri and Texas, either personal or realty. Abner was appointed temporary executor under the will and the widow of the deceased brother filed a protest. He tried to resign and have his son appointed in his stead.

The widow objected again and he was reinstated and now she has filed another objection to his appointment and asks that Frank H. Marnell, a disinterested party, be named under the law, as she has elected to take her share of the estate under the law rather than under the will, which gave her a specified sum. The estate is valued at something near \$1,000,000 and there are plenty of attorneys on each side to keep the court and the heirs all from suffering ennu.

H. W. Potter of Colorado, a nephew of the deceased, now comes into court and claims he was promised a section of land in Keith county, Nebraska, by his uncle when he brought him home from Colorado just prior to his death, and says he knows there is a deed conveying the same to him in existence and was made prior to the death of the uncle. He has cited the widow and a number of others to come into court and say, if they know or have any idea, where this paper is and why it is kept away from him. There are a host of other heirs, who have been here and retained attorneys to look after their interests and try to get a share of the large estate.

MAYOR TINCHER DOES NOT WANT ANOTHER TERM

FAIRBURY, Neb., March 20.—(Special.)—Frank E. Tinchler, mayor of Fairbury, who was named by the citizens' party for re-election, has declined the nomination. Mr. Tinchler's term as mayor will expire this spring and he has served two years in this capacity. The official committee has nominated Frank Houston, formerly county clerk, to head the citizens' ticket in place of Mr. Tinchler. Mr. Houston has expressed his willingness to run.

Only two tickets are in the field at Fairbury this year, the socialists and the citizens' party. R. Z. Millikan, a Rock Island boiler maker, will lead the socialist ticket. The "wet" and "dry" issue is voted on independently this year. The commission form of government will also be voted upon.

Caucus Held at Shelton.
 SHELTON, Neb., March 20.—(Special.)—At a largely attended meeting held last evening at the town hall the following were renominated for village trustees: M. H. Weaver and J. F. Walker. The saloon question will be submitted to the voters for their decision. The town now has two saloons.

Golden Wedding at Humboldt.
 HUMBOLDT, Neb., March 20.—(Special.)—Mr. and Mrs. Russell celebrated their golden wedding anniversary with a family gathering at their home here Monday. They were married in Nemaha City March 17, 1863.

LOCOMOTIVE FIREMEN CLOSE CASE IN NEW YORK

NEW YORK, March 20.—The Brotherhood of Locomotive Firemen and Engineers, closed today its case against the fifty-four eastern railroads in the arbitration proceedings over the firemen's demands for increased pay. Although the firemen introduced all the evidence they desired several days ago their case was not formally closed until the cross examination of W. J. Lauck, their expert statistician ended this afternoon. The three arbitrators ordered a recess until Friday to permit the railroads to prepare their case. Mr. Lauck testified today

DANDRUFF SCALED AND SHOWED PLAINLY

Children's Heads Broke Out with Thick Yellow Scale. Would Bleed. Hair Came Out. Cuticura Soap and Ointment Cured in 2 Months.

1905 Kemper Lane, Cincinnati, Ohio.—"The children's heads broke out with a thick yellow scale and when I would wash their heads the scale came off and their heads would bleed. It would itch and the hair just seemed dead and did not grow and came out gradually. There was dandruff which scaled and showed plainly. I used Cuticura Soap and Ointment and it did not do any good. I used another medicine and it was no good. I then tried Cuticura Soap and Ointment. I first washed their heads good with Cuticura soap and when dry I used Cuticura Ointment twice a day. I noticed there was relief in just a short while. In two months their heads were completely cured. Their heads look fine and their hair is growing thickly now." (Signed) Mrs. Blanche Collins, June 25, 1912.

Not only are Cuticura Soap and Ointment most valuable in the treatment of eczema and other distressing eruptions of skin and scalp, but no other emollients do so much for pimples, blackheads, red, rough and oily skin, itching, scaly scalp, dry, thin and falling hair, nor does any other remedy throughout the world. Liberal sample of each mailed free, with 22-p. Skin Book. Address post-card "Cuticura, Dept. T, Boston."

Be tender-faced men should use Cuticura Soap Shaving 60c, etc. Sample free.

that the gross income of all the railroads concerned was \$56,500,000 in 1912, as compared with \$55,912,000 in 1911. In 1912 the firemen's wages were paid \$22,511,000 in wages in 1911, \$22,342,000. Elisha Lee, for the railroads, called attention to the fact that while the gross income had increased but 1 per cent in all eleven years, the firemen's wages had increased 87 per cent. But Mr. Lauck declared this an unfair comparison, inasmuch as the increase in income was twelve times the increase paid the firemen.

ment yesterday contracted with the Lake Submarine Torpedo Boat company for the construction of two vessels, at \$100,000 for each submarine, with the stipulation that they should be built by the Craig Ship Building company, of Long Beach, in San Pedro harbor, Cal.

COMPOSER IS INSTRUCTED TO LEARN INDIAN SONGS
 WASHINGTON, March 20.—To preserve and develop the wonderful music of the American Indian, now fast disappearing with the passing of the race, Secretary

of the Interior Lane, today appointed Geoffrey O'Hara, a composer, as an instructor in music under the bureau of Indian affairs. It will be Mr. O'Hara's duty to record native Indian music and arrange it for use in the Indian schools. He is to live on the reservations with the Indians and obtain a record of the music, and, with this as a basis, cultivate the use of the Indian songs in the schools.

In his letter directing the appointment of Mr. O'Hara, Secretary Lane said: "I think that it is the part of wisdom

to develop in the young Indian an increased respect for all those things of beauty, which their fathers produced. Our effort should be to make this generation proud of their ancestors and to keep alive in them the memory of their wholesome legends and their aboriginal arts."

Canadian Forger Sent to Sing Sing
 NEW YORK, March 20.—William B. Treffy, a young Canadian bank clerk who started the capitals of Europe by lavish expenditure of money, was sentenced to Sing Sing today for four years. He pleaded guilty to forgeries by which he defrauded the branch of the Royal Bank of Canada out of many thousands of dollars.

Alamito Reorganized

Improved Service--New Buildings--New Equipment--Thoroughly Modern Dairy

The New Alamito Officers:

CHARLES F. SCHWAGER, President.

GEORGE B. DYBALL, Vice-President and Treasurer.

F. L. KERMAN, Secretary.

EDWARD M. MARSTEN, General Superintendent.

Story of the Alamito Sanitary Dairy--Past, Present and Future

Alamito's History

The Alamito Sanitary Dairy is the most successful concern of its kind in Omaha and its plant, equipment and policy are the inspiration of like organizations in innumerable western cities. It has been in existence nine years, being the result of the consolidation of the interests of Schwager Bros., Clinton H. Briggs and W. Farnam Smith, all at that time producers of only high priced milk and cream. In the production and distribution of high priced dairy products, they were pioneers and are still distributors of the only certified brands of milk sold in this community. The fact that this concern has persistently maintained this policy of dealing only in the best grade of dairy products has won and held the confidence and good will of the public, gradually adding to its volume of business until it has outgrown its present location.

Alamito's New Officers

When it was decided to erect a new plant and make a big stride forward, additional capital was needed. The company was then reorganized, the older employees were offered stock in the new concern, and many eagerly purchased. Some prominent business men, customers and producers also purchased stock and, with the employees holding a heavy financial interest in the institution, a co-operative company is the actual result. The employee now has the interest of the public at heart—the public's complete satisfaction is his greatest satisfaction and the result is that Alamito customers are now securing better service and more satisfactory products than ever before in the history of this concern. Stock subscriptions are no longer sought. The necessary cash has been acquired and unless some one could be of unusual value to the concern, in one way or another, over and above the stock consideration, he would not be considered. It is this class only that would still be considered for small stock subscription. It was a great move when the Alamito employees came into the firm. If you were a customer before this change occurred and were not wholly satisfied, we suggest that you telephone us to begin serving you again. You will be well pleased this time, we are sure.

Alamito's New Buildings

The architect of the new building to be erected during this year has instructions that, when carried out, will give Omaha a dairy plant that will have no equal in such cities as Denver, Minneapolis, St. Paul, Kansas City and St. Louis. It will be large, bright and airy. Conforming to the modern ideas of sanitation, the structure will be concrete—of course fireproof—with immense window space, tiled floors and walls. It will be of such construction that the entire plant, walls, ceiling and floors, may be secured daily with boiling water. The new plant and stables will cost, without machinery, in the neighborhood of \$75,000. This, then, in a measure is what the Alamito Dairy is doing to give Omaha a safe, pure milk supply.

Alamito in Comparison With Other Cities

Many proprietors of large dairy interests in cities much larger than Omaha have come to this city to study the economical and sanitary methods pursued in this plant. In many cities, the retail price of milk is nine cents per quart. The Alamito price is eight cents for its pasteurized product. When a concerted effort was made some time ago by the milk interests of Omaha to arbitrarily force the retail price to nine cents in this city the Alamito quickly responded with the announcement that its retail price would remain at eight cents and thus effectively broke the move to increase the price. The Alamito's complete plant and well drilled organization make it possible to retail at eight cents a product that is superior to that sold for more money in other cities and enables it to deliver the best, safest, purest and cleanest milk in Omaha at this price.

Alamito's Interests Are Yours

The broad safeguards mentioned above are resorted to—the enormous investment in new plant and machinery is made and all for what purpose? To give you and every citizen of this community a milk supply that is absolutely free from contamination of every description, a product that is as safe for the babe in arms as its mother's own milk. When a concern resorts to the extremes, in safeguarding its products, to which the Alamito goes, then its interests become your interests. To make such a plant a success requires the co-operation of every citizen to maintain the high standard and low prices now in effect. Will you do your part by placing your order, not next month or next week, but now?

Alamito's New Machinery

In a modern sanitary dairy the mechanical equipment plays an important part. It must be perfect to insure proper results. At the same time, it must be economical in operation. Already some of the new machinery that can be removed to the new building has been put into use. With economy and efficiency as the goal, the plans call for a separate motor for driving each machine. This obviates the necessity of operating the entire plant for doing only a certain part of the work. Considerable is saved this way and a low price for selling the milk is maintained. No ice will be used anywhere within the buildings. Instead, a huge modern refrigerating plant will be operated which will maintain a uniform low temperature at any degree desired, thus keeping the products in a most wholesome state at all times. A wonderful bottling and capping machine will soon be in service. It is one of the very few in use in this country and through its operation bottles are automatically filled and capped. Workman's hands never even touch the bottles throughout the entire operation.

Alamito's Problems—

Alamito's Effort to Please

Throughout the country the milk business is in its infancy. Universities and endowed institutions have been working out its problems for years. Milk is the most delicate and easily contaminated food product known. The care it receives must be infinite. Too great precaution to keep it pure and wholesome cannot be taken. Alamito resorts to every modern proven advance the industry knows. No effort is relaxed that will send it to you in a better state. Yet, with this as an established fact, people are frequently more careless about the source of milk supply—a food that goes into and is taken up by the human system—than they are about an article for wear or adornment. Such conditions are true, though, when given thought, it is hard to believe. Do you know how your milk supply is handled? Do you know whether the innocent looking bottle of milk you find on your porch was filled by some careless milk dealer who submerged his dirty hand and arm as well as the bottle into a vat of milk in the filling operation? If you use Alamito milk you know this has not occurred. For the convenience of those desiring to add to or change their morning order Alamito is now remaining open until 9:30 P. M.

Alamito's Message To You

We need your co-operation. We need the co-operation of every loyal citizen who has his city's progress at heart and is proud in seeing his home town and its industries go forward. It is essential that you appreciate some of the bigger problems with which this business is confronted. We have tried to touch upon some of them here and to outline our policy in overcoming them. Space in this newspaper was purchased to bring to your attention these conditions and to win your good will by a frank and honest discussion of the subject. We have nothing to hide and we would be pleased to go further into detail and show those interested exactly how every detail is handled. We want your good will and loyalty but we want you to feel perfectly sure that Alamito deserves it. That's why we have told you the ins and outs of our business in a manner that is clear to one unfamiliar with such an industry. May we have your support?

Alamito's Products

The business is mainly the pasteurizing and distribution of milk. However, we handle several brands of this product. The main one is "Alamito Perfect Pasteurized Milk" delivered at 8 cents per quart. Then we have "Alamito Jersey Milk" or "Special" milk as it is sometimes called. This is high grade milk to which is added a portion of rich cream bringing it far above the standard, making it similar to Jersey milk and giving it a higher butter fat percentage than as it comes from the cow. This retails at ten cents per quart. This concern is also the distributing agency for the two certified brands, "Frisian" and "Arrowood." Alamito does not produce these two brands but merely receives them, bottles, and delivers them to the consumer. Then there is whipped cream, butter, cream cheese and cottage cheese, Per-mil-lac and buttermilk. Any of these products will be delivered to any home in Omaha, South Omaha, Council Bluffs or Dundee by a request to any Alamito driver or a phone call to the office, Douglas 411. A large hotel and restaurant trade is enjoyed, most of these places in Omaha buying from Alamito.
