GOTCH MAKES GOOD AGAIN

Powerful Iowa Mat Worker Shows Russian Some New Stunts.

WINS BY TWO STRAIGHT FALLS

Requires Eighteen Minutes Ten Seconds for the First and Five Minutes Thirty-Seconds for the Second Flop.

KANSAS CITY, April 1.—Frank Gotch retained his supremacy as wrestling champion of the world last night defeating George Lurich of Russia in two straight falls at Convention hall. Gotch secured the first fall in 18:10 and the second in 5:25.

The first fall was secured with a toe hold and arm lock and the second with a head chancery and bar arm.

Gotch appeared much stronger than the Russian and he was the aggressor throughout. Lurich got behind the Iowa giant a half dozen times, but he was unable to secure an effective hold. Gotch had his opponent in desperate straits many times and toyed with the Russian, releasing one hold only to grab another cruelly dangerous.

The fatal twist of Gotch's toe hold did much to undermine the confidence of the Russian, which was none too great at the outset of the match. Before the men had wrestled two minutes Gotch's superior strength was shown when, after securing an arm and body hold, he picked up Lurich in his arms and slammed him to the mat with great force.

When Gotch decided to end the first bout he secured a half nelson, arm and body and double arm holds in quick succession. As Lurich squirmed out of the last hold Gotch got a toe hold. As he began to feel the pressure an expression of agony appeared on the Russian's face and soon he was forced to place both shoulders to the mat.

It was apparent that Gotch intended to make short work of the second part of the contest. His first move was to pick up Lurich bodily again and slam him to the floor. Then he secured a half nelson and crotch hold, but Lurich bridged out of it. The Russian was picked up again and slammed to the canvas. After trying a toe hold and full nelson, from which Lurich released himself, Gotch got the hold with which he ended the match.

NEBRASKA FRUIT CROP MAY BE GOLD MINE

(From a Staff Correspondent.) LINCOLN, April 2.—(Special.)—According to Secretary Marshall of the State Horticultural board the prospects in Nebraska for a big fruit crop were never so bright. "Every indication points to a crop which will be the richest the state has ever known," said the secretary this morning. BIDS FOR POSTOFFICE REPAIRS ARE SCATTERED

Bids for the various kinds and classes of work to be done on the general overhauling of the postoffice building in Omaha will be opened April 8 at 2 o'clock. It may be due to the storm that Omaha firms generally have forgotten to get their bids on this work, but the fact is that not as many Omaha firms as usual are competing for the job.

The work is divided into several classes by the department, such as the mechanical equipment-work, the iron work, painting, carpentering and general repairs. The mechanical equipment includes a great deal of plumbing work. The iron work takes in the installation of grills, partitions, collapsible gates and doors, while the painting, carpentering and general repairs work includes painting and recanvasing walls, repainting of plastering and furniture finishing.

NEW TRAINS ON FIRST TRIPS

Highest Achievement in Passenger Comfort Pass Through to Coast.

LUXURIES OF MODERN HOTEL

Practically Every Convenience of Home and Office Are Established in Service and Equipment.

Heading in toward the Pacific coast, three spick and span new passenger trains rolled into Omaha yesterday, coming from Chicago. One came over the Milwaukee and two over the Northwestern and all three were taken west by the Union Pacific.

The first of three new trains to arrive was the Pacific Limited, or No. 39, over the Milwaukee. It left Chicago at 10:58 o'clock Tuesday morning and arrived in Omaha at 12:15 Wednesday, leaving for the west fifteen minutes later.

The Milwaukee's train was made up with entirely new steel equipment consisting of library observation and compartment and drawingroom standard sleepers, tourist and dining cars, all painted the deep orange color standard with the road. This train runs daily and reaches San Francisco at 9:30 o'clock of the morning of the third day out from Chicago. At 3:20 Wednesday morning the North-

western-Union Pacific de luxe train arrived on its initial trip to the coast and departed fifteen minutes later, after changing engines. It reaches San Francisco at 9 a. m. the third day from Chicago, making the run in sixty-five hours. It was in charge of Sam Hutchinson, joint excursion agent for the Union Pacific and Northwestern.

The equipment of the new Overland is fresh from the shops, consisting of an observation and library car, drawingroom and compartment sleeper and six-section standard sleepers, diner and composite car, all of steel construction, with interior finish in walnut and mahogany. Like the cars all of the appointments and appointments are new.

At Omaha, the diner was attached and out of this city the first meal on the train was served. The diner is the acme of convenience and perfection. The kitchen is in the front end, where the cooking is done by electricity, coal and charcoal. All of the cooking utensils are of aluminum and every available inch of space is occupied. The table service is all of the most expensive chinaware and solid silver and everywhere possible electricity is brought into use. The coffee and tea pots have electric heaters in their bottoms and when put on the tables their wires are plugged into the walls, thus keeping the beverages at almost the boiling point constantly.

In the front car there is a shower bath and a barber shop, clothes pressing establishment and manicurist, the prices

for the service being the same as those that maintain in first class places of the kind in the cities. The buffet car, with a commodious reading and lounging room for men, is near the front of the train, while at the rear is the observation car, with its complement of maps, stenographers and well-equipped library. For riding on this train an excess fare of \$1 is charged between Omaha and the coast.

In addition to the new Overland Limited, at 9:15 o'clock the Northwestern brought in its San Francisco Limited another new train that reaches San Francisco at 3:30 p. m. the third day out from Chicago. It practically takes the place of what was formerly No. 1, and was made up here out of the Northwestern and Milwaukee.
