GRAIN AND PRODUCE MARKET

Winter Wheat Showing Up Fine in Western Part of State.

CORN SUPPLY IS DECREASED Chicago Stocks Show Fewer Bushels in Store and Largar Amount Affont, with Result of Strong Futures.

OMAHA, April 5, 1912

The weather in the northwest is very favorable for the beginning of plowing and seeding. H. W. Snow, in a message troin Golby, Kan., says: "The wheat throughout the east central and north part of the state is small in growth, but deeply rooted. The plant is well stooled and is covering the ground like a mai! The moisture is ample and the present prespect is above the average. I drove through Norton, Decatur, Sheridan and Thomas counties. In Norten and Decatur counties about half the crop is strong and vigorous, the bisiance is very small, and a large part of it barely through the ground, and it did not germinate until after the snow of March I. The top soil is dry, but there is plenty of moisture around the roots. The wibde are deing some damage, but if the weather holds favorable this late wheat will be all right. A large acreage in Thomas and Sheridan counties has been destroyed by blowing out of the ground. One strip of twenty miles is as bare as a desert, but west and south the loss up to this time is relatively small. All these counties have a much larger acreage than was harvested last veek. The visible supply of wheat decreased 2,255,000 bushels for last week. Chicage stocks decreased 277,000 bushels. Minneapolis stocks increased 39,000 bushels for twe days.

The market seems to be working into a gradually stronger position, as prices advance the buying side gains more friends.

The visible decreased 1,763,000 bushels. The visible decreased 1,763,000 bushels.

advance the buying side gains more friends.

The visible decreased 1,763,000 bushels for corn. Chicago stocks showed a decrease of 540,000 bushels in store and an increase of 585,000 bushels afloat. A new high price was made for all the options yesterday, the May showing the greatest strength, a great many hedges in May being changed over to July. New commission house buying was again in evidence and there was considerable scattered liquidation which was readily absorbed.

absorbed.

The strength in oats yesterday came from the other grains, with shorts covering and considerable changing from the May to the July option. The weather is generally favorable for field work. is generally favorable for field work, there being little rain.

as against a crop of 600,000,000 harvested last year, prices steadily declined. At the close quotations were only a shade show the low point of the day, the easing off of prices having been aided by reports of good rains in the wheat country that seemed to add to the prospects of a record crop held out by the government's figures.

Corn lacked support nearly all day After one or two feeble railles it closed at the low point of the seasion, partly in sympathy with wheat.

Oats followed the downward course of other grains.

Provisions were quiet all day and at the close all prices showed.

Prices paid for the weighty of-farings were very uneven, being no nore than steady on some hunches and as much as 5c higher on others. Owing to the fact that practically everything on sale yesterday was on the light order comparisons on the heavies are rather uncertain.
