General Live Stock Agent Irwin of the Rock Island at Topeka and Assistant Kerr of Sabetha, Kan., are in town ahead of the first shipment of grass feeders that the company is hauling from Oklahoma and Texas to the ranges and ranches of Nebraska, here to be grassfed and later sent to market.

Last season the Rock Island brought to Nebraska thirty-five trainloads of cattle from Texas and Oklahoma for the weatern range. Mr. Irwin is of the opinion that this season the shipments will be nearly doubled. He says that the Nebrasks ranchers make big money buying the southern cattle and putting them on the grass in this state. They take on flesh much more rapidly than on the home market and seem to thrive.

(4) An excess consumption of lubricating oil. These losses are traceable to one common cause-Any oil will lubricate to an extent. So will lard. But a lubricating oil, to have efficient lubricating qualities, must both wear well in use, and furnish Given an oil with these qualities, (and remember they are rare), you must next make sure that the oil's "body," or thickness, Motors and feed systems differ widely. The oil suited to one motor will often be entirely too light or too heavy for another. To establish a sound guide to correct automobile lubrication, we have taken a step of the utmost importance to the motorist. We have done what had to be done. Each year we carefully Based on this motor-analysis and on practical experience, we have specified in a lubricating chart (printed in part on the right) the correct grade of Gargoyle Mobiloil for each make of automobile. The superior efficiency of these oils has been If you use oil of less-correct "body" or of lower lubricating quality than that specified for your car, sooner or later your motor must pay the consequences. Unnecessary friction must result. Ultimate serious damage will follow. A booklet, containing our complete lubricating chart and points on lubrication, will be mailed on request. The various grades, refined and filtered to remove free carbon, are: Gargoyle Mobiloil "A," Gargoyle Mobiloil "B," Gargoyle Mobiloil "D," Gargoyle Mobiloil "E," Gargoyle Mobiloil "Arctic." They are put up in 1 and 5 gallon sealed cans, in half-barrels and barrels. They are sold throughout the world. All are branded with the Gargoyle, which is our mark of manufacture. The dealers listed below carry ample stocks of Gargoyle Mobiloils and are provided with our complete chart of recommendations. This will enable them to select the correct grade for your car.
