

By MELLIFICIA.

Friday, May 2, 1913.

HE many friends of Mr. and Mrs. George A. Joslyn are enjoying one of the great musical treats of the season. Mr. Archer Gibson, the well known organist of New York, and Mrs. Gibson are spending a fortnight as the house guests of Mr. and Mrs. Joslyn, and each evening a delightful program is given.

It is not only the pipe organ and the master player, but also the musical atmosphere that prevails, which is so pleasing. The guests are seated comfortably through the spacious rooms, and instead of glaring lights from chandellers, there is a soft glow from a few shaded lamps. Lynnhurst, which is one of the largest homes in the city, is also one of the most hospitable, and is admirably built for entertaining.

Mr. Gibson is one of the foremost musicians of this country and is a member of the American Guild of Organists. During the winter Mr. Gibson plays once or twice a week at the home of H. C. Fricke and other homes in New York which have pipe organs.

The program ihursday evening included excerpts from Lohengrin, by Wagner; melody in F, Rubinstein; nocturne and funeral march, Chopin; "An Enjoyable Improvisation on Church Melodies," Archer Gibson; Hungarian dances. Two numbers by Caruso and Plancon on the auxetophone HOUSE OF GEORGE WICHMANN REBUILT BY MRS. J. C. WHARTON DAY were accompanied by Mr. Gibson on the organ. Compositions by Beethoven, Wagner, Schubert and Suppe were also given. After repeated domands Mr. Gibson played "Love's Dream," by Liszt, and "My Heart at Thy Sweet Voice," from Samson and Delliah,

Landlord Objects to Guaranteeing His **Tenant's Water Bill**

J. B. Robinson, agent for the owner of three houses on North Twentleth street. believes the Water board is operating a "holdup scheme" by attempting to force him to sign as security for water used by tenants.

"I went to the Water board office this morning." said Robinson, "and offered them checks for \$15, \$5 per month for each of the three houses. They refused to accept the checks and would accept nothing unless it covered all the water which these tenants might use.

"Now, the water bill on one tenant was \$16 last month, owing to a leak which he ould not prevent. I am willing to share the loss because of this leakage, but I do not believe I ought to have to pay for something I am in no way responsible

Robinson says he may go into the courts to question the Water board's power to compel him to guaranty the water rent of all his tenants.

OMAHA MEN IN CANAL ZONE Returning Fireman Tells of Those Who Are Working There. big jobs. LOCKS ARE ABOUT COMPLETED CONCERTS ARRANGED FOR Interesting Details of the Work New Being Done by Uncle Sam on the Big Panama Canal.

Ge, W. Tanner, formarly of Omaha, the ast four years in the Canal sone of ma, has returned to Omaha. He has seen on the fire department at Cristoval, Canal mone, during the four years he was way from Omaha. "We all liked it real well down there," he said. "There are a bar of Omaha boys on the fire departnts and all of them are only too glad to show Omahs people around when they come down there sightseeing."

Among the Omaha men he mentioned who are doing duty on the fire departments in the Canal some are Olif Olsen. Charles Petersen, A. T. Livingstone, Gust Schaeffer and E. A. Burmelster, Olsen was formerly captain of the truck department at engine house No. 3 in Omaha. Charles Petersen was captain of the nose wagon at the same station. A. T. Livingne, formerly driver for Chief Salter in Omaha, was connected with the fire de partment in the Panama country until recently, when he resigned and accepted a place as conductor on one of the railroads there. Gus Schaeffer has control of the fire department of the town of Corosal. Burmelster, who was formerly nected with the truck department at station No. 1 in Omaha, is now a Beutenant of the department at Culebra.

Resigns Position.

Mr. Tanner has resigned his position on the department and says he will probably locate in Colorado, where his folks have moved since he left Omaha.

Speaking of the progress of the build ing of the canni, Mr. Tanner says the mt land alides in the Culebra out have brought out a new problem never before encountered by dredging englsers. It has been found, according to er, that the dirt and mud is accually ising from the bottom of the canal in the Culobra cut as well as aliding in from the top. This, the engineers say, is due o the great weight of Gold hill and Cule hill, on either side of the cut, which azert such a pressure on either side at to force the loase and softened rock and mud upward in the ditch. The engineers, ir. Tapper says, are meeting this diff. culty by cutting down the tops of these hills to rejeve the pressure.

The former Omahs boy says that in his
