GRAIN AND PRODUCE MARKET

Wheat Reports Are Conflicting and Traders Are Taking Profits.

CORN AND OATS UNDER CONTROL Strongest Concerns in the Speculative World Have Strangle Hold

Upon All the Smaller Grains.

OMAHA, May 24, 1813.

The word "corflicting" will hardly convey to the reader the difference in the messages received on the Board of Trade yesterday from points in Katisas as to the condition of the growing wheat. An advance proofsheet of the Modern Miller admits that, while the crop has gone backward a little, the deterioration is confined to small and scattered areas and these to small and scattered areas and fined to small and scattered areas and not necessarily of a serious nature. There were additional reports from the southwest of losses in sections, and, as some of these were denied, the speculative world was left to its own judgment as to the proper side of the wheat market to back.

while some exporters in the trade were reporting business as dull, he found importing men in the market right along. Cash wheat was unchanged to be higher. Corn and cats are controlled by some of the strongest concerns in the speculative world and there was good buying on all the soft spots, and the market failed to show any signs of sharp price losses on a prospective change in conditions. Cash corn was he higher to be lower. Cash oats were unchanged.

to the proper side of the wheat market to back.

One of the oldest speculators in the Chicago wheat market said last night that he considered many of the reports now coming forward on crop conditions, whether they are favouable or unfavorable, as valueless on the whole.

While wheat speculators continue to move in a body, there was less of this than was to be seen a week or ten days ago. The larger houses are receiving reports from every section of the winter wheat beit many times during each sewheat beit many times during each sewheat beit many times during each sewheat beit many times during each seen a work of the winter wheat beit many times during each seen a work of the winter wheat beit many times during each seen a work of the winter wheat beit many times during each seen a work of the winter wheat beit many times during each seen a work of the winter wheat beit many times during each seen a work of the winter wheat beit many times during each seen a work of the winter with the winte ago. The larger houses are receiving reports from every section of the winter wheat belt many times during each session, and it was more noticeable yesterday and that along with/these messages were either fluying or selling orders. The fact was fully demonstrated that those who are enabled to secure profits in wheat are showing no inclination whatever to tarry. It may be said without fear of contradiction that a choppy market will be seen from this time until the harvesters are sent into the fields later on. There is little in the cash situation that may be called encouraging to the trade at large, especially to the holders of either the future or cash in the Chicago market.

J. Meladay, one of the larger exporting concerns in Chanada, with hoadquarters at Toronto, passed through Chicago yesterday. He said that nearly all the wheat now hold in Canada has been sold to the foreigners and that it will be moved out as rapidly as possible. That while some exporters in the trade were reporting business as dull, he found importing men in the market right along. Change in a reput series of the strongest concerns in the speculative world and there was good buying on all the soft spots, and the market falled to show any signs of sharp price losses on a prospective change in conditions. Cash cost were unchanged.

Cotton Review. NEW YORK, May 3.—Brown cottons, cotton goods for printing and converting and same lines of cotton goods for the manufacturing trades sold actively this work and one of the goods markets closed distinctly stronger than a week ago. Prices had failen to a level that became attractive to users. China appeared in the market as a boyer of heavy and light weight cheetings. The lobbers are still holding off and are supplying their requirements by spot purchases.

News of Settlement in Regard to Harriman System Stimulates.

UNION PACIFIC MAKES GAIN Bank Increase for Week Smaller Than Indiented by Known Movements of Cur-

reney.

NEW YORK, May 28.—Unofficial declarations that a settlement had at last been reached in the negotiations for segregation of the Harriman system in compliance with the supreme court's mandate stimulated the stock market tosegregation of the Harriman system in compliance with the supreme court's mandats stimulated the stock market today. Gossip on the exchange today was to the effect that the segregation plan provided for the cancellation of the \$150,000.00 of Southern Pacific stock held by Union Pacific, in return of which Union Pacific with cash and bonds having an additional value of \$20,000,000. The stock exchange house which was the largest buyer of Union Pacific made the statement that the full plan of segregation will be issued next Thesday.

No authoritative confirmation of these reports was to be had. The statement was made by a representative of the banking interests which have been acting as fiscal agents for the Harriman system that he knew of no settlement. Union Pacific, for the first time in several weeks rose above 155, gaining 3 points. Southern Pacific advanced 2 points. The upturn in these stocks imparted strength to the market as a whole and gains of 1 to 2 points were made by many of the representative issues. There was some further selling of stocks which have been under pressure recently. Pennsylvania touchoed a new low figure at 169½ and Canadian Pacific sagged 1 points on renewed solling for foreign accounts. Both these stocks, however, railled when the list went up.

While the banks gained cash on the week, the increase of \$2,150,000 was considerably smaller than was indicated by known movements of currency. Another small addition was made to excess reserves.

Bonds were firm.

St. Louis & San Francisco general 5s railled strongly after an early weakness. Total sales, per value, \$1,250,000. United States 2s coupon declined ¾, and the 2s and Panama coupon advanced ½ on call on the week.

SHEEP—Today being a Saturday, there was nothing doing in sheep and lambs, therefore speculation remained the same as on Friday. While the seneral market fluctuated a little during the week, prices as at the close of last week, and trade conditions are no better than those prevailing a week ago. It is still the sonsensus of opinion in trade circles that a weak undertone lingers in the general trade of both sheep and lambs, and there is apparently no good reasons for believing that any improvement will take place next week unless the receipts fall off considerably. The supply this week has been very moderate, as no more than 24,000 head were accounted for, as compared with 25,000 last week, and 17,000 two weeks ago. Comparing with the same time last year the week's supply has shown an increase of almost 4,000 head. As has been the case most of the season a larger percentage of the offerings than usual has shown considerable weight and the result is that the market has been oversuppited with such grades, while offerings of handyweights have been in rather light supply. In the main the demand centers on good to choice lambs and muttons of handyweights, while there is little inquiry for anything overly heavy or of inferior quality.

The bulk of the good to choice lambs at the close of the week are selling around \$5,00 was paid, being the highest price since May 2. Lambs without the fleece have been in fair supply, but have been none too good as to quality. Decent, handy kinds are bringing prices at \$7.00 to \$7.40, with the less desirable ones moving anywhere from \$5.50 to \$7.00. \$5.50 to \$7.00. \$6.50 to \$7.00. \$6.50 to \$7.00. \$7.50 year-lings, light, \$7.0027.35; year-lings, heavy, \$8.5567.00; wethers, fair to good, \$5.7506.50; culls and bucks, \$6.006.55.
