## CHICAGO GRAIN AND PROVISIONS

# Features of the Trading and Closing

Features of the Trading and Closing Frices on Board of Trade. CHICAGO, May 28.—Although there were many reports of damage today from the southwest market, was not backed up with buying orders and the wheat showed weakness. The latest trading was steady. Corn finished %gr%o off to a like amount up, oats with a guin of %gr%o to 1%c and provisions varying from 100 loss to 12%c advance. The absers argued that if the Kansas and Oklahoma crop had been injured as much as declared in the last three weeks all central markets would be flooded with public buying orders. A good deal of interest was also taken in a well known expert's opinion that rain within a week would make a marvelous difference in the yield in the dry sec-tions of Kansas. Tables in wheat developed chiefly where based on adverse field reports from Illinois points. Export clearances of wheat and flour potasy equalled \$2,000 bushels. Primary recipts of wheat 20,000; a year ago, 20,000. Theorem on the yiel of the set and flour pression of wheat 20,000; a year ago, 20,000.

 The set of th

opment that we notice is that the tre mendous powers are exercised in secre and by men who neither as committee men or as congressmen are responsibl to the country at large. These legista tive methods probably invite demande for improper favors. The secrecy of the committee room plays directly into the hands of the lobbyist and the corporate seeker for favor, while the lack of personal responsibility makes it impossible for the people to punish anyone politically for the results of the system. "I believe that by far the greatest part of the inefficiency and attendant corrup tion from which we are suffering in our federal and our state governments to
