

AUTOMOBILES

USE BONE BUILDING WATER

Federal Officials in Omaha Return to Good Old Missouri.

FRENCH SCIENTIST DISTURBING

Declares that Distilled Water Has Not the Mineral Requisites for Keeping the Body Firm and Reliant.

If some over-busy French scientist had not decided that drinking water should contain a lot of mineral in order to keep the human bones firm, the various federal officials in Omaha might still be drinking distilled water as clear as diamonds. As it is, they are drinking ordinary Omaha city water taken from the Missouri river and filtered at the city's water plant at Florence.

On days when the river is low and runs quietly this water is fairly good, and on days when the June rise is on it gets a little cloudy, because the filtering plant does not take out all the lime rock that floats down from the Yellowstone river in Montana. So the federal officials and all the help are keeping their bones firm with the lime stone ingredients they get out of the city water.

Down in the engine room great quantities of distilled water accumulate through the condensation of waste steam. Cadet Taylor, custodian of the building, conceived the idea once of furnishing this sparkling purity for the water jars in the various offices. When cooled with ice this was delicious. They all liked it. One could see through ten miles of it, it was so clear.

Then in butted the French scientist. If Mr. Taylor did not read the newspapers so much, this scientific discovery might have escaped him. But he reads everything. So it happens that he read the dissertation of the Frenchman, who concluded that if a human being should drink distilled water all the time, his bones would become soft, as the necessary mineral matter to supply the firmness of bone tissue would not be supplied.

Through Mr. Taylor the officials of the building heard of the theory. Next morning some of them were sure their bones were softer than they had been the day before. Some thought they had felt their spines bend when they stepped into the elevator. Others remembered that their spine bent slightly when the elevator started up with a jerk. So Custodian Taylor threw the distilled water out of the door and began to supply them with real rocky Omaha city water.

Physician Says Rest Will Cure Many Cases of Tuberculosis

MINNEAPOLIS, June 17.—The American Medical association met for the opening session of its sixty-fourth annual convention at the auditorium today.

Dr. John Witherspoon of Nashville, Tenn., president of the association, was installed, took charge of the program and delivered his annual address. Welcoming addresses were made by state, city and university officials.

Rest in bed is the greatest curative agent there is in cases of active tuberculosis of the lungs, according to a paper by Dr. John W. Flinn of Prescott, Ariz. Dr. Flinn, whose subject was pulmonary tuberculosis, stated that "One or two months in bed are necessary in the treatment of all cases. If the disease is very active the patient should be bed by a nurse and treated as in typhoid fever. Bed treatment should be continued until temperature and pulse have both been normal for some little time and weight is nearly normal. The rest treatment of tuberculosis had been attended with brilliant results."

The lack of modern facilities afforded by hospitals in the smaller communities and the possibilities of fitting up dwelling houses into private hospitals was discussed by Dr. John A. Hornaby of Chicago. He said in part:

"There are many physicians, surgeons and specialists in small communities quite as competent to do good work as their brothers in the large centers, but, as a rule, the hospitals in their communities are utterly lacking in modern facilities; hence these men are finding it necessary to equip small hospitals of their own by remodeling abandoned dwelling houses. The remodeling of such houses is not difficult and need not be expensive, yet excellent work may be done here."

Mrs. Viola Hudson Commits Suicide in London While Insane

LONDON, June 17.—"Suicide while temporarily insane," was the verdict of the coroner's jury at Westminster on Mrs. Viola McKenna Hudson of Chicago, who was found dead from asphyxiation by gas in her flat near Victoria station Sunday.

The evidence indicated that she was in financial straits. She borrowed some cash on Saturday last in order to cable to the Northern Trust company, in Chicago, for money. She left a will scribbled on an envelope bequeathing a thousand "lbs." to an Oxford undergraduate named George Herbert, and another thousand "lbs." to Bertha Belle Ferguson of 24 West One Hundredth street, New York, and the remainder to "My beloved daughter, Viola Hudson, 4123 Franklin avenue, Chicago."

CHICAGO, June 17.—C. W. Hudson, former husband of Viola McKenna Hudson, who committed suicide in London, said today that he had made no arrangements to bring the body to Chicago for burial.

"We were divorced in 1911. She went to California and about eight months ago sailed for Europe," said Mr. Hudson. He declined to discuss the story further.

At the Northern Trust company bank officials would not state whether the decedent and sought funds of them.

TWO KNOX COUNTY MEN HURT IN RUNAWAYS

BLOOMFIELD, Neb., June 17.—(Special Telegram)—M. D. Larkins, who is employed in the Bagley Renard Lumber yard, had a bad runaway this morning. While hauling fence posts his horses started to runaway, he was thrown out

with great force and picked up unconscious. Under his right eye showed a big rash. It is feared that he is internally injured. He was hurried to the local hospital to receive medical aid.

Wilkens, who tried to stop the team, was badly bruised up.

LEO MATTHEWS IS NAMED CONTROL BOARD SECRETARY

(From a Staff Correspondent.) LINCOLN, Neb., June 17.—(Special Telegram)—Leo Matthews of Albion, former secretary of the democratic state committee, was chosen secretary of the

state board of control late this evening. George Weidenfeld of Omaha was elected bookkeeper and Mrs. Jessie L. Alley, now employed in the state food commissioner's office, was elected stenographer. The secretary's salary is fixed by law at \$1,800 a year. The members of the board of control, Judge Holcomb, Judge Kennedy and Henry Gerdes, were unanimous in the choice of the appointees.

MADISON PIONEER KILLED WHILE STACKING HAY

MADISON, Neb., June 17.—(Special)—L. G. Bonner, a pioneer settler residing in School-rat precinct, thirteen miles west of Madison, met with an accident while stacking hay last Saturday morning, dying early Sunday morning from the results of injuries sustained. No one exactly knows how the accident happened. He was assisting in taking care of the hay from a stacker and fell to the ground, breaking his shoulder, several ribs and

receiving internal injuries. He leaves a wife and two children. Mr. Bonner's brother-in-law, Judson Fisher, was instantly killed last January near the farm of the deceased by the turning over of the automobile he was driving. The funeral exercises took place this afternoon at 2:30, Rev. Mr. Eggleston preaching the funeral sermon. The deceased was a member of Madison castle of the Royal Highlanders, in which he carried \$2,000 insurance.

Persistent Advertising is the Road to Big Returns.

FRANK GARDINER WILL BE TRIED IN NOVEMBER

YORK, Neb., June 16.—(Special)—The case of the State against Frank Gardiner was called this morning in county court, charging him with committing an assault on Harry Hall, with intent to do great bodily injury. The defendant waived preliminary trial and was bound over to the November term of the district court. Bond was given in the sum of \$50 for his appearance at that time.

REGAL \$950

UNDERSLUNG

The Safest Car on Earth

"Every day you read of cars turning turtle and people getting killed or seriously injured. Until the Regal appeared in the field all underslung cars were high priced cars." People couldn't afford to use them, so they had to take their chances in getting spilled.

NOW IT IS DIFFERENT!

The Regal in underslung construction is sold at a price within the reach of all. No one can afford to take chances riding in any other style of car.

Underslung construction gives riding qualities not possible in overslung cars.

Underslung construction means straight line drive, and consequent big saving of power.

Underslung construction means low center of gravity—freedom from skidding and consequent big saving in tire wear.

Underslung construction means elimination of side sway of body, and consequent comfort to occupants and 25 per cent longer life to the car.
