YORK STOCK MARKE

in Wall Street is Nearly All of a Bearish Trend.

AWAKENING OF INTEREST Most Affention Paid to Closing of Pittsburgh Bank and the Recetvership of Related

NEW YORK, July T.—News in which Wall street was especially interested today was nearly all of a bearish turn and as there was no outside demand to sustain the market, quotations were lowered generally. Resumption of trading after the triple holiday brought no awakening of interest and although the day's developments might have had a little influence on a broad and active market, they formed an available basis for operations of the professional element whose activities accounted for the great part of such business as was done.

Most attention was paid to the closing of a Pitusburgh bank and the receivership of a related concern. It was generally understood that the causes which led up to the suspension of the bank were purely local and that no unfavorable inferences could be drawn regarding the banking position in general. In fact the manner in which banks have built up their reserves in view of the difficulties of the present situation was shown in the reports just made to the comptroller in response to his call.

Resumption of gold exports with the engagement of \$50,000 for Paris was a surprise as it had not been generally expected that further shipments would be made for the present. The new war in the Halkans, however, points to a further strain or at least to an indefinite continuance of the present conditions in the foreign money market. In this same connection the bears found another argument in the showing by the New York banks in their last week's statement issued during the stock market holiday. A large contraction in cash holidings had been expected, however, on account of the heavy July payments and it is probable that as soon as the fundatied up in this way flow hack to their usual channels the condition shown last weck will be rectified.

The gold engagement and complexion of the bank statement were reflected in the firmer tone of the time money market. Call runds also rose above the recent level toward the close.

The heaviness of stocks persisted throughout the session. Declines were mostly fract

Five Cars Come to Members of the

SHEEP-Buyers opened the week with a 10815c advance on lambs and the market was fairly active, once the offerings began to move. It was a good supply for a Monday, being of good quality compared with most days last week and consisting entirely of western stuff. The demand seemed quite broad with the result that most all offerings benefited by the improvement in prices. A four-ear shipment of Oregon lambs weighing around 85 pounds made a top at \$7.80, against \$7.65 toward the close of last week. A hig part of the best holdings moved at figures around \$7.6567.70.

Wethers again predominated in the aged sheep division and there was a very fair apriakling of yearlings. As usual of late ewes were in meager supply. As in the case of lambs the aged offerings were all from the range and as to quality in general they compared very favorably with last week. Values were regarded as steady to strong. While the inquiry was fairly good for anything in the line of mution, the supply on hand was about aufficient to meet trade requirements. A four-car string of 90-pound western wethers thanged hands at \$5.05. There were few if any, sales of yearlings or ewes during the early hours of the forencom.

In all some thirty-seven cars, or 10.800

head, were reported in, being around 1.848 head more than a week ago and fully 8,809 head more than two weeks ago. Comparing the receipts with the same day one year ago, they show an increase of 5,400 head. About a third of the supply was made up of aged offer-

Oregon ewes......

NEW WHEAT ON THE MARKET

Omaha Grain Exchange.

IS OF A VERY HIGH QUALITY Hynes Puts One Car Up for Sale and

it is Engerly Bid For by Those Who Have Previous Orders to Fill.

The Nebraska wheat crop of 1913 bus egun to move toward the Omalia mar-Saturday and four more carloads arrived yesterday. By the grain experts it is pronounced superior to that of last year and easily grades No. 2, hard, weighing out from fifty-sine and one-half

The first car, that arriving Saturday, came from Harvard, bought of the Harvard Co-operative Grain and Live Stock company of that town, and consigned direct to the Nye-Schnelder-Fowler Grain company of this city. Here it went into week. It was bought at 83 cents per bushel and was not offered on the floor of the Omaha Grain exchange.

Of the four cars arriving yesterday morning, three came to the Updike Grain company and one to the Hynes Grain company. With the exception of one ear, brought in by Hynes, everything went into storage, having been bought

Just to give a touch of excitment, market and the bidding was spirited ace who would be the first purchaser. It was finally secured by Chester L. Weeken of the Weekes Grain company, who bid it in at a shade better than 83 cents. It goes to the Minnesota Milling company on a previous order.

will come in at a lively rate, word comthrough the South Platte country and in northern Kansse the harvest has been finished and threahing is in full blast. Parther north threshing will not com-mence before the last of this week and not much of the wheat is expected to reach the market before the last of next

That there is going to be a goo mand for Nebraska wheat is app judging from the hig orders coming from Minneapolis and other large milling luring the last ten days, closely watching the maturing of the wheat and they have now returned to their headquarters, eaving orders to buy freely and pay the

tighest market prices.

Said Chester L. Weekes: "Minneapolis nillers have come to recognize our wheat want it. They mix it with their soft apring wheat and with the mixture pro-duce the highest grades of flour. "The Nebraska No. 2 is a grade of

wheat that is seems impossible to grow anywhere except in Nebraska and north-ern Kansas, and it has become famous the world over. It is even better than the celebrated No. 1 hard spring wheat that North Dakota raised thirty years ago. It makes more flour to the bushel and carries less bran and by-products."

Milk Dealers Say Price Will Go Up if Ordinance Passes

"Pass this milk ordinance if you want to, but it will mean that the price of milk must be increased," said A. P. Groback, secretary of the Milk Dealers' association, to the city commission, which was considering an ordinance drafted by Health Commissioner Connell to increase the butter fat percentage and compel restaurants to open milk bettles

in the presence of patrons.

The percentage of cream is reduced 2 per cent, being 16 per cent instead of 18, as required by the state law. Bosste asked as required by the state law. Bosste asked that the cream test be made in per cent, so that there could be no state interference. Conneil, who had said is per cent was enough, offered no objection, saying 16 per cent was just as amitary as in per cent and he was interested principally in pure milk and not in the price of milk.

L. Cortiss, of the Waterloo creamery, objected to a provision of the ordinance which gives the health department auwhich gives the health department au-thority to inspect "as far as possible" the milk sold by farmers. Corlies said as sure as the health department at-tempted to enforce the regulations the supply would be cut off, because farmers wouldn't stand for it. He wanted two years in which to "educate" them up to the requirements of the city ordinances. After a discussion, the ordinance was laid over for a week, when it will be

Tells How to Have An Animated Face

"Vivacity of manner may be due chiefly to native wit; vivacity of appearance may be largely an acquirement," and a certain clever and enviably popular indy. A little coaxing brought forth some enlightening information.

"Before going out in the evening," she said, "I completely cover my face with a sort of jelly which quickly hurdens, forming a mask. This brings the vitalizing hood to the surface, producing a fresh, pink, youthful glow. The coloring is astural and cannot be taken for an artificial complexion. I keep the mask on an hour before washing it off. There's nothing like this to put real life into the face. Besides the offect on the skin and delicate facial muscles, the increased circulation naturally improves the eyes, too giving them more justre and expression. The whois countenance is illuminated and you know an animated face is always interesting." Then she told me what she used was nothing more than parafled plastoid jelly, which is perfectly harmices and can be found in any drug store. I have profited by he secrat.—Aunt Sally in Woman's Realm—Advertisement.

Williams, colored, for \$25. The police arrested the woman, but as yet no trace of Leade's money has been found.
