

Growth of Power Farming in Nebraska

A PLATTE VALLEY FARMER.

It will be demonstrated at the Power Farming meet held at Fremont, September 8-12, that Nebraska farmers can grow more bushels of grain per acre and at a much less cost per bushel than they are doing today...

operation. This entire work will be done at a cost much less than the single plowing operation on the average Nebraska farm. The machines doing the work in one operation are not limited to the large tractors, but will be accomplished by those pulling four plows, seeding fifteen acres daily as well as those pulling twelve plows seeding forty-five acres.

INSANITY EXHIBIT STARTLES

Not a Third of Douglas County Insane Get Into State Hospital.

ASYLUMS HAVE SPARE ROOM

Figures Compiled to Show Number of Insane Persons in Nebraska and Where They Are Kept.

While the condition of the insane people kept at the Douglas county poor farm is becoming more and more acute, the complaints of over-crowding, neglect and ill-treatment are by no means new.

Following up similar complaints an inquiry was made a few months ago to ascertain the number of insane patients in the state insane hospitals, and to what extent additional inmates could be received from Douglas county.

Nebraska maintains three state insane hospitals—one at Lincoln, one at Hastings and one at Norfolk—Omaha being in the Lincoln district, so that insane patients from this county would properly go there.

The letter sent to the several superintendents made inquiry as to the number of patients, the number from Douglas county, the total capacity, and how many more patients, if any, Douglas county would be entitled to send.

Information was: Norfolk asylum: Number of insane at hospital, 45; number from Douglas county, fifteen; additional capacity, eighteen. During six years, from 1907 to 1912, inclusive, the hospital received 659 patients, of which seven came from Douglas county.

Hastings asylum: Total number of insane inmates, 1,131; number from Douglas county, ninety-two; additional capacity for thirty; during four years, from 1909 to 1912, inclusive, the hospital received 86 patients, of which four came from Douglas county.

Discrepancy in Figures. Lincoln Asylum—Total number of insane inmates, 624; normal capacity for only 500; number of inmates from Douglas county, 162; "Douglas county would be entitled to the admission of any patient considered by the board of insanity as a fit subject for custody. I know of no restriction of any patients applying from any specific county." During the two years 1911 and 1912 sixty-eight insane persons were received from Douglas county.

During four years, 1907 to 1910, inclusive, there were received from Douglas county 239 insane persons. The Lincoln hospital during the six years has also had from Douglas county ninety-eight patients committed under the dispensation act.

Investigation at the same time disclosed that the number of persons adjudged insane by the insanity board for Douglas county was as follows:

Table with 2 columns: Year, Number of Insane. Rows for 1910, 1909, 1908, 1907, 1906, 1905, 1904, 1903, 1902, 1901, 1900, Total for five years, Total for first four months.

Comparison of the figures show that less than a third of the persons adjudged insane from Douglas county are received and cared for at any state insane hospital.

Improvements at the Water Station

Water Commissioner Howell has been authorized by the board of directors of the Metropolitan Water district to proceed with arrangements to construct a submerged road bin at the Minnesota station and to purchase a steam crane for loading and unloading coal cars and for other purposes.

U. P. FINISHES DOUBLE TRACK

Parallel Stretch Across the State is Now Completed.

THIRTEEN YEARS OF WORK

Start Was Made in 1900 and Has Continued Practically Uninterruptedly Since That Time.

Yesterday was a big day in the history of the Union Pacific. It marked the date of the completion of a double track line across the state of Nebraska. Yesterday General Manager Ware received a telegram from the foreman in charge of the double track work between Elmwood and Bushnell, stating that the last rail on gap of eleven miles had been laid, the ballasting finished and the switches set.

Immediately the temporary switches at the terminals of the eleven miles were removed and the second track across the state became a fact. The point where the connection was made is six miles west of Omaha, but the double track extends to Pine Bluff, Wyo., six miles farther west. Trains now are using the double track all the way from Omaha to Pine Bluff.

The approximate cost of the second track, including the grading and bridges, has been \$15,000,000.

The first double track on the Union Pacific main line from Benton to Columbus, seven miles, and from Lockwood to Alda, fourteen miles, was laid and opened for service during 1900. However, as early as 1884 the old line from Omaha to Gilmore was double tracked, but this was abandoned for through service trains when the Lane cut-off was completed.

Double track work has been continuous since 1900, with the exception of a short time during 1902. The line from one side of the state to the other is protected by block signals, installed at a cost of \$1,000,000.

The construction of the second track has required the use of 1,600,000 ties, 47,000 tons of steel rails and 2,500,000 tons of Sherman gravel, this having been used for ballast.

POLICE JUDGE MAY NOT LET OUT PRISONER ONCE IN JAIL

County Attorney Magney has advised the sheriff's office that under the law it is not permissible for the police judge, after he has sentenced an offender to the county jail and the prisoner has been received into custody by the sheriff, to suspend the sentence and have the offender released.

The sheriff's office has notified Police Judge Altstadt that hereafter prisoners when once placed in the jail will not be released if his sentence is suspended.

Buttermilk Be ut fier At less Than a Cent

Besides being so effective in cleansing, whitening and softening the skin, says Mildred St. Alban, beauty editor of Household Guest, "buttermilk offers perhaps the most economical complexion treatment. I do not refer so much to the liquid, in buying that you pay mostly for water. In the concentrated form of this ideal beautifier is quite inexpensive. This is worth knowing, for while many would not mind paying a good price for such splendid results, the saving is a consideration just the same. Each time the presolated buttermilk paste is rubbed into the face the cost is less than a cent. The little quantity I get at my druggist's lasts for months. "I have found, by the way, the longer the paste is left on—whether on face, neck, arms or hands—the more thorough the beautifying action. I always wash the paste off with soap and water."
