for Blood Health

Blood Disorders Gone to Stay, A few doses of that wonderful blood purifier, S. S., will start activities in the cellular tissues of the body and soon show decided changes in the skin. The skin is but a fine network of tiny blood vessels, and the specific action of S. S. S. is declared to be a pronounced stimulation of the activity of these cells. Certain it is that in a surprisingly short time any skin eruption shows a most remarkable change; it begins to dry up; the skin scales off in tiny flecks, and soon a layer of clear, healthy and firm tissue results.

The reason for this is in the peculiar stimulation of S. S. S., which enables the cells in the skin to select from the blood the nutriment it requires for

regeneration.

Tou can obtain S. S. S. at any well stocked drug store, if you insist upon it, but be sure you are not talked into S. S. S. is prepared by the Swift Specific Co., 180 Swift Bldg., Atlanta, Ga. Write for their illustrated book on skin diseases.
