Daily Fashion Hint

By LA RACONTEUSE.

MEMBERS of the Board of Governors are having strenuous times, attending state fairs and carnivals and deciding upon entertainments for Ak-Sar-Ben.

Three of the Board of Governors had rather an unusual and interesting experience; they went to Des Moines to decide upon what "exhibits" at the Iowa State fair would be of interest for the Ak-Sar-Ben carnival.

A unique affair was a luncheon for the visiting governors. One had the pleasure of sitting next to the "fat lady" (570 pounds, if the scales were correct). Another sat next to the "Midget," and the "Tattooed Man" proved as interesting as in the old Nursery rhymes.

Altogether, the social side of the duties of the royal knight is scarcely appreciated or realized by those who simply go to the ball and watch the parades from a slightly window.

Cuts that print

There is often all the difference in the world between a cut that shows up well in the engraver's proof and one that shows up well when it is printed. Cuts made for a newspaper have to be made so that they will give good results under the most adverse conditions. For that reason, a newspaper engraving plant produces cuts that the ordinary printer can use and get good results.

If you have some engraving to be done, send us the work and compare both the results and the prices with that of ordinary engraving plants.
