was popular early in the session to sell the December outright in goodly quanti-ties. The bull longs in corn advanced the opinion last night that shorts and bears in that market have already exhausted their ammunition in attempting to force prices downward and make them stick to lower levels. One of the largest hold-ers in the Chicago corn pit sold a heavy line of that grain during yesterday morn-ing and it was expected that the situa-tion would remain weak and that further price losses would be seen today. While the selling was at fever heat and prices were weakening the buying seemed to hold off except around the bottom prices. With a letup in the selling and the news that Argentina corn is not arriving in this country in merchantable condition and that cattle owners of Canada are the states to feed them on corn, which will require goodly amounts of corn, there condition and prices not only regained the lost ground, but more with it. Cash corn was \$60% higher. Chash corn was \$60% higher. Chash corn was \$60% higher. Clearances were 12,000 bushels of corn, none of oats and wheat and flour equal to 15000 bushels. "Sunday." CATTLE-Cattle receipts were very moderate this morning and for the three days total receipts foot up only 24,118 head as against 30,600 for the same period a year ago. To make another comparison the receipts for the first half of this week are the lowest they have been for any similar period for three weeks. Good beef steers were steady and fairly active at current prices. A very choice banch of yearlings sold at \$9.00, the highest price paid for cattle thus far this year. The common to medium rgades of beeves were a little slow and the tendency on that kind was lower. Cows and helfers, so far as the killers were concerned, were slow to like lower than yesterday. On the other hand the feeder and stocker cows and helfers were a sood many country buyers in. Stocker and feeder sizers closed lower lower. The country demand this week has not been any too brisk and there has been a tendency toward accumulation of dutie in the hands of speculators, which accounts for the weakness noted. Stockers and feeders are greeners. Bookers and feeders are greeners.
