Belgian Blizzard

Stops River's Rise BRUSSELLS, Jan. 12.-The temperature dropped suddenly this morning, converting the torrential rain into a stiff blizzard. Throughout Belgium there has been a heavy snowfall.

The cold weather had a beneficial effect, however, on the flood situation and the waters are now receding rapidly. The danger, temporarily at least, is considered over, although later the melting SILVER-Bar, 57%c; Mexican dollars, snows are likely to cause fresh inundation.

The people are beginning to realize the enormous losses caused by the flood. The subsidence of the Vesdre river has left a deep coating of mud over thousands of houses.
