News from Southwest Says Wheat is NEW YORK GENERAL MARKET Deteriorating.

MARKET IS NOT ENCOURAGING

Cash Grain is Not in Very Good Light-Corn Closes Somewhat Lower, with Lack of Immediate Demand.

OMAHA. Feb. 20, 1914.

As predicted for some time any change in the southwestern wheat promise will be for the worse, and the first messages from that section making claims of deterioration were received here yesterday. These came from northern Texas, western Okiahoma and parts of Kanas and Nebraska and the messages were received here seed of the session near the close. Some of those who sold early changed front and will be seen on the buying side, which caused reactions of \$43%c and while the May was the smallest fraction lower, the July was a little higher. Had the deterioration reports been received earlier in the day and the trade generally earlier in the day and the trade generally cognizant of the contents of messages a different story would doubtless have been related here. Generally speaking the crop outlook in the winter wheat belt is the outlook in the winter wheat was at the low-set of the session near the close. Had the deterioration reports been received earlier in the day and the trade generally cognizant of the contents of messages a different story would doubtless have been related here. Generally speaking the crop outlook in the winter wheat belt is the best over known and for this reason there will be a change and any change will be a help to the bulls. Crop damage and war are two things that will frighten the average speculator out of his wits in case he is short on the market.

The cash situation is anything but encouraging to holders of that grain. Sales yesterday were 55,000 bushels and more than one-half of this was taken by exporters at the seaboard. Omain had an excellent demand for wheat from Chicago, as well as from northwestern and interior millers, and this market claimed to have received numerous inquiries for export One message and the trade generally of the corp.

Liquidation of hog products was popular yesterday and prices closed lower. The hog report of Germany, which showed an increase of 4,000,000 hogs over a year ago, and the weakness in the market at the yards were the leading bear factors. The buying was ted by commission houses, although some of the early sellers bought late in the day.

The Chicago and Omaha markets will be closed Monday. Pebruary 22, to observe Washington's birthday.

DAY'S TRANSACTIONS ARE SMALL

Known Movements of Currency Dur ing Week Indicate Only Small Gain in Cash-Bond Market Quiet.

NEW YORK, Feb. 20.—The only sem-blance of life in the stock market today was derived from the movements of thares, with a small speculative following was derived from the movements of abares, with a small speculative following which ordinarily plays an important part in the dealings. These stocks moved irregularly, reflecting no general tendency. There was a good undertone and the market was not influenced here by foreign account. London disposed of about 10,000 shares on balance. With a week-end sension tomorrow and a holiday on Monday, professional traders do not wish to put out new lines. The day's transactions were the smallest of the year.

Rumely shares gave way sharply, the preferred breaking 5 points. Rock Island common at 5% and the preferred at 9% reached the lowest points at which these issues ever sold. Central Leather developed heaviness following the publication of its annual report, which revealed a decrease of \$1.06,000 in total income.

DUN'S REVIEW OF TRADE

Weather is an Important Factor in Business Situation.

SENTIMENT STILL OPTIMISTIC

Evidences of Improving Conditions Accumulate-Faitures This Week 386 in United States, Against 334 Last Year.

NEW-YORK, Feb. 20 .- Dun's Review morrow will say:

Weather conditions were an important actor in the business situation this week licent storms impeded railroad traffic and retarded the distribution of merchandise, yet certain lines of trade ben-efited by the heavy snowfall and zero-tomperatures. There was a notable in-crease in the movement of footwear and heavyweight apparel, while fuel was in greater demand.

reater demand.

Sentiment in commercial and in industrial channels remains optimistic and evidences of improving conditions accumulate. This is particularly true of wool sales, which continue large at advancing prices. A material reduction has occurred in supplies at all seaboard markets since the opening of the year and in some instances stocks are now scarce. Both cotton and woollen mills are well employed as a rule and prospects are considered satisfactory.

Failures this week numbered 3% in the United States, against 334 last year and 39 in Canada, compared with 27 a year ago.
