TO ENFORCE THE GAME LAWS

U. S. District Attorney is Ordered to Start Prosecutions.

LAW IS BEING VIOLATED

Impression Has Gained Ground that the Government Did Not Intend to Enforce the Bird Protection Statute.

A recent change in the policy of the Department of Justice of the United States, may bring a wholesale prosecution of sportsmen and others who have violated the game laws of Nebraska, according to instructions received by Frank S. Howell, United States District attorney.

The department has announced that all cases in violation of the United States migratory bird law, brought to the attention of the United States attorneys, will be prosecuted wherever there is sufficient evidence to show guilt and actual violation of the law.

Under the statute, any person violating the provisions of this law, or the regulations of the secretary of agriculture made to protect wild birds, is subject to a fine of not more than \$500 or imprisonment not more than ninety days, or both, in the discretion of the court.

It was formerly believed that the burden of collecting evidence in cases of such law violation would be under the direction of the secretary of agriculture, but since that department has no machinery for such work, the enforcement of the law is to rest in the Department of Justice, and cases will be investigated, it is said, and prosecuted by that department.

Rumors of wholesale violations of the law have been current in Nebraska for many months, and numerous cases are to be investigated in accordance with the new order of the Department of Justice.

The several flagrant cases of violation of the law, may be brought to the immediate attention of the United States officials here by prominent Omaha sportsmen, who are anxious to see that the law is strictly observed, and such cases will be prosecuted by the United States attorney.

DUN'S REVIEW OF TRADE

Current Movement of Merchandise Somewhat Below Normal. PARTICULARLY SO IN THE EAST. More Activity in West and South, Where Sentiment Quite Confident. Owing to Promising Agricultural Outlook.

NEW YORK, April 2.—Dun's Review tomorrow will say: Current movement of merchandise continues somewhat below normal, particularly in the east; in the west and south there is more activity and business sentiment is quite confident because of the generally promising agricultural outlook. At a number of interior centers bank clearings exceed those of the two years immediately preceding and at Chicago mercantile collections are somewhat backward which is not unusual at this season and in spite of the attractive rates for money borrowing in light and offering of commercial paper continues restricted. Retrenchment still characterizes the iron and steel trade. Some betterment, however, is still manifest in copper. A staid tone has developed in practically all the dry goods markets. Failures this week, 343 against 271 last year; in Canada forty-five against thirty-two.

BRADSTREET'S TRADE REVIEW

Good Deal of Irregularity in the New York, April 3.—Bradstreet's tomorrow will say: There is a good deal of irregularity in trade reports. While business in many lines make an acceptable comparison with last year, the hub of complaints now heard is found in the tendency to buy in small lots, for immediate uses rather than to make heavy purchases for distant wants.

In the winter wheat growing sections there is more optimism and conservation and, therefore, trade in a collective sense, exhibits improvements. Retrenchment by railroads and settlement in western bituminous fields, invest the labor situation with a less favorable color.

For the week failures, 335 against 227 last year; wheat exports, 2,642,625 bushels against 4,081,478 bushels; bank clearings, \$2,907,000, an increase of 37 per cent.

INTERNAL REVENUE GAINS

This in Spite of a Big Loss from Liquors and Cigars. INCOME TAX HELPS THE TOTAL. No Figures, However, Are Given Out on the Revenue Received from This Source by the Government.

In spite of the fact that the total receipts of the office of collector of internal revenue for the district of Nebraska show an increase for the first three months of the year, over the corresponding period of 1913, there is a decrease in the tax collected from breweries, distilleries and tobacco manufacturers in the state, showing a decrease in the production of beer, liquor and cigars for the first quarter of the current year.

The increase comes chiefly from the income tax, which is being paid, but no definite figures on the income tax are available.

The total receipts of the office for March of 1913 were \$215,500.62, as compared with \$232,017.31 for the corresponding month of this year, or a net increase of \$16,516.69 for the single month of March.

The total receipts of the office for the quarter just ended were \$655,431.34, as compared with \$678,000.15, or a gain of \$22,568.81, in spite of the decrease in the revenue from the manufacture of spirituous liquors and cigars.

Pardoe Thinks He is in the Real Oil Fields of Wyoming

John Pardoe, manager for the David Cole Creamery company, while he is not boasting about it, feels that he is on the same road traveled by all millionaires, and that he is in a fair way to become an oil magnate—however, he has not yet thrown up his position.

A couple of years ago Pardoe secured title to a quarter section of land in Wyoming near Riverton, midway between Shoshoni and Lander. Within the last month two wells have been put down on an adjoining quarter section and in both oil was struck at a depth of less than 1,000 feet. Wells have been put down on other lands in the vicinity, which leads Pardoe to believe that his land is within the proven oil field. This week he has refused an offer of \$25,000 for his property. He is now figuring on leasing to the Standard Oil.

A Function Greatly Assisted By a Well-Known Remedy.

Most readers will be interested to more clearly understand why analysis of urine is so important. In the urine of a healthy man the myriad of fine blood vessels that make up the structure of the kidneys. All the blood from all over the body must pass through the kidneys. They act as testers and assessors. And according to what they allow to pass out in the urine, both as to quantity and materials, the health of the kidneys and the quality of the blood is determined. The catalytic energy forced by S. S. S. is shown in the urine. It is also demonstrated in the skin. And as the blood continues to sweep through the kidneys the dominating nature of S. S. S. acting as it does through all the avenues of elimination, shows a marked decrease of disease manifestations as demonstrated by urine analysis. This assistance is a great relief to the kidneys. The body wastes are more evenly distributed to the excretories; their elimination is stimulated by the tonic action afforded the liver, lungs, skin and kidneys. Thus, in cases of rheumatism, cystitis, chronic sore throat, huskiness of voice, bronchitis, asthma and the myriad of other reflex indications of weak kidney action, first purify your blood with S. S. S., so it will enable the tissues to rebuild the cellular strength and regain the health.
