## The Busy Bees

OW many Busy Bees are going to have gardens this year? That will be ever so much fun, both for the boys and girls. Plot off your ground, hoe it, pick out the weeds and other rubbish and then plant your gardens. The boys generally prefer to take care of vegetables, while the girls are more apt to want flowers. To stimulate interest, it is a good plan to organize neighborhood garden clubs and have the children compete to see who will have the prettlest or most productive garden. Often, too, prizes are offered to encourage this healthful and pleasant occupation.

There will be many days of eager waiting for the first sprout to push its way up out of the ground, but the delight experienced when the plants do become visible is pleasure enough to repay one.

Votes for a new king and queen of the Busy Bees will be received by the editor until Wednesday. The king is to be chosen from the Red side and the queen from the Blue side. The result of the election will be aunounced next Sunday

This week first prize was awarded to Viola Pospeshil of the Blue side and honorable mention to Mollie Corenman of the Red side.

(Honorable Mention.) My Spring Surprise

By Mollie Corenman, 808 South Seventh Street, Omana, Neb. Red Side. One day last week, while I was coming home from school I heard a bird singing I had never heard any bird sing except sparrows and canaries and so this song sounded strange to me.

'I must find the owner of this pretty singing," I said to myseif. It had stopped singing now, but I waited until it began again, so I could find out where it wav, After a few moments' waiting it started again. I listened very closely and looking up I saw a robin on the branch of a tree beside me, I kept my eyes on it, not daring to stir for fear it would fly away.

This is how it looked: It had a very red breast with little black dots all over it. Its head and back were of a reliow blackish color, its wings day and have not missed or been tardy and tail were black with spots of white yet this year. Miss Hilds Parson is my here and there. Cotton.

The cotton belt of the United States is from the western plains to the Appalachian highland and half way beween the Great Lakes and the Gulf of Mexico, The growth of cotton is very interesting. First it is a little blossom full of seeds, then it changes to several colors and at last turns white. Then it is picked and separated from the seeds. But it takes real warm weather and plenty of rainfall to raise cotton. Coton is then used to make rope, cloth. thread and string Now since I have told you all about cotton, I suppose you wish to know the cotton states. They are Texas, Missouri, Florida, Alabama, South Carolina, Georgia and Oklahoma. and a few other states. There are also many important ports which are New Orleans, Galveston, Norfolk, Charleston and Savannah. Cotton is not made into cloth right where it grows, but is shipped farther north.
