Shorts Are Supplied Without Great Effort in Face of Noticeable Undercurrent for the Option.

OMAHA, May 7, 1914.

Before making large commitments on either the bull or bear side of any of the grain markets at the present time, the average speculator is quietly waiting for something to develop that may lead to a change in value, with the possibility of securing a profit out of the market.

Wheat is being bought in the valley of Kansas and, according to advices which have been received from day to day for some time past, the prospects are ideal in the west.

In addition to this, seedling is progressing in the spring wheat country, and it is expected to be entirely finished by next Monday.

CHICAGO, May 7.—Well rounded notions that the government report might turn out more bearish than had recently been looked for, hindered today any decided advance in wheat.

Wheat had a firm tone the greater part of the day. Europeans were buying futures and a word came from New York, Duluth and London, that the export demand was in evidence.

Although corn at first showed some firmness on account of early reports of unsettled conditions in Argentina, the market afterward weakened. Later advices from Argentina showed that the market there was slow, and there were fewer offerings from the country.

STOCKS AND BONDS

Review of Operations on Stock Exchange During the Day.

NEW YORK, May 7.—Although London called a slightly lower range of prices for American stocks, there was no corresponding depression in the home market at the opening today.

At the opening today, the market was small and uneven, with most of the popular shares on a parity or slightly higher than yesterday's closing.

Ohio was again heavy, adding a point to its loss of yesterday. Canadian Pacific was the only other important stock to show more than fractionary Rock Island collaterals continued to advance, selling more than five points above their recent low price.

The market closed easy today. Movements in special stocks swayed the list alternately up and down, with the trend lower in the late dealings.

The publication of the excellent government crop statistics failed to overcome the effect of a 1/4 break in Missouri Pacific and prices declined on increased selling for both accounts.

Number of sales and leading quotations on stocks were as follows:
