Whether you buy a low-grade, unknown brand of Roofing, or a high-grade, responsibly-guaranteed product, the labor cost of laying it is the same. The difference is that you do the job but once when you use

ertain-teed

Quality Cert-ified Roofing Guaran-toed

Certain-teed is the least expensive in the end-and there is so little difference in first cost that you cannot afford to take the risk of buying a roofing that is not guaranteed by a responsible manufacturer.

There is no advance test by which you can determine the amount or quality of service a roofing will give. Such superficial tests as bending, smelling, tearing, etc., do not prove how long a roof will last. "The true proof is on the roof."

Such unreliable tests are used by some manufacturers and jobbers to dispose of their goods. Others take advantage of the public by putting out second or third grade roofings as their first grade goods, or by putting them under old established brands built up on better goods.

But our definite guarantee is your absolute advance knowledge of the service you will get from Certain-teed Roofing. The responsibility of the three biggest roofing mills in the world stands behind that guarantee. It is better than any roofing "test" ever

The amount of Certain-teed Roofing required for an average roof, say ten squares, will cost less than \$5 over the cheap mail order grade. This small additional cost is saved many times in the fifteen years' wear which is covered by the manufacturer's guarantee.

Certain-teed Roofing is sold at a reasonable price everywhere by dealers who believe in giving unsurpassed quality at a fair profit.

A Certain-teed Construction Roof

for buildings of the most perma-nent type appeals to architects, engineers and builders as well

A Certain-teed Construction Roof is a built-up roof and is the mod-ern scientific process of cover-ing whether a gable roof or a flat roof with poor drainage. A Certain-leed Construction Roof does away with the smoky tarpot and as no gravel is used, does not collect dust and the roof in washed clean after every min. It is a sanitary roof. Costs more, but worth more. Applied only by responsible roofers.

COR A FEW DAYS MORE, you can purchase the largest, most useful and most authoritative collection of up-to-date knowledge that has ever been issued in one work, at prices which are out of all proportion to the intrinsic value of its contents, and far less than are charged for ordinary books in the book stores.

Never before has it been possible to buy such a work for so little money.

It is, in fact, such a fine book that 60,000 people who have bought and paid for it keep telling us that it is a fine book, and all that we have said it was.

In many cases they have acknowledged that what they have learned from it was worth more to them than it cost.

printed on India paper. Each volume one inch thick. Every person of intelligence, anyone who is ambitious to get on in the world, every head of a family—all, in fact, who appreciate sound learning and who like to own well printed and handsomely bound books should give heed to this opportunity and investigate it before the present low prices are advanced on May 28th.

The Book That "Corners" All Human Knowledge

The man who owns a set of this wonderful work of all human knowledge—the new Encyclopaedia Britannica— 'the world put into a book''-may be said, in a very real sense, to have a "corner" on the knowledge of mankind, for if every other set of this work were destroyed it would be possible for him to reconstruct the human story from its 30,000 pages and 44,000,000 words of text.
