Furnished

## To Our Customers

When we were planning the building which we have erected at Farnam and Thirteenth streets, we made an exhaustive study of the best printing plants and printing conditions to determine what was necessary to meet the demands that might be put upon us by our customers in the matter of quality and service. Our efforts have been rewarded as we now have one of the most modern, up-to-date and completely equipped printing plants in the world.

Everything has been done to aid the employe in giving the best that is in him. The factory is perfectly lighted, convenient and sanitary. The show room has been arranged with an idea of attractiveness and convenience. In fact every department has been equipped to give the maximum of service at a minimum cost.

For a period of over a quarter of a century the Omaha Printing Company has served its many customers with satisfaction, which explains the reason for its remarkable and substantial growth. Ready to serve with a printing equipment second to none and with the largest stock of stationery and office furniture in the west, we invite the continued patronage of our many friends in the twenty-two states of territory we cover.
