CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Chilcago, June R.—Fear of black rust in the spring crop region gave the wheat buils today a change to raily. As a result, the market which had an upward slant nearly the whole session, closed steady at a gain of his net. Other leading staples, too, all finished higher than lest night—corn up 148714c to 100.

Prospect of a big decrease in the visible supply total Monday had considerable influence toward sustaining the wheat advance. The great export sales shown to have taken place of late were also effective as an aid in offsetting the enlarged movements from the field in the winter belt. Prices on Board of Trade.

inter belt.

It was a drougth scare that put up the ite of corn. Damage reports came from exas, Oklahoma, Kansas, Missouri, Kencky and Tennessee. Hot winds were lig to have prevailed in Oklahoma for ree days with temperatures above 100. Withern Hitnois, Indiana and Ohio were so reported to be suffering injury that reatened to become acute unless afrided quick relief. Oats were bought on count of the strength of other grain. Provisions ranged higher because of orts covering. The incentive was almy the wholesale reversal of feeling regard to cereals. n regard to cereals. Futures closed as follows: article Open | High. Low. | Close Yes'y.

week.

Dry-lot cows and heifers have been standy all the week and active seliers. The same has been true of fed bulls. Strass stock on the other hand has had a downward tendency and is 25c lower than last week.

Ocod to choice weighty feeders have been very scarce, but the feeling on that kind of cattle is steady. The less desirable kinds of feeders together with stockers, stock cows and heifers, and

stockers, stock cows and helfers, and calves are around 80. lower.

Guotations on cattle: Good to choice beef steers, 82.3620.15; fair to good beef steers, 82.3620.15; fair to good beef steers, 82.3620.05; common to fair beef steers, 87.8628.00; good to choice cornfed helfers, 87.8628.00; good to choice cornfed helfers, 87.8628.00; good to choice cornfed helfers, 87.8628.00; fair to good grades, 82.7629 6.76; common to fair grades, 82.5628.71; good to choice stockers and faceters, 82.3628.71; good to choice good faceters, 82.3628.71; good head.

The market today as soon as the trado could get under way was quite active, but with prices a shade lower than the average market yesterday. In other words, the horse today as and constant and the faceters, 82.3628.71; good faceter 90 160 160 160

SHIEDP-There were no fresh receipts today, as is often the case on a Saturday. As might be expected with such an increase in the receipts as was the case the last week, prices continued on a downward trend on most every day. Spring lambs showed a 10gEc decline on

Monday, with a fairly large run here, and on Tuesday another liberal supply led the mand for late packer buyers to be again bearish and steady, consequently reduced prices further by 20520c. A slight letup in the receipts on Wednesday influenced the trade for the better, and as a result apring lambs were strong to a shade higher. Thursday opened rather quiet, with receipts atili of liberal proportions and trade slow to a shade lower, which was followed by a good steady to strong market on Friday

shade lower, which was followed by a good steady to strong market on Friday. Current values on spring larais would average up about 50c lower than a week ago, though the sales on paper do not actually show up the full extent of the decline, which was due to the fact that the close of the present week was not nearly as good as a week ago. Monday was the high time, when spring lambs said at \$9.50.

Trade in aged sheep has not been as large as was expected, though good for this time of the year. The center of in terest was in ewes, as more of them than anything else were on the market. Most all kinds of mutton offerings are 10270c off for the week. Monday being the high time, some range ewes reached \$6.00 and range ewes \$5.00. It might be added that reports from the west indicate a great demand for breeding ewes.

Little of consequence as yet has taken place in the feeder trade, but there were some transactions in feeding lambs around \$5.7505.40, and these prices may be taken as a present quotation until the trade gein on a settled basis.

Nearly all of the range stuff coming east thus far has been stopped at Omaha and the receipts here are expected to increase materially next week.

Quotations on range sheep and lambs: Lambs, good to choice, \$5.0069.50; lambs, fair to good, \$2.4029.00; lambs, feeders. \$5.7506.40; yearlings, fair to good, \$5.5095.75; wethers, good to choice, \$5.75095.75; wethers, good to choice, \$5.75095.70; wethers, fair to good, \$5.2095.60; ewes, good to choice, \$6.75095.75; wethers, good to choice, \$6.75095.50; wethers, fair to good, \$5.2095.60; ewes, good to choice, \$6.75095.75; wethers, good to choice, \$6.75095.50; wethers, fair to good, \$5.2095.60; ewes, good to choice, \$6.75095.75; wethers, good to choice, \$6.75095.50; wethers, \$6.75095.75; ewes, fair to good, \$4.6095.75; ewes, fair to good, \$4.6095.75

change During the Day.

NEW YORK, June 37.—Good fractional gains were quite general in the early dealings on the Stock exchange today and the list bore further evidence of its disposition to break away from the apprehension caused by the Claffin fallure. St. Paul was atroncest of the representative shares and May Department Stores was prominent in the special group with an advance of 1½. Unofficial reports from Washington to the effect that the eastern freight rates declaion, now in the hands of the Interstate Commerce commission, would not be issued today acted, however, as a deterrent on trading, which

mission, would not be issued today acted, however, as a deterrent on trading, which was dull and professional.

The two-hour session on the stock exchange today was barren of developments. Prices inclined steady toward a higher level, and the Claffin failure, with its attendant circumstances, appeared to be forgotten for the time. The market closed firm.

WIRELESS PHONES SUCCESS

Tests Are Made from Fast Moving Train to Station Fifty Miles Away.

While the eastbound Lackswanns Limited of the Delaware, Lackawanna & Western Railroad company was speeding over the fifty-three miles between Scranton and Stroudsburg, Pa., May 1, C. V. Logwood, engineer of the De Forest Engineering company, sat insa little compartment on the train and talked easily with Telephone Engineer Graf of the Lackawanna company, who was sitting in the wireless operator's room in the railroad station at Scranton.

The train did not stop between Scranton and Stroudsburg and its speed was fifty miles or over an hour. When Scranton was ten miles behind it, Mr. Logwood a put the wireless receivers to his ears pushed a little plug here, pulled a little lever there, and began to talk.

"Hello, hello," he said, and in a moment he heard an answering, "Hello, hello, who are you?" "Logwood, on board the Lackawanns

Limited train ten miles east of Scranton, Who are you?" he replied. "Graf, in the Lackawanna station at on," came the answer.

From then until the train pulled into Stroudsburg the two men talked without interruption. This was the first successful trial of

wireless telephoning between a moving train and a fixed station, and everything worked without a single hitch. The De Forset amplifier, an invention of Lee De Forest, was used and made possible \$22,100 amplification of speech 1110 is a de-Currency and bank notes. 9,300,200 102,100 normal. The wireless telephony is a development of wireless telegraphy between Increase. amplification of speech fifty times above which the Lackawanna perfected and put into practical use several months ago. The officials of the railroad company were enthusiastic. William H. Truesdale

"Wireless telephony between a moving more. Further tests will be made to determine the greatest distance over which communication can be carried on by wire less telephone. I can't say how much the though there is no doubt that it will be increased materially, but I believe wiretelephone conversations matter of easy accomplishment. The De Forest amplifier will make this possible.

"The advantages of wireless telephony over wireless telegraphy are easy to see. having a trained telegraph operator on board trains or in stations as any one can talk and hear over a phone. Even if 2,114,579.96 train and a fixed station is not materially increased above the fifty mile radius at-tained yesterday, wireless telephony from moving trains can be put into practical operative and commercial use. With NEW YORK, June 27.—MONEY—Call operative and commercial use. With nominal; no loans. Time loans steady; sixty days, 3% per cent; ninety days, 3 per cent; six months, 3% 30% per cent.

PRIME MERCANTILE PAPER—No of them, which will be in communication

The Lackawanna's first wireless tele phone tests were made several weeks ago, but had to be abandoned April 17 because their message interfered with messages of the Navy department sent to and from the battleships in the Atlantic. The wave length of the transmission aerials never to have seen it before. The like-used by the railroad was changed and in the tests yesterday there was no interference with government or other messages.—New York Times.

days before the sitting. \*\* We compared to be pared the portrait with the photograph; the psychics asked to look at it, claiming strike the same key.

Some people never even express an opinion without sending it collect. It seems quite natural that all the prohibition states should be in the Temperference with government or other messages.

Similar experiences came to Abbott a keener sense of humor to laugh at a dentist.

Method of Springing Spirit Portraits on the Credulous.

MOST BAFFLING OF TRICKS

Investigator Shows How Mediums Work a Simple Process and Dumbfound the Average Speciator.

An interesting exposure of one of the charlatans and fake spiritualists have de-It is the secret of the so-called spirit were spurred by offers of handsome purses if they should succeed.

poser of fakes. For 30 years he practised as a "spirit medium," and in that time learned most of the tricks of the faker. Several years ago he printed a book in

which many of the secrets were revealed. By a rather sardonic turn of circumstances his greatest discovery resulted in pecuniary gain to another. After he had mastered the secret of the "spirit portrait," he gave the result of his inquiries to an Englishman who, he thought, was a fellow investigator. The Englishman promoted a vaudeville adaptation of the mystery and had received royalties run-SHEEP AND LAMBS-Receipts, 500 fore Abbott learned of the use to which a standing offer of a reward of \$500 to his information had been put.

The spirit portrait mystery challenged detection for several years. Two women who advertised themselves as mediums practiced it in Chicago and Kansas City. Hundreds of persons are believed to have been confirmed in their beliefs in spiritualism by it. Countless others, unwilling to believe that the souls of the departed ON THE MAKING OF A LAWN are hovering about the earth, simply confessed they couldn't understand this phe nomenon and let it go at that.

Watching the Mystery. A letter from a Kansas Cityan in 126 first enlisted Abbott's interest in the affair. The letter declared that it was "the gretest mystery in the world," and said vinced, had been painted by spirit artists. woods. The writer said of his own experiences:

"Having met by appointment at the was killed some six years ago in a runaway accident.

"The doctor was requested by the mediums to select two canvases from a dozen or more that were leaning against the wall. This he did from the middle of the pile, holding them up to the light and rubbing his hand over them to determine f there was any coating or film over them. I also examined them very closely and was satisfied there was not. One of the mediums now took the framed canvases and, placing them face to face, stood them upon a small table in front of a window which looked out on one of the city's principal boulevards. The canvases were leaned against the window.

Arranging Light Effects. "One of the mediums stood upon a chair of his dead sister in his hand, being rehis mind. We were seated directly in front of the window, not more than three feet from the canvas, while the me- ute he can call his own. dlums atood at the two sides of the table

from persons of education and intelligence. All of them agreed if there was manly.—Philadelphia Record. any trick back of it they had been unable to get any indication of it by the most acute observation. Abbott went to work on the theory that if the thing could be done as described by purely material agencies, it would be safe to assume that there was nothing supernatural in what the mediums had done.

Nothing Like Obeying Orders.
On an Indian rallway the stationmaster had been sternly instructed to do nothing without instructions from his superintendent. This is why he sent this telegram: "Superintendent's Office, Calcutta: Tigsr on platform eating conductor. Wire instructions."—National Monthly.

SECRETS of the tricks of the fakers, that he hadn't a great deal of time trying to find out whether the pictures could be painted by some spray system. An examination of the building in which the Kansas City demonstration had taken place revealed no traps or opportunities for concealed confederates to help the mediums. He got his correct start when he began wondering why two canvases were used.

He took two pieces of canvas, one of which was blank and the other of which bore a painted picture. He constructed the conditions as detailed in the Kansas City case. The white canvas he put in most baffling mysteries with which front and the painted one behind. They were several inches apart when he first ceived the credulous, often to the great looked. The white canvas was blank. financial profit of the deceiver, has been Then he moved the painted one up a little printed by David P. Abbott, of Chicago, closer. He was startled to see a hazy outline on the white surface. He moved portrait, a secret which has defied many the painted one closer by degrees. As it investigators, even when their efforts advanced, a picture appeared upon the white surface, gradually growing more distinct until at last, when it was in per-Abott has long been known as an ex- | feet focus, the light shining through the picture in the painted canvas made the picture appear as if on the surface of the white one. The eyes actually seemed to open as the focus progressed.

To Abbott the rest of the explanation was simple. He was familiar enough with the ways of experts to know that their skill would enable them to substitute a painted canvas for one of the white ones in such a way that an inexperienced observer, no matter how closely he might look, could never discover it.

So confident is Abbott that he has corning up into the thousands of dollars be- rectly explained the mystery that he has any one who can produce a real spirit portrait under conditions in which he can be certain that he has eliminated all chances to work this trick. He thinks this alone would be worth while to them. Thus far he has had no takers .- New York World

A Job Tackled Joyously Brought Grief and a Bughouse Hunch.

"In the sylvan solitudes," said the wild man of the woods, "the grass grows freely that one man in Kansas City had spent and spontaneously, because nature in-\$10,000 for pictures, which, he was con- tended that grass should grow in the

"People who want grass on their premises should move to the forest fastnesses esidence of the mediums, my doctor There's no use trying to grow grass in friend and myself were ushered into a town. It can't be done in an ordinary studio. The object was to secure a per- lifetime. It is an old saying in England trait in colors of the doctor's sister, who that it takes 300 years to make a good lawn, and you can't expect a man to live 300 years for such a purpose.

"My wife and I were well suited to each other in most respects. When we were first married we lived at a boarding house, and then we were two souls with but a single thought. Before long Amelia, began insisting upon renting a cottage in the suburbs. I knew in my inmost heart that the boarding house life is best, but when a man is newly married he will make any sort of sacrifice for his bride. So, against my better judgment, we bought a cottage on the installment plan and settled down to live happy ever after.

"When we got the place the front yard was full of good upstanding weeds which would have delighted the eye of an artist and pulled the blind to the top of the or nature lover, but my wife, who had canvases, and then each of them drew old fashioned ideas, insisted that weeds a soft curtain from the side of the win- were a disgrace and she said we'd have dow to the frames, thus darkening all of to have a blue grass lawn. So I spent the window except where the light came all my spare time for three weeks spadthrough the canvas; they appeared ing and raking the front yard and during clear and white. My friend held a picture that time I never had a chance to read the newspapers or go to the corner drug quested to fix the expression of her face store to get the returns from the base ball games. When a man once goes

"Finally I sowed the blue grass seed and supposed that the worst was over "After waiting possibly five minutes and I'd have a little leisure. But my wife one of the mediums said. You will ob- said the grass wouldn't grow unless the serve how the canvases are drawing. Bround was kept saturated with water, They are being sixed.' The front canvas so I had to unwind about a thousand feet did seem to be stretching on the frame, of garden hose and attach it to a hydrant making a slight noise, as if a thumb were and sprinkle water every evening, and being drawn along the side of the frame. then wind the hose all up again and put Presently the noise stopped and there it away in the woodshed, and by the time
