To Discard Freckles, Tan, Pimples, Wrinkles

The use of creams on the face sometimes causes hair to grow. You can avoid the risk of acquiring superfluous hair by avoiding commettes and using mercolized wax instead. There is nothing better for any condition of the skin, as the wax actually absorbs the offensive cuticle. The latter is naturally replaced by a clear, smooth healthy complexion, full of life and expression. It's the sensible way to discard a freckled, tanned over-red hotchy or pimpled skin. Get an ounce of mercolized wax at any druggist's and apply nightly like cold cream, erasing in the morning with ecap and water. It takes a week or so to complete the transformation. The ideal wrinkle eradicator is made by dissolving an ounce or powdered saxolite in a haif pint witch hagel. Bathing the face in the solution brings almost instantaneous results.—Advertisement.
