Stomachs Kept **Doctor** Busy

"An old-fashioned doctor, a number of years ago, told us stomachs kept him busy. And he argued that a more conscientious care of the stomach would practically put his profession out of commission."-National Food Journal, June, 1914.

It was a new process of milling that had considerable to do with keeping this old doctor on the jump. This process-which made flour look white and pretty-unfortunately removed nearly all of the really vital mineral elements of the wheat—the in-

valuable phosphate of potash, etc. This kind of milling has now become almost universal. Think what it means to deprive the system of these elements which are necessary for its daily rebuilding ?

Grape-Nuts

made of wheat and barley, contains all the nutriment of the grains, including their mineral elements. Many forms of stomach trouble are due to a lack of these elements in daily food; and a regular ration of Grape-Nuts and cream along with other food is admirable to set one right.

"There's a Reason"
