The Humphrey Light Makes It Easy to Buy -- It's the Best Light

That's just about the whole idea of Modern Merchandis-

People buy where they receive the greatest courtesy, the most consideration for their comfort and convenience, where goods are displayed the best. Value for value, the trade goes to the merchant who makes it easiest for the public to buy.

Now all the bowing and scraping in the world, all the smiling and politeness, all the newspaper advertising and the careful display of goods in windows and upon your shelves and counters and the best bargains in the city will avail you nothing if it's hard to buy in comfort in your stores because you dwell in darkness.

FINISH the job up right. Make it easy for the people to trade with you by giving them a lighting system that will enable them to shop in your store in real comfort and as intelligent people with money to spend, LIKE TO SHOP.

Install the HUMPHREY SYSTEM of INVERTED GAS ARC LAMPS now. It's the only system of store lighting that's ever been devised that really fits the needs of a modern mer-

chant. It's the brightest light but it's the KINDEST light to goods and your customer's eyes as well, and it shows the most delicate shades in their natural colors. And the cost? Less than your present inadequate system costs. It will cut your lighting bills making a material saving within the year. Come in now and ask us about it.
