STORY OF STORMING OF LEMBERG TOLD

Superiority of Russian Artillery Forces Austrian Defenders to Give Way Before Them.

FLEE IN FACE OF BAYONETS

Slave Sent Ahead to Absorb Shock, but Fire of Canr's Men Directed Into Ranks Designed to Force Others to Fight.

PETROGRAD, Sept. 10 .- Via London) The Rech today prints the following detalls of the fall of Lemberg:

The commencement of the fighting, which resulted in the capture of Lemberg. began August 19, when the Russians drove the enemy from Zloczow, forty-five miles east of Lemberg, and moved on to Golaya Gorka-a name which means 'the naked

"We spent the night on Naked hill and the actual storming of the town was begun at 2:30 o'clock in the morning. Then followed a four days' battle. A virtually continuous cannonading continued from dawn to darkness without cessation. Even in the darkness the weary fighters got little sleep. Whenever a single shot was heard the men dashed for their places and the battle boiled again with renewed fury.

"The enemy's counter attacks were de livered with great energy and a dense hall of lead and iron was poured over our ranks. The Russian advance was greatly impeded by the hilly nature of the ground and the great number of extinct craters, which formed splendid natural fortifications for the enemy, which held them doggedly. Out of these, however, the enemy was driven in succession

Suffer from Thirst.

"We suffered much from thirst, for The days were oppressively hot and the nights bitterly cold.

"Both sides fought with great obstinacy, but the nearer we approached Lemberg, the harder the struggle bewe were superior in artillery.

"At length the enemy was driven from papers. all sides beneath the protection of the Lemberg forts. Our troops were very weary, but in high spirits. For two days hagen dispatch estimating the Germans the fight raged around the forts, but we have lost more than 100,000 killed already, were always confident of the prowess of says: our artillery. The big guns of both sides rained a terrific hail down on the armles,

which suffered terrific losses. "At last we noticed that the resistance of the forts was growing weaker. A charge at double quick was ordered and casualties. These depots so far have only we carried the first line of works. It been drawn on for 2 per cent of their efof the enemy's guns had been destroyed. Not enough of them had been left to enemy was undiscouraged and tried to dead. make up with rifle fire what he lacked in artillery.

Enemy Brenks and Flees.

"Between the first and second lines our losses were heavier than before, but under bayonet charges the enemy broke and fled in panic. "Our troops entered the town at the

SPECIAL TRAINS IN CANADA CARRYING TROOPS TO COAST WORK IN BELGIUM

WEBSTER CITY, In. Sept 10 -(Speal.)-A Webster City man, writing from Medicine Hat, Canada, says that the great European war has hit business in-Canada almost as hard a blow as has been dealt England. Owing to the fact that this letter divulges information that has not been permitted to come out

the writer is withheld. The letter says in part: "The war has

certainly killed this country. All in- couver to Montreal and thence to Engloufing, for there is no work.

"It is going to be difficult for many to live here through the coming winter. Rusiness of every nature except the flour ing mills is at a standstill

"This country belongs to England and through press dispatches, the name of England has called for moncy, men and October 1 to November 15, to give the provisions. Forty thousand Australians patironds more time to adjust their tarare passing through Carada from Van- ifts.

univies are closed and all building has land, this route being safer for the stopped. The government is straining suddless I understand 50,000 soldiers very nerve to raise moves for England from India will come the same way. Four to carry on the war. Men are leaving and five special trains are running dally every day and those who remain are through here, bound for the Atlantic coast with troops for England."

Railroads Given More Time. WASHINGTON, Sept. 10.-The effective date of the Interstate Commerce commisslor's orders in the intermountain rate case was again postponed today from

Copyright, 1914, by 1 ress Publishing Co.1 OIL STOCK FOR SALE

In established company-to drill important test wells that can casily force an advance in value of twenty times. Only small allotment offered. Do not delay, but take a chance with from \$30.00 to \$3,500.00 and become a loyal stockholder in our independent army now over twelve thousand (12,000) strong, that will in time build up the only great competitor of the oil trust in the United States.

Oil Letter No. 1. To the Investing Public of the United States:

It is a conceded fact that the producing and refining Dusting will make more money in panic times than other industry because oil is cash. Our company can any other industry because oil is cash. Our company con invest new ii tol where it can easily increase twenty times. The company now has three refineries. Our two I undered and fifty miles of pipe line. Over stary distributing stations. One hundred and ten oil and gas wells. About twenty thousand acres of oil and gas leases and tank cars and tank wagens and oil trade catable stephal will furnish market for four thousand barrels per day and can be quickly increased to ten thousand butlets per day. Combined properties and good will and trade name valued by company at about four million (\$4,000,000) dollars.

This does not include a lease honorably secured from the Daage Indian Council for four hundred and thirty-six thousand (\$4,000,000) acres, which the stockholders have thus far been cheated out of by the "invisible government influence" of our cunning competitor. A bill is now pending in Congress to validate this great lease—which is admitted to be the richest plum in the entire oil world.

A UNITED STATES SUPREME COURT EXEMPTED PIPE LINE.

The Uncle Sam Oil Company has fought its way through persecution to prosperity after an eight-year battle with the Oil Trust invisible government and has just won one of the greatest victories ever recorded by decisions in the Supreme Court of the United States a few weeks ago—when the pipe lines of our rich competitor were decreed by the highest and most powerful court in the land as common carriers—while the pipe lines of the Uncle Sam Oil Company were exempted so that we can pump our own crude oil from our own wells to our own refineries without molestation by Oil Trust officials striking at us through government commissions. I am not going into details, but as the promoter and now president of the Uncle Sam Oil Company I have become intimately acquainted with the oil and gas fields of Kansas and Oklahoma.

The Oil Trust has resorted to the old tricks in this field. It run up the price of crude as a bait to get Americans to come in and organize small companies and prospect and pioneer all over Kansas and Oklahoma. Now when the trust desires to buy up the best producing properties or get the flush production at a song, the trust is taking advantage of the depressed business conditions in the United States and the foreign war conditions to practically steal millions of barrels of crude oil and grab the cream of the producing properties.

Our company is the only big company in a position now where with a little new capital to take advantage of this situation can become a big power and make big money. As the managing officer since the organisation of the Uncle Sam Oil Company I have always opposed attempting to raise new capital only from the independent public. It is an easy matter for the trust to annoy any big bank or trust company that would look with favor on financing an independent refinery.

The Uncle Sam Oil Company is controlled by a Board of Directors of twenty-one (21) large stockholders. One of these directors is from New York, one from Ohio, one from Indian, one from Petnsylvania, one from Ohio, on

of stock which should be accepted during the next week or ten days.

As president of this company I made a three days' trip through the oil fields last month and after a conference with our leading scouts in Osage. Pawnee, Creek and Tulsa Counties the company has selected three important locations where test wells will be quickly drilled as soon as a part of this allotment is placed. One of these locations will be in Creek County in the middle of one block of Uncle Sam leases of about four thousand

(4,000) acres. There is a sub-anticlinal through the center of this block of leases. A great gusher at this location would be no surprise. You may wonder why the stock is offered at so low a price. The truth is that over three-fourths of our stock has been issued to the present stockholders at practically a stock dividend, and the loyal stockholders in this company own this stock on a basis a little less than the price quoted herein to you. We have casing and derricks now on hand for two deep wells. At a construction cost of about fifteen thousand (\$15,000) dollars The Uncle Sam Oil Company can drill three deep test wells. One of these wells will be in Pawnee County. Where a 500 to 1,500-barrel well on the start would be no surprise. The other two will be lift Creek County. The oil in these deep wells is high grade and very valuable for gasoline, and we already have a market where we can sell all we can produce. The Uncle Sam Oil Company needs about twenty-five thousand (\$25,000) dellars to extend its pipe lines to these new field and about that much more to acquire some adjoining leases and drill several test wells thereon.

STOCK GAN EASILY ADVANCE 20 TIMES.

STOCK CAN EASILY ADVANCE 90 TIMES.

STOCK CAN EASILY ADVANCE 20 TIMES.

To the northwest of our big block of leases in Creek County is the famous Cushing oil field, which is now producing over one hundred and fifty thousand (150,000) barrels per day from the same Hartlenville saind that has been located on the east and south of our leases. Some of these Cushing wells have started as high as four thousand (4,000) barrels per day. We might open just such a well on our leases, which are in the same county. Three remittances of \$2,500,00 each will at once force the drill to work at this important location in Creek County and also in Pawnee County.

When you join the Uncle Sam Oil Company you join an army of red-blooded Americans that bow their knee only to their God—and do not believe that the Oil Trust is especially entrusted to grab all the oil and all the gas in the Middle West and then be permitted to rob the poor and everybody else by extortionate prices on life necessities. Our company is fighting to force the validation of our Osage lease of 430,600 acres, with a provision in the lease to authorize the Utility Commissions of the various states where the oil and gas from these government Indian leases is sold to fix the price charged the people. Such government restrictions are practical and right, and we insist, that it be in our leases and also be inserted in the rest of the three million (3,000,000) acres of government Indian lands that are under the direct control of the Washington government and can be so leased if Congress will vote for the real rights of all the people against the greedy grabbers that seek to rob the public by secretly accounting government and can be so leased if Congress will vote for the real rights of all the people against the greedy grabbers that seek to rob the public by secretly accounting government franchises, which big newsprper? are blackmalled into ignoring or lose their high priced Oil Trust ads.

As the promoter and now president of The Uncle Sam

greedy grabbors that seek to rob the public by secretly, acquiring government franchises, which hig newsprorare blackmalled into ignoring or lose their high priced Oil Trust ads.

As the promoter and now president of The Unels Sam Oil Company I can in good conscience advise any honest investor to secure this stock, for I know what others have paid. I know what it is worth. I know the book value now on a reasonable basis is about four times this offer to you. One big well developing a new, rich pool would bring the company sufficient funds to go ahead on a big basis. Other companies have struck it rich and so will the Uncle Sam Oil Company. One or two big wells would give the Uncle Sam Oil Company an income from oil when manufactured and sold through our refineries of from \$3.000 to \$4,000 per day, while half that amount would soon drill additional wells and complete our main trunk pipe line to Kansas City. Kansas, where our company has a fifteenacre refining site with a refining and grease plant that can soon be put in operation at a combined and profitable capacity of from 4,000 to 6,000 harrels per day after the main, pipe line is completed. As a practical oil and refinery mad, in the business since the first wells were drilled in Kansas over ten years ago. I know what I am talking about in this amouncement, and I know that with sufficient capital the big fight of the Uncle Sam Oil Company can be won all along the line—and the company made a blessing to the stockholders, the Indian tribes and the general public as it was from the start intended to be.

I have seen many small concerns organized and crushed out, but The Uncle Sam Oil Company is too big and tou much of a public benefactor to be checked. There are enough real red-bloaded American investors that will join with our twelve thousand stockholders and in time make The Uncle Sam Oil Company the controlling power for right in the Middle West oil and gas fields. The stock is non-assessable and there is a provision in each certificate that bars the transfe non-assessable and there is a provision in each certificate that bars the transfer to an oil trust crock. Only responsible and patriotic investors are wanted as stocky holders. If you wish to join with us to help extend our pipe lines and drill these important test wells, make your check or draft payable to The Uncle Sam Oil Company and forward same attached to the following price list with "X" opposite the amount of stock you desire. Weekly reports of field operations will be sont you as quick as you become a stockholder. You can secure the stock by remitting at once, subject to advance without notice, on the following basis:
