This is an external application designed to so lubricate the muscles and to thus so relieve the pressure reacting on the nerves, that the natural strain upon the cords and ligaments is not accompanied by those severe pains said to cause nausea, morning sickness and many local distresses. This splendid embrocation is known to a multi-lude of mothers.

Many people believe that those remedies which have shood the test of time, that have been put to every trial under the varying conditions of age, weight, general health, etc., may be safely relied upon. And judging by the fact that "Mother's Priend" has been in continual use since our grandmother's earlier years and is known throughout the United States it may be easily inferred that it is something that women talk about and gladly recommend to prospective mothers.

"Mother's Friend" is prepared only in our own laboratory and is sold by druggists everywhere. Ask for a bottle to-day and write for a special book for expectant mothers. Teoso is about twenty miles southeast of Huszt, on the railroad and Kricsfalva is about the same distance east of Husst. Marmaros county is in the extreme east of Hungary, between Galicia and Transylvania.

Chelera Breaks Out at Tarnow. A dispatch from Rome to the Exchange Telegraph company says: 'A message from Vienna announces the

audden outbreak of Asiatic cholera in a most violent form at Tarnow, in Galicia. Forty cases, the message says, were reported on Tuesday."

Tarnow on the Danujec river, is a town of about 35,000 inhabitants. It is 125 miles west of Lemberg and on the line which the Austrians and Russians are taking or their way to Cracow. Fighting between the Austrians and Russians near Tarnow has been reported several times.

They are frequently forced by the Germans, and as often are repulsed by the ailles. They are telling on the stamina of the troops on each side, many of whom a'ready are worn out on the firing line in the

seemingly unending struggle. The French people, who throughout have shown calm, are patiently awaiting decision. The changing actions at various points along the battle line, as indicated by the war office statement. furnish opportunity for diversified comment as to their eignificance.

Germana Taking Great Risk. Lieutenant Colonel Rousset, the military critic of La Liberte, sees in the latest maneuvers of the Germans an element of daring. A large spreading movement on the flank of an adversary, he says, can have the inconvenience, generally grave, of enlarging the space which exists between the moving troops and those in front. This must necessarily have a reasonable limit under the risk of transforming the plan into a detached operation, which would be very perilous for those executing it,

The question is, what kind of sparks does your brain generate?

The brain, like a battery, must be supplied with certain elements to generate thought properly. These brain elements are water, albumen and phosphate of potash. If any of these are lacking in the daily food, brain and body energy are vitally lessened.

Are any lacking? Listen! Water and albumen are plentifully supplied in ordinary food, but phosphate of potash-together with other mineral elements-is almost wholly lacking in white
