Some stocks not recently quoted were traded in teday and in the main prices were above last week's high level. In the bond di-vision the chief feature was the Rock Island group, which was increasingly active at further advances, the collateral refunding and debenture lasues of this property now being at marked advances over the midyear. Their persistent rise gave color to the report, as yet uncon-firmed, that a satisfactory reorganistion. Bouthern Pacific convertibles also con-tributed largest alnoc the resumption of bond sales. Time money continued to work easier, while call money touched the new low rate of 3 per cent. Marks sgain furnished the only feature of the foreign exchance market, their greater firmness strength-ening the belief that Germany was con-tinuing its selling of our securities in this market.
