THE PERFECT FUEL

Is 90% pure Carbon! Carbon is the basis of all heat values. A fuel shown by test to average 90% heat and equally efficient with the best Anthracite—a fuel that is also clean, smokeless, free from clinkers, with but a trifle of ash may conservatively be called "The Perfect Fuel."

Vulcan possesses all these good qualities and more. It is made in regular hard coal sizes. May be burned wherever hard coal can and does not burn out fire-pots or grates.

MRS. FELS TALKS OF THE SINGLE TAX

Says the Movement is Gathering Momentum Every Day, for the Principle is Right.

ALSO BELIEVES IN SUFFRAGE

But Tells the Women She Does Not Care Anything About Suffrage Unless This Fundamental Reform is Taken Up.

"Single tax is gathering momentum every day and will eventually come as the fundamental reform," said Mrs. Joseph Fels, widow of the late millionaire of Philadelphia and London, Joseph Fels, soap manufacturer, reformer and philanthropist. "How do I know it is coming? Simply by the way it is spreading and the way it is taking hold of the best equipped minds of the world today. The principle is right. It is God's plan and it must triumph."

"Suffrage? Yes, I give some attention to suffrage. I have spoken for women suffrage and I believe it is a political principle, but I have told the women frankly that I don't care anything about their getting suffrage unless they are going to take hold of this fundamental reform of single tax. That must come before all other reform. I tell the women that if they are going to keep on giving their attention to mere patchwork reform, I have no interest in their suffrage movement. We must restore the land to the use of the people for whom it was created."

"It is hideous to think that anyone should be hungry this time of the year. You may have a number of men without food or shelter on the streets here. Well, that's hideous to think that anyone should have to want for those bare necessities, where there is so much in the world."

"My plan for immediate relief of those people? Why, of course, if they have no food and shelter, you must feed them and take care of them. That is the immediate thing to do. There are no two ways about that."

"But you say there are in the aggregate, thousands of acres of vacant lots in the city growing up in weeds every year. Is it not wrong to think that someone is holding that valuable and fertile ground out of use in your city, when there is labor here that would like to cultivate it."

"How would I put the system of taxation of land values into effect? I would do it all at once. I would not go half way. In Houston, Tex., they have gone part way, but they still leave 25 per cent of the land value untaxed. That leaves 25 per cent to speculate upon, and there should be no chance for speculation on land."

Touching on the change that has come over Houston since Pastoriza, as tax commissioner, has put into operation his plan of land value taxation, Mrs. Fels said: "We went from Louisiana to Texas, and coming into Houston it was just like coming from sleep to life. There was activity everywhere. Business is stimulated. Building was going on everywhere. Streets were being repaved, and activity was everywhere."

Mrs. Fels is traveling with Mr. and Mrs. Daniel Kiefer of Cincinnati. Mrs. Fels is lecturing on the world movement for single tax, and Mr. Kiefer is taking care of the single tax propaganda, meeting single taxers wherever he goes, in his work as chairman of Fels Fund commission, the commission which acts as trustee for the fund founded by Joseph Fels to further the single tax movement in this country.

MRS. JOSEPH FELS.

May Cut Ice in a Week if Present Cold Continues

In the event that the present cold weather continues it will be just about a week before the cutting of ice to go into storage for next summer will begin. Up to this morning ice on Carter lake, the reservoirs and other bodies of still water had attained a thickness of five and one-half inches. It froze down an even inch since yesterday morning.

However, as the ice grows thicker it does not freeze so rapidly, and for this reason heads of ice companies assert that it will be at least another full week before ice-cutting can begin, even if around zero weather should maintain.

Last winter ten and even eight-inch ice was cut, but this was due to the fact that cold weather did not set in until long in February. To secure anything like a normal supply such ice as could be cut had to be cut. It is the desire of the ice company heads to get at least twelve-inch ice, and consequently it is necessary to wait on the whims of the weather before putting men at work on the fields.

No Funds to Rebind Books of Library, So They Are Stored

With no funds available to cover the expense of rebinding 3,500 books in the public library, Miss Edith Tobitt and the library board have stored away the volumes and will wait till some time in the future to put them into condition for further circulation. Miss Tobitt says: "We have 2,500 book borrowers, many of whom complain that they cannot secure certain volumes they want, because, although the library owns them, the books are so badly in need of repairs that they cannot be circulated any more until re-bound. Each day the pile of 3,500 books awaiting attention at the bindery is increased by more volumes, for books are worn out faster than runs can be spared for repairs."

At the same time, requests for more new titles and for more library deposit stations in new parts of the city continue to come in. We are forced to deny all such requests, because of lack of funds. Central Park, Fortieth and Farnam, the Nebraska Medical college and numerous business houses and factories have recently requested the library to establish branches or deposit stations with them, for the convenience of residents or employees."

A bill will be introduced in the legislature this winter to one of the Douglas county legislators to amend the Omaha charter, so that the city commission may appropriate more than \$30,000 now annually allowed for library purposes.

Nebraska Woman Sees Mexican Battle in Her Back Yard

In a letter to her father, C. L. Chaffee, Norfolk, Neb., Mrs. George Babcock of Mexico City writes that she had the unusual opportunity a couple of weeks ago to witness a battle in her back yard. The writer declares that the fatalities and wounded after the shooting were pitiable sights.

At that time the Zapatistas were in control of the Mexican capital and the fight was between them and the opposing forces.

1618 FARNAM STREET

FREE TO THE RUPTURED

5,000 RUPTURED SUFFERERS TO GET FREE TRIAL PLAPAO

No Need to Go Through Life Wearing a Useless Truss or Submit to a Dangerous Operation.

This generous offer is made by the inventor of a wonderful "all-day-and-night" working method which is to be used to tone up and strengthen the relaxed muscles, thereafter doing away with painful trusses altogether, and the necessity for dangerous cutting operations.

NOTHING TO PAY

To the first 5,000 sufferers who write—Mr. Stuart will send a sufficient quantity of the Plapao WITHOUT CHARGE to enable you to give it a thorough test. You pay nothing for this trial of Plapao, now, or ever.

Full directions accompany each package, and the applicant is also sent a copy of a valuable 48-page illustrated book containing full information regarding the method which was awarded a Diploma with Gold Medal at Rome, and a Diploma with Grand Prix at Arc. Mr. Stuart's book on rupture is a remarkable one, and explains what Rupture is and why trusses and similar MEKE MECHANICAL supports cannot be relied upon.

Every sufferer should read this book, which we believe to be the most thorough and practical useful work ever published on this painful, weakening, and often fatal disorder.

USED TO RESTORE TONE, ELASTICITY AND STRENGTH TO THE MUSCLES.

Here is great, good news for Rupture sufferers: "Perhaps you have almost given up hope of ever getting help."

"Yet, 'Rupture can be treated with success,'" says Mr. Stuart, "when the method of treatment is scientific and in accordance with good common sense."

MUSCLE-CRUTCHES USELESS

To successfully and permanently relieve this condition the treatment must restore the lost elasticity, tone and contractile strength to the weakened muscles. This a truss can not be expected to do. On the contrary the harmful pressure it exerts still further reduces the strength of the muscular tissues because it tends to retard the circulation of the blood.

STOP USING A TRUSS

Yes, stop it, you know by your own experience it is only a makeshift, a false propped-up collapsing wall, and that it is retarding your health. Why, then, continue to wear it? Here is a better way, which you can now prove for yourself, free of charge.

USED FOR A DOUBLE PURPOSE

First: The primary and most important object of the PLAPAO-PAD is to keep constantly applied to the relaxed muscles, the medication called Plapao, which is contractive in nature, and taken together with the laxative in the medicated mass is intended to retard the circulation of the blood.

Second: Being made self adhesive, purposely to prevent the pad from slipping, they have therefore proven to be an important adjunct in retaining rupture that cannot be held by the truss. Hundreds of people, old and young, have gone before an officer qualified to acknowledge oaths, and SWORD that the PLAPAO-PAD cured their rupture—some of them most aggravated cases—of long standing.

A striking feature of the Plapao-Pad Treatment is the comparatively short time it takes to get results. This is because the action is CONTINUOUS—night and day, throughout the whole of the 24 hours.

There is no inconvenience, no discomfort, no pain. Yet minute after minute—while you are going about your daily duties—even while you are sleeping—this wonderful remedy is invisibly tending the abdominal muscles with the new life and strength they require to perform their rightful function of keeping the bowels in place without the artificial support of a truss or device of any kind.

increase the circulation of the blood, thus revivifying the muscles and restoring them to their normal strength and elasticity. Then, and NOT UNTIL THEN, can you expect the rupture to disappear.

"It is the properly shaped Pad, to be applied in such a way that it blocks up the hernial orifice, and tends to prevent the contents of the abdomen from protruding. Within the Pad is a reservoir. In this reservoir there is placed a wonderful absorbent—straw matting. As soon as the matting is saturated by the heat of the body it becomes swollen and escapes through the small opening marked 'A' and is absorbed through the pores of the skin to strengthen the ruptured structures and weakened muscles."

"It is the long and the PLAPAO-PAD which is to be plastered over the lipsoom—a part of the frame-work of the body, assisting in the necessary elasticity, and support to the PLAPAO-PAD."

BRINGS ABOUT THESE BENEFITS

The results if successful in following this treatment, you can now prove for yourself free of charge are wonderful.

—The ruptured parts are sustained and held together.

—The weak muscles recover their elasticity and strength.

—The unsightly, painful and dangerous protrusion disappears.

—That horrible "dragging down" sensation is banished, never to return.

—You recover your "drooping vitality," energy, and strength you have lost.

—You look better, you feel better, and you are better in every way. Overcome your depression, your improved appearance, and relieved from the pain in the back of the rupture, and your dread of its consequences, your spirit rises, your health improves, you once more are able to enjoy life without fear of rupture.

MAKE THE TEST FREE

Make a personal test of its value. SEND NO MONEY for the Free Trial Plapao, come your way, you will receive it. Write a postcard to the coupon today, and by return mail you will receive the Free Trial Plapao, with a presentation copy of Mr. Stuart's book on Rupture, which should be in the hands of every sufferer from this condition.

Crop Report Says Winter Wheat in Good Condition

The government crop report showing winter wheat in excellent condition and another report indicating an increase of about 4,000,000 bushels of wheat and an increase of about the same of corn in the visible supply sold the grain market off. Wheat was one-half to a cent lower, and corn one-fourth to one-half cent lower.

Omaha prices on wheat were from \$1.06 to \$1.11, 49 to 49 1/2 cents, and rye, \$1.01 to \$1.02. Receipts were: Wheat, 51 cars; corn, 30 cars, and oats, 14 cars. For the first time in weeks there was no durum wheat on sale. Offerings for it, however, were around \$1.25, the highest ever known.

BORROWERS TO SHARE ON THE INSURANCE PREMIUMS

The building and loan companies of the city are all adopting the plan of insuring the risks of borrowers and letting them share in the profits arising from the commissions on the premiums that usually go to agents.

On residence risks the agents receive 30 to 35 per cent of the commission on all premiums paid in. Under the plan adopted by the building and loan companies, they secure the agencies of fire insurance companies and pay the policies, the 30 to 35 per cent being figured into the dividends and semi-annually divided among the borrowing stockholders.

Pat Desmond, an aged and well known character around South Omaha, was found nearly frozen in the street at Thirty-third and Q streets. Physicians were called and he was at once removed to the South Omaha hospital. He is badly frostbitten, and his limbs were almost frozen stiff. It is believed that on account of his advanced years he cannot live. He has for years been employed in the packing houses in South Omaha.
