**OMAHAN INVENTS**  
**EMERGENCY TIRE**

B. R. Bonney Applies for Patent Right to Build Wooden Spares for Emergency Use.

TO BE PUT ON MARKET MARCH 1

Will Be Made-in-Omaha Product and Mr. Bonney is Already Receiving Advance Orders and Signing Up Agencies.

D. R. Bonney, 135 North Twenty-ninth street, has invented a new automobile appliance which bids well to be a revelation in the comfort and convenience of automobile driving, especially cross-country touring. Mr. Bonney has invented an emergency tire, which he calls "Get-U-Home," and it is said to be the most satisfactory of all emergency tires.

**Fits on Wheel Rim.**  
 The tire is composed essentially of light but tough wood, with a metal outer tread and rubber bumpers on the under side. It is to be used when punctures, rips, blowouts and the like render a tire absolutely useless for further travel. The wooden tire, which is constructed in all sizes, can be instantly applied to any kind of rim, clincher, quick detachable or quick detachable demountable, and the car can proceed to the closest service station quite safely.

The tire is applied to the wheel rim by the application of one stationary bolt and cannot creep on the rim. No attention is necessary, as it can be put on or taken off in one minute.

**Bumpers, Eliminate Jolts.**  
 It is built exactly like a rubber casing, of the same shape and appearance. It is built of one-piece wood and on the outside is an inner layer of rubber, so that the jolts and bumps are eliminated, which gives it tread and which will hold as well in mud or sand as on slippery pavements.

It is divided into three sections. It is locked together at two connections, and the third connection has a 1/2-inch steel draw bolt. Under the wood tire rubber bumpers are placed around the wheel rim, so that the jolts and bumps are eliminated.

Speaking of his invention, Mr. Bonney declares: "The Get-U-Home should become a most popular emergency tire. It is guaranteed, the expense is light—\$7.50 to \$17.50—it stands any kind of wear, the wood will not crack and is even rock-proof. It can be carried conveniently and is a great comfort."

"It will save carrying castings or inflated spares that are crystallizing at every jar of the car, that are deteriorating while not in use. Rubber must be kept in action or it dies."

**Last Many Years.**  
 "These wooden tires will last the lifetime of a car and perhaps two or three cars. They can be applied anywhere at any time without difficulty, even much more easily than a tire can be applied."

Mr. Bonney has made some of the tires and has thoroughly tested them out. With Fred Jensen and Alle Anderson, both of this city, he will start the manufacture of these tires in Omaha so that he can introduce them to the market by March 1. Already he has received several orders for delivery when he starts to manufacture, and he is busily signing up agents all over the country.

The present site of the concern is at 1225-27-29 North Twenty-second street.

**Thomas Burt, 'Father of House of Commons,' Retires from Work**

(Correspondence of The Associated Press.) LONDON, Dec. 18.—Thomas Burt, S. M. P., who rose from pit boy to privy councillor and is now known as the "father of the House of Commons," has decided to leave politics because of his advanced age and infirmities. He is 77 years old. The son of a miner, Burt attended school until 16 years old, when he got a job in the Hazelwell colliery, Durham, at a wage of 10 pence, or 20 cents a day. He had a passion for study and spent spare time over such books and papers as he was able to obtain.

Burt continued mining until 23 years old, walking to and from work to his home at Newcastle, eight miles distant. He then became an official of the Northumberland Miners' union.

In 1841 Burt was elected to Parliament as a member of the liberal party and has remained a liberal ever since, refusing to leave for the labor party. His practical common sense, sturdy independence, modesty and good humor won him friends all over the world. He joined the ministry as under secretary for the home office in 1886 and was made privy councillor in 1901.

Earl Gray in a recent address described Burt as the finest gentleman he knew, and Sir Edward Grey at a political dinner said: "No previous father of the House of Commons has ever been more loved and respected."

**British Labor Party Watching Contracts Made During the War**

(Correspondence of The Associated Press.) LONDON, Dec. 18.—Though the British laboring man has, generally speaking, rallied to the support of the government in the present crisis, the trade unions are keeping a close watch on the many reports of abuses under war contracts. Through the workers' national committee there has been appointed a subcommittee representing various sections of the labor party, whose duty it shall be to investigate and summarize charges, presenting those that seem well founded to the government departments responsible for contracts.

The inquiry will cover the quality of food, cloth and other articles supplied to the army and navy; prices and profit; labor conditions in factories, especially in factories where subcontracting is done. The labor party is greatly concerned just now with the evils attending subcontracting. It is alleged that some war contracts are handed down from subcontractor to subcontractor until the actual makers are five or six times removed from the original receiver of the order. By this method, it is charged, four or five middlemen's profits are paid by the nation; the worker is cheated and the nation robbed by inferior material.
