Buyers ruled the whole of the preceding session was overcome. The violent set-back had apparently accomplished a dras-tic clearing out of weak holdings, and had given fresh stimulus to export and milling domand. Sentiment favoring the built side was also encouraged by the fact that Liverpool quotations failed to reflect fully yesterday's decline here. There were besides continuing reductions in the estimates of the Argentine export-able surplus.

in the estimates of the Argentine experi-able surplus. Traders' opinions regarding the Darda-nelies situation, leaned to the view that as far as the wheat market was concerned results need not be expected, soon. It was in accord with this theory that nearly the highest prices of the day were in force at the windup. Shipping and export sales amounting to about \$60,000 bushels, put the corn mar-ket on the upgrade. Most of the time, slioris were in a scramble to cover. Rain and snow in the southwest formed a han-dicap on the bears. Scales to for-eigners, however, were not reported. In provisions, the feature was a raily from early weakness. Grain strength

HOGS-Receipts were the heavlest for a Saturday in weeks, and with prices somewhat easier at other points the early prospects for the local trade were not very good. Under the influence of a good killing demand, however, packers' first offers were only a pinch easier, and it was hardly any time before some hogs were moving at steady figures. Even Coffee Market. NEW YORK, Feb. 27.-COFFEE-The market for coffee futures was steadler today on covering and a little trade buy-ing, which seemed to be encouraged by the advance of 5-33d in the rate of Rio exchange on London, and somewhat smaller primary receipts. Houses with European connections were again moder-ate buyers of near months and after open-ing at an advance of 5 to 7 points, the market ruled generally steady, closing at a net gain of 4 to 5 points. Thist offers were only a pinch cannot, and it was hardly any time before some hogs were moving at steady figures. Even on this basis sellers did not cash their offerings soon enough to suit the buyers, with the result that a good share of the offerings was sold at figures that were a shade higher than Friday's average. The close was the best time, and a few of the late sales looked a nickel higher. Movement was lively almost from the very start, and the liberal run had been cleaned up before 10 o'clock. The general trade was steady to a shade higher than Friday's average, but not quite so good as Thursday's half-dolar market. market but not enough to try out the trade, this being generally the case on a Saturday. At the close of the market Friday humbs were fully half a dollar higher than the close of the previous week, and aged sheep showed an advance of 400000. This was so in spite of the fact that the receipts of the week have been liberal. On every day until Friday prices gradu-ally improved, but a good run that day and bearish advices from other points lowered the market a little, though the close was strong. On Thursday, the high day, Mexican lambs sold up fo \$9.15, the highest since last November. Good light Mexican year-lings reached \$5.50, the record since April, 1910. Some Mexican wethers were good enough to make a top of \$7.40 and ewes commanded \$7.00. The demand for wool continues strong and active with the good to best kinds bringing from 26c to 30c. Dealers look for a good market next week if feeders regulate the receipts as well as last week and do not overload the trade. Quotations on sheep and lambs: Lamba, Bank Clearings. Although it was the usual short session that is the rule for Saturday, the Omaha grain market braced up and recovered portion of the loss of Friday. Wheat was active and much stronger, selling at \$1.44 to \$1.45, as against \$1.39 to \$1.42% Friday. What was true with wheat was also true with corn, prices being 65 to 66% cents, as against 60 to 64 cents per

bushel Friday. Receipts were light even for a Saturday, there being seven cars of wheat, twelve of corn and fourteen of oats on sale. It is conceded that country stocks of verything except corn are running low, but it is the opinion that the bad roads are having much to do in holding down the daily receipts.
