Why You Lose Your Hair. All soaps are made of vegetable or animal oils or fats, combined with lye or caustic. Most soaps, especially animal fat soaps, shaving soaps, etc., make a very penetrating lather and, if used for a shampoo, soaks the hair fibre full of soapy suds. The hair is a long time drying and even when dry, much soap is left within the hair. This soap gradually breaks down or disintegrates, releasing the lye which eats into the hair, roting it and making it fall out or break off. Lee's Shampoo is different. By using a neutral soap made of vegetable oils, olive, cottonseed and coconut, in proper proportion, and combined with pure grain alcohol, glycerine, distilled water and antiseptic, aromatic oils, we get a liquid shampoo that goes direct to the scalp, cleanses thoroughly and quickly of all grease, dirt and dandruff, does not soak the hair fibre full of suds, dries in one-half to one-fourth the time of any other, leaving the scalp clean and the hair soft and fluffy, free from surplus soap. A TRIAL SHAMPOO IS VERY CONVINCING. Large 32 gram bottle (10 shampoos for man), 25 cts. Quart bottle, fills 25c size 8 times, \$1.00. For sale at most drug stores, or postpaid. Sample shampoo mailed postpaid, 10 cts. Made only at the laboratories of GEO. H. LEE CO., Omaha, Nebraska
