Refuses to Order Joint Session to  
Endorse What Has Been Done  
by Wilson.

#### QUINBY MAKES THE MOVE

(From a Staff Correspondent.)  
LINCOLN, March 31.—(Special.)—A democratic legislature voting down an amendment introduced for the purpose of endorsing the administration of a democratic president, was the spectacle this morning in the Nebraska senate, when Quinby by Douglas gave up a resolution asking for a joint session of the legislature to take action commending President Wilson and his administration. The vote was taken viva voce. Only three or four votes were cast for it, while six or eight very inaudible "noes" were registered against the resolution and it was declared defeated by a democratic lieutenant governor.

#### COLUMBUS IS OFFERED MONEY FOR HOSPITAL

COLUMBUS, Neb., March 31.—(Special Telegram.)—Two hundred members and business men of the city participated in the annual Columbus Commercial club banquet held at the Maennerchor hall last evening. Mayor Rollinger was toastmaster.

Carl Rhode made a full report of the last two Platte county fairs, telling of their success.

Edgar Howard responded to the toast, "Next on the Program," speaking on the proposition made by C. H. Sheldon, who offered to give \$50,000 for the erection of a hospital, provided the citizens of Columbus donate a like sum.

### Nebraska DANGER AT RAIL CROSSINGS

Roads Must Erect Signs and Autos  
Must Come to Full  
Stop.

#### WIKLE MEASURE IS CHANGED

(From a Staff Correspondent.)  
LINCOLN, March 31.—(Special.)—Instead of a simple enactment requiring automobile drivers to come to a full stop before crossing a railroad track, the Woodhull bill on that subject, house roll 534, may be transformed into a wholly different measure, placing upon the railroad companies the duty of erecting signs to announce dangerous crossings, and limiting the stoppage rule only to such crossings.

This bill was pulled off the third reading calendar in the house Wednesday forenoon and referred back to the committee of the whole for a specific amendment moved by Messrs. Anderson (Boyd) and Osterman. The amendment is a complete redraft of the bill.

Naming Dangerous Places.  
Section 4 of the amended bill provides that the county board shall specify what crossings outside of municipalities are dangerous to public travel by reason of natural or artificial obstructions cutting off the view of tracks from public highways.

Power Given Cities.  
Similar provision is made empowering city councils and village trustees to determine what crossings are dangerous and notify the railroad company, which must furnish signs at these crossings.

### LORD ROTHSCHILD IS DEAD IN LONDON

Head of British Branch of Family,  
One of Great Bankers of World,  
Meets Death.

#### DEATH FOLLOWS AN OPERATION

LONDON, March 31.—Lord Rothschild, head of the English branch of the Rothschild family, died in London today.

Baron Rothschild was operated upon last Saturday in an acute case of hemorrhoids. For a time it seemed that his recovery was assured, but age and worry incident to the war caused a relapse. It probably will be found that the affairs of the financier were so arranged that his death will cause little if any disturbance to the money markets.

Born in 1840.  
Nathaniel Mayer Rothschild, first Baron Rothschild, was born November 8, 1840, eldest son of the late Baron Lionel Nathan De Rothschild, and was created an English peer in 1885. He was the head of the London banking firm of N. M. Rothschild & Sons, and he was the head of the British branch of the well known family of international bankers.

Baron Rothschild was widely known for his great wealth and his philanthropic labors. He had a handsome house in Piccadilly, and a country seat at Tring Park, Herts. His collection of art works is very well known. Baron Rothschild was the first member of the Jewish faith ever elected to the British Parliament.

Undergoes Operation.  
Baron Rothschild underwent a serious operation in London March 27. Immediately following this his condition was reported as satisfactory and the bulletins issued the following day and on March 29 said his condition was improving.

It was the grandfather of Baron Rothschild, who also bore the name of Nathan, who founded the English branch of the famous house, and who made some of his greatest deals in finance as a result of the battle of Waterloo.

### WEST ROADS MAKING MORE CARRIERS OF EAST EARN LESS THAN THOSE DOING BUSINESS OUT THIS WAY.

CHICAGO, March 31.—Instead of growing poorer the western railroads are actually earning more than the eastern lines, according to Wayne O. Ellis, statistician of the Iowa Railroad commission, who testified today at the Interstate Commerce commission hearing on the request of forty-one railroads for increased freight rates.

Mr. Ellis introduced figures intended to show that the eastern railroads were earning an average of 4 per cent on their investment, while the western roads were earning 7 per cent. He enumerated roads in Iowa, Nebraska, North Dakota, South Dakota and Minnesota, which, he said, were earning from 8 to 16 per cent, and asserted these roads carried the bulk of the tonnage which would be benefited by the proposed advance.

"All the roads in this territory," he said, "were able to pay their operating expenses, taxes, interest on bonds and debts, dividends on preferred stock and had enough left in 1914 to equal 5.76 per cent on their stock outstanding in the hands of the public. In 1913 they earned 26.8 per cent on the common stock."

Witness explained that his averages were obtained by including the non-dividend paying roads with those regarded as prosperous.

Cross-examined by C. C. Wright, counsel for the railroads, Mr. Ellis said he had made no personal investigation and had acted merely in the capacity of a clerk in making computations from reports.

Mr. Ellis said, in calculating the net operating income of all the western roads involved at \$50,621,000 in 1913, he included leased as well as operated roads, and took no consideration of any duplications resulting from payments by the operating to the leased roads.

"Your figures include earnings from not only rail operations, but from investments in other properties, do they not?" asked Mr. Wright.

"Yes, sir."  
"You make no allowance for increased mileage that has been built in accounting for the increased earnings shown, or for the fact that some of the mileage has been double or triple-tracked?"

"No, sir."  
The witness had included the Atchison, Topeka & Santa Fe railroad as a representative Iowa road, which helped to show a high rate of earnings of all the roads in that state.

"The Santa Fe has only 187 miles in Iowa, hasn't it?" he was asked.

He replied it had been a mistake to include the Santa Fe.

### Hupmobile CAR OF THE AMERICAN FAMILY

Ask the Head of the House  
The chances are he's a hard headed business man.  
One of those business men who is supposed to have no sentiment about him.  
Ask him about the Hupmobile.  
Remember—he pays the bills. He knows just what Hupmobile service is. For he measures it in dollars and cents.  
He will probably begin by telling you that he looks upon the Hupmobile as an investment.  
And he will probably say it's one of the best investments he has ever made.  
He may—if he pays attention to such small sums—pull out a note book and show you how little he has spent on repairs in ten or twelve or eighteen months, or in two or three years.  
And then as like as not he'll forget all about business and investment—and just bubble over with Hupmobile enthusiasm.  
We will be glad to leave you to him.  
If he's the average Hupmobile owner he's a better salesman than we are.  
He will tell you intimate things of his Hupmobile experiences that we cannot possibly know—evidence of Hupmobile quality with a capital "E."  
And if you talk to two or three of his type—just average Hupmobile owners—there won't be much left for us to say when you come in to see us.

A Problem  
in  
Arithmetic

The average amount of whiskey used in a high-ball is . . . . . 1 ounce  
The average amount of beer in an ordinary beer glass is . . . 10 ounces

To find the relative alcoholic content:

Whiskey contains 45% alcoholic content per ounce:	Beer contains 5% alcoholic content per ounce:
x1 oz	x10 oz
45%	50%

The average high-ball, therefore, contains the smaller alcoholic content of the beverages.

It follows, therefore, that a high-ball is the mildest of all stimulants used generally by the people.

This is the reason why American whiskey has rightfully been called
