Wheat sold is lower, there being only three cars reported sold. Corn sold we lower, while oats were ke to the lower. Sold we lower, while oats were ke to the lower. Sold we lower, while oats were ke to the lower. Sold we lower, sain wheat have depended largely on the exportable surplus of the Argentine Republic to lower values and help them in covering their short contracts at profits, but they have been greatly disappointed, because of the prolonged wet weather in the southern hemisphere and the consequent loss in the matter of quality. The best authority at Buenos Ayres now places the exportable surplus of wheat of Argentins at only 80,000,000 bushels, with the quality greatly impaired.

Around the top prices reached for corn there was heavy selling by commission houses and cash concerns, which knocked the edge off the market. There was some improvement in the local cash demand, as well as in the export takings, the latter amounting to 115,000 bushels.

At Liverpool wheat closed firm; '46 higher, corn, strong, led higher.

Prime wheat receipts were 45,000 bushels, and shipments of \$24,000 bushels last year.

Omaha Chemist Finds Cheaper Way To Clarify Water

Andrew Jacobson, chemist for the city water plant, has discovered a cheaper method for the clarification of water, the estimated saving per month at the Florence plant being estimated at \$800.

The Water board yesterday afternoon took cognizance of Mr. Jacobson's in-genuity by agreeing to spend \$300 for the ir stallation of permanent equipment for the use of this method, which consists of treating sulphate alumina over iron shavings. The process gives a more effective congulant. The annual cost of sulphate alumina used at the Piorence plant is \$25,-

for his process, which is attracting the his farm at La Platte yesterday evening. attention of water works men all over the country. This new Omaha process will be discussed at the annual meeting of the American Water Works association at Cincinnati, May 10 to 14.

The following Jacobson formula is given for the benefit of those who wish to try this process in their bathtube: Al-2 (80-4) 3 -|- Fe -|- H-2-0 -- Al-2 (OH) (EO-4) -|- Fe80-4 -|- H-2.
