JOHN GRANT, AGED CONTRACTOR, DEAD

Dies at Battle Mountain Sanitarium Following Stroke of Paralysis Two Years Ago.

FUNERAL TO BE HERE TUESDAY

John Grant, a resident of Omaha since 1882 and one of the ploneer paving contractors and prominent business men of the city, died at the "attle Mountain sanitarium in the ack Hills, following a stroke of paralysis yesterday. The remains will be brought to Omaha for burial and the funeral will be held probably next Tuesday, conducted by the Masonic fraternity, an order in which he had long been a member.

Mr. Grant was 75 years of age and until two years ago his life had been one of great activity. Two years ago he was stricken with paralysis and never fully recovered, though he was able to look after his business affairs until a few weeks ago, when he went to the Battle Mountain sanitarium, hoping that treatment there would restore his health. For a time he seemed to improve, but the improvement was not lasting. He failed gradually and while the facts have not been fully ascertained, it is thought that he sustained another stroke of paralysis and that this was the immediate cause of his death,

Born in Brooklyn. John Grant was born in Brooklyn, N. T, where he received his education During the civil war he served in the Twenty-ninth New Jersey infantry as a first lieutenant. After the war he engaged in the contracting business and later became associated with the Barber Asphalt Paving company, going to Washington. D. C., where he lived for many years, having charge of the company business there. In Washington, under his direction, the first asphalt pavement was laid. After that he had charge of practically the paving of all the streets

In 1882 John Grant came to Omaha as the representative of the Barber company and resided here until the time of his death. Here he had charge of the Barber company's paving business for many years and here he laid the first asphalt pavement that was ever put down in the city. Some years later, when the Barber company withdrew from Omaha, Mr. Grant organized the Grant Paving company, continuing in the asphalt business, but adding cement stone work as an aux-

lliary to his plant. In Washington, D. C., in 1881. Mr. Grant was married to Miss Mary Herbert of that city, who, with their five children, all born in Omaha, survive him. With the exception of Mrs. D. W. Connell, who resides in Brooklyn, all the children live in Omaha. They are Miss Elizabeth Grant, Miss Louise Grant, Mrs. Louis Moses and Guy Grant, the latter having been in business with his father for sev-

Harry Smith Breaks Promise and is Jailed

Harry Smith, 838 South Nineteenth street, was arraigned in police court for disturbing the peace by quarreling with his wife, and allowed to depart with a suspended sentence of sixty days on his promise to keep out of further trouble. on a charge of assault and battery, preferred against him by Mrs. Smith, who asserts he came home and attacked her. He was sent to jail for thirty days.

Why You Should Buy Great Western Plate Glass Stock You Never See Plate Glass Company's Stock on Board of Trade or in Bucket Shops For Sale—There is a reason

WHY-Once acquired, it is too valuable an asset to let go of - all other plate glass companies' stock is held by few families and their relatives.

OUR COMPANY IS ENDORSED BY THE COMMERCIAL CLUB OF LARANTE. WYOMING Our Certificate and Number from State of Nebraska R. R. Commission is No. 69-also the state chemist of Wyoming, Wilber C. Knight, said: "LARAMIE, THE MOST NATURAL GLASS MAKING CENTER IN THE UNITED STATES.'

Where Plant Is Located

The property on which these minerals are deposited is located at Laramie, Wyoming, a city of 9,000 people, on the main line of the Union Pacific Railroad, and on the Big Laramie River, 573 miles west of Omaha and 163 miles north of Denver.

We Have an Inexhaustible Supply

We have possession of an inexhaustible supply and superior quality of all the minerals necessary for manufacturing plate glass. No other company can say this. Our plant is the on's one west of the Mississippi river. It will be in close range of Omaha. Chicago, Milwaukee, Minneapolis, St. Pau, St. Louis, Kansas City, Houston, Dallas and will be the sole supply for the entire west and Pacific coast.

Many Will Buy Stock-It Will Sell Rapidly These who have already heard of our project are making requests for blocks of this stock. Now is your opportunity-do not delay-this stock will not on the market jong.

Plate Glass Industry History

Up to forty years ago all the plate glass used on this continent was imported from Europe. For the forty years past, the greater portion of the supply used here has been imported, and up to the close of the year 1914 almost 50 per cent of our supply came from Belgium and northern France. Since the war has been going on we have been unable to import this product. The factories of Beigium and France have been demolished and those of Germany closed down as the consequences

Cheap Fuel and Water

We obtain the necessary fuel and oil for the low cost of producing. These items are no small ones and are worthy of attention.

Free Water for Power

We will have free water power, sufficient to run a dozen glass plants. The factory should pay for itself in a little more The Most Important Thing

LAST, BUT NOT LEAST to be considered in this undertaking, is experience and associates. Mr. A. Balley has spent his life in the field of the plate glass industry, and has associated with him the most expert man in the business, who has spent over thirty years at this profession. He also has associated with him men of fewer years in life, but none-the-less capable in the modern methods of manufacturing plate glass.
SUMMING UP THESE ADVANTAGES: Cheaper

raw material, cheaper fuel, cheaper power and equal proficiency, have we not a most wonderful proposition, and would you not like to invest your money in such an enterprise!

Now is Chance to Buy Stock We are now ready to issue stock and the amount

of stock to be sold in Nebraska is limited. So do not delay if you want a real good investment. A stock company has been organized with a capital of \$1,500,000. Some stock is now being offered at \$100.00 per shares, as follows:

5,000 shares preferred stock, guarantee-

The plant will cost approximately \$1,250,000. Within a few weeks we should start to break ground for the plant, which will be rushed to completion by every possible means. Within nine months we should be turning out from 150,000 to 200,000 feet

of plate glass each month. More as grinders and

Profit \$100,000 per Month Real Estimate by Experts

Experts say we can produce glass at a cost of from 11c to 13c per foot. Our cost of production is reduced about 50 per cent of the usual rate, and with an output of 500,000 feet per month, a profit of not less than \$100,000 per month should be made
