CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, June &—Although the government estimate of the yield of wheat in the United States for 1915 was not officially known in Chicago until after the close of business today, the exact total had been accurately figured out in adance. Especially in the last hour, a majority of dealers guided themselves by a correct assumption that private forecasts of \$50.000,000 bushels would be verified from Washington. Largely as a result the market closed at a decline of 13c to 23c under Saturday night's level. Corn finished 12 to 14 to 14 to 15 to Prices on Board of Trade. the market had been developing renewed strength after having at the outset suffered a sharp break that resulted from a sensational tumble in prices at Laverpool. Decided revival of export demand, however, had prevented the break in Chicago from being anything ilke as far reaching. Furthermore there seemed to rely on a considerable extent on denials that progress against the Turks at the Dardanelles has been as important as first seemed to be the case. Word from Oklahoma that the crop there was about at the limit of endurance in respect to over-supply of moisture tended also to favor the bulls.

favor the bulls.

Foreign inquiry after new crop winter wheat today was the best in some time. There was likewise an excellent call for old crop wheat to go to the seaboard. Country offerings here were small and it was said they dried up altogether when the market was at the low points of the fay. Feeling at the close was described is unsettled.

Corn fluctuated for the contraction of the factor of the fa

day. Feeling at the close was described as unsettled.

Corn fluctuated for the most part according to the action of wheat. Complaints as to the condition of the drop in lows and Nebraska had some effect on values and so too did improvement of cash demand, both domestic and foreign. Auspicious field conditions put selling pressure on oats. Shipping call was good, and included a fair amount for export. Provisions gave way a little as a result of the setback in grain. Higher prices for hoge were very generally ignored.
