

CROPS INUNDATED BY RECENT RAINS

Bridges Are Also Washed Out in Southern Nebraska and Northern Kansas.

TROUBLE IN IOWA IS PAST

While the morning reports to the railroads indicate that throughout Nebraska the rain has ceased falling and the weather has cleared, great damage has been caused as a result of the flood. This is particularly true in the south part of the state.

The Monday report to the Northwestern is to the effect that over an area of ten to twenty miles in all directions from Superior, Saturday night and Sunday morning the precipitation was from five to twelve inches. All low and bottom lands in Nuckolls, Taylor and Webster counties are submerged to a depth of two to ten feet, completely destroying crops and drowning considerable live stock. In many instances farmers and other dwellers on the low lands saved themselves, their families and their property by moving to the hills. The rain seemed to be in the nature of a cloudburst, and continued for hours.

South of Superior, some years ago, the Northwestern built a line down to Webster, Kan., constructing a bridge over the Republican river. This bridge was two miles south of Superior, and consisted of a structure of nine bents, each thirty feet in length. Afterward, both the line and the bridge were leased to the Santa Fe for a term of years, that road being destroyed of getting into Superior, though it did not want to build into Nebraska, as it did not want to comply with certain conditions of the state law.

Bridge Carried Away

Sunday, following the flood, the Republican river rose fifteen feet and carried the bridge away, turning the whole valley into a sea, six to eight miles wide and from two to fifteen feet deep.

By reason of the Sunday flood, the Rock Island sustained losses in the northern part of Kansas that will approximate possible \$100,000 and delay traffic on the Omaha-Denver line for perhaps a week or ten days.

Between Belleville and Scandia, the bridge over the Republican river, a structure more than 1,000 feet long, was lifted off the piling and carried away down the stream, where it was completely demolished. Another bridge on the same stream, quite as long, between Belleville and McFarland, was washed away and destroyed. For miles along the Republican river, it is asserted that the Rock Island grade has been washed to the level of the surrounding country and the road will have to be rebuilt before it can be operated. In the meantime, trains on the Omaha-Denver line will be detained over the Union Pacific.

Crops Under Water

Advices to the Rock Island local offices indicate that west of Fairbury and into Kansas for 50 miles or more the whole country is under water from the rains of last week and that about all of the section of country from five to ten miles wide, crops and practically all destroyed. Over this stretch there are miles of country submerged to a depth of one to ten feet and in the low lands there are numerous places where the water is fifteen feet deep.

North of the Rock Island line, while the rain was heavy, apparently it did not do any damage to speak of. It interfered with repair work on the Burlington, but when it ceased work was resumed and by tonight the Burlington will get trains through to Denver over its south line. On all other lines in the state the road is in good condition and trains are on schedule.

Trouble on Kansas Line

The Union Pacific had more trouble with its line down the Blue river and on some of the lines in northern Kansas but repair work is proceeding rapidly and trains will be running within the next couple of days, providing there are no more floods. On the Union Pacific's main line conditions are back to normal, but there is considerable congestion due to the fact that expedition travel is heavy and the trains of the Rock Island that are being detained over the main line and into Denver.

East of the Missouri river the railroads are no longer experiencing any difficulty on account of floods. There have not been any heavy rains within the last forty-eight hours and all track troubles has been resolved.

ANOTHER OMAHA BOY TO MANAGE DARTMOUTH TEAM

Frank Walters, general manager of the Northwestern, is one of the happiest men in Omaha, having received word that his son, Henry Walters, attending college at Dartmouth, has secured honors in his examination and next year becomes a junior.

In addition to getting honorable mention, young Mr. Walters has been elected manager of the Dartmouth football team for next year, something that is looked upon as a distinctive honor. The position last year was held by an Omaha boy, John Loomis, son of N. H. Loomis, general attorney for the Union Pacific. Young Mr. Loomis was graduated this year.

BROTHER MUST INTEREST NAVY TO BE TAKEN IN

It is just possible that the United States navy will be able to secure the services of J. H. McGee of Narka, Kan. The local office has received a letter from his brother, L. B. McGee, who is a sailor and has been three years on the United States Steamship "Pasadena," now lying at New York. L. B. exhorts the local recruiting officers to write to his brother: "Maybe you'll be able to interest him," he says. L. B. has been notified that it is more important for his brother to "interest" the United States navy than for the navy to try to interest him.

ALL GRAINS MAKE DROP OF A CENT FROM SATURDAY

Cash grain on the Omaha market followed the option that was down from last week, September wheat selling below \$1 per bushel and as low as 29 1/2 cents per bushel. On the cash market wheat sold at \$1.15; corn, 70 cents to 72 1/2 cents, and oats, 45 cents to 46 1/2 cents. All of the cereals were down an even cent from Saturday.

Omaha receipts for the day were: Wheat, twenty-three, corn, seventy-seven, oats, 25 carloads, with nearly everything taken as soon as offered.

Rine Says Use of Names of S. O. and Dundee is Illegal

Ordinance and charter which have governed Omaha began to operate over South Omaha and Dundee at 12:01 a. m. Monday, according to City Attorney Rine. Although the officials are not in legal custody of the property and fund of the annexed towns, it is contended, for instance, that policemen in South Omaha shall make arrests according to the laws of this city, otherwise such arrests would be illegal, assuming that a writ of mandamus will be granted Tuesday. It is another expression of the legal department.

Attorney Rine further contends that the official use of the names "South Omaha" and "Dundee" are not legal.

SURPRISED THAT HE DOES NOT GET THE INFORMATION

"What's the population of Venewald?" asked a tall, thin, gloomy looking man who presented himself at the window in the postoffice corridor marked "Information" and presided over by Loyal S. Mole. Mr. Mole coyly dissembled and pointed out to the seeker that only local postoffice information was on tap at his particular fountain of knowledge.

"Huh, it sez information," grumbled the cadaverous one looking up at the sign above the window.

Mr. Mole referred the gentleman to the public library, the Encyclopedia Britannica, the World Almanac, the atlas and various other "likely" places where the exact figures could be found. His visitor did not rise from his melancholy trance, but looking once more at the legend over the window, he mumbled: "It sez information," and then with a reproachful look at Mr. Mole he slambled off.

KEEPERS OF DISORDERLY HOUSES ARE GIVEN FINES

T. J. Hart, saloon keeper at Sixteenth and Cass streets, was fined \$100 and costs in police court for keeping a disorderly house. Gene Morris, 623 South Seventeenth street, was fined a like amount for the same offense. Martha Howe, 1328 North Eighteenth, and Mrs. Joseph Boland, 193 North Twenty-first street, were fined \$25 and costs each.

Only a Few Can Go

Those who are so fortunate that expense does not have to be considered are now going to health resorts to get rid of the impurities of the system that cause rheumatism, swollen, aching joints and stiff, painful muscles. If you are one of those who cannot go, yet feel that you need relief from such pain and misery, try Foley Kidney Pills. They restore the kidneys to healthful activity and make you feel well and strong. Sold everywhere.—Advertisement.

WHEAT STILL HAS BUMPER OUTLOOK

Two Divisions of the Burlington Report Crops Far Above the General Average.

CORN PROSPECTS NOT BRIGHT

According to the Burlington's weekly crop report for Nebraska, while the excessive rains have injured the wheat crop to some extent, on the whole it is up close to the bumper point. On the basis of 100 per cent for normal condition, at the end of last week, on the several divisions, covering the winter wheat area of the state, the estimate was:

Per Cent	Per Cent	Per Cent
Omaha	Lincoln	Wymore
106	111	113

The Wymore and McCook divisions remain the high standing of one week ago, but on the Omaha and Lincoln divisions where the rainfall was the heaviest and the most damaging, there was a falling off of some 4 to 5 per cent.

Wheat over the entire territory has headed and is filling well, the apparent damage being due to lodging and some rust that has appeared in some instances on the low lands where the water has stood on the ground and has not yet run off.

Report on Corn

The report relative to corn is not encouraging and by divisions, on the basis of 100 per cent for normal at this season of the year the condition is put as follows:

Per Cent	Per Cent	Per Cent
Omaha	Lincoln	Wymore
74	71	82

Too much rain is what has kept the condition of the corn below the normal, the report stating, "Corn has had a bad start, as the seed rotted in the ground to some extent; some of the corn has been washed out and all corn has made slow progress because of low temperature and excessive moisture.

In the districts of Nebraska where sugar beets are raised, conditions are less favorable than they were one week ago. On the low lands many fields have been washed out and the rains have delayed cultivation until the weeds have gotten an unusual start. Around Morrill it is estimated that fields approximating 100 acres have been totally destroyed and will have to be replanted.

Hay is Delayed

All over the state the meadows are covered with water and haying has been delayed. The first cutting of alfalfa is practically a failure. In localities where it is cut, it rotted on the ground before it could be dried out and stacked, and where it was not cut, owing to rapid growth during the wet spell, it has become too coarse and has matured to

such an extent as to lose much of its feeding value.

Dealing with fruit, there does not seem to be much in sight except apples, and it is asserted that they promise a good crop. On account of cold weather and frosts, peaches will be a failure, while berries will be but little better. Cherries have been badly damaged by cold and wet and in no locality is more than a fair crop looked for.

ADVERTISES NEBRASKA AS SPOT TO HUNT AND FISH

The Northwestern is out with its annual booklet, advertising hunting and fishing resorts tributary to its lines. The issue is 16,000, with another 10,000 to follow later in the month. This year particular attention is paid to Nebraska and South Dakota.

In the illustrated booklet of forty pages, particular stress is laid upon Alnworth, Cody, Valentine, Long Pine and Wood Lake, Neb., as places where in season the hunter can find game, ducks, plover and prairie chicken in plenty. Reference is made to the lakes and streams not far from these towns and the assertion is made that they are teeming with bass, crappie and sunfish and that it is not difficult for a fisherman to fill his creel in a few hours. Directions are given for reaching all the Nebraska resorts and a list of hotels at or near them is appended.

Deedwood, Hot Springs and Rapid City, S. D., and Lander, Wyo., are called to the attention of the tourist, hunter or fisherman.

PLANTS ONIONS NEARBY TO MAKE THE POTATOES WEEP

John Nickelson, deputy United States district clerk, is an enthusiastic gardener, and raises some of the finest green groceries in Omaha. He is making researches along the line of Luther Burbank and asserts he discovered a way of watering his potatoes during any dry season that may come.

"You see," said Mr. Nickelson, discussing his great discovery, "I plant a row of onions between every row of potatoes. Just about the time the ground is in need of rain the onions will make the board. The latter met Monday afternoon the soil as much as is necessary and causing both the onions and potatoes to grow rapidly."

COTTAGE PRAYER MEETINGS BEFORE BILLY SUNDAY COMES

Hundreds of cottage prayer meetings are planned to be held in Omaha every day during August, preparatory to the Billy Sunday campaign, which is scheduled for September 5. Locations of the meetings have been figured out by the committee, with the help of the postoffice authorities, so that every community in Greater Omaha will be well covered with the daily meetings.

The preliminary prayer meetings on Sunday afternoons have been discontinued by the committee.

SOUTH OMAHA LIST MAY NOT STAND UP

Council to Analyze Eleventh Hour Acts—No Funds for the Late Appointees.

NOT DISPOSED TO "SHAKE UP"

The city commissioners have announced that they are not disposed to indulge in any "shake-up" among city employes of South Omaha, and they have likewise declared they will, when the proper time arrives, analyze with a critical eye eleventh-hour appointments and other official acts. They refuse to make any comments on the action of South Omaha officials Saturday.

In this connection Commissioner Withnell of the fire department said: "I will not stand for the eleven new firemen appointed last Saturday evening in South Omaha. The funds will not permit, in the first place, and the men may not be needed. It is a matter for careful consideration. The fire districts of the south section of Omaha will bear a new relation to South Omaha. The districts to

TODAY'S BEAUTY HINTS

To whiten and beautify the complexion permanently we have found no better preparation than a lotion made by dissolving four ounces of alumina in one-half pint hot water, then adding two teaspoonfuls glycerin. This removes any pimples, shiny, muddy or sallow appearance, and will make anyone's skin clear, smooth and velvety. It does not show or rub off like powder; in fact, it seems a part of the skin; and for removing tan and freckles is unequalled.

It is necessary to shampoo more frequently in the warmer weather because of excessive dust and the fact that the head perspires more and is usually more exposed to the weather. The easiest-to-use and quickest-drying shampoo that we can recommend to our readers can be prepared very cheaply by dissolving a teaspoonful of canthox, obtained from your druggist, in a cup of hot water. This rubbed into the scalp creates a thick lather, soothing and cooling in its action, and very beneficial to scalp and hair. After rinsing the scalp is fresh and clean and the hair dries quickly and evenly and takes on a bright luster and soft fluffiness that makes it seem very heavy.—Advertisement.

be covered by the south side houses will need revision."

Some of the older men in the South Omaha fire department service have called on Mr. Withnell during the last few weeks and have been assured they will be retained, providing their services are satisfactory.

"A new system of discipline is needed in the South Omaha fire department," added Mr. Withnell.

to retain the present South Omaha police department insofar as possible, but does not feel bound to recognize unnecessary appointments made on the eve of the dissolution of the South Omaha city government.
