

Germans Purchase Much Machinery

(Correspondence of the Associated Press.) PARIS, July 2.—More than 20,000,000 of the 14,000,000 tons of iron ore are produced annually in France, worth about \$7,000,000 francs, comes from the depart-

ment of the Meurthe and Moselle, occupied by the Germans. Three and one half million of the 4,500,000 tons of pig-iron produced in France annually, also comes from those regions, and 1,250,000 of the 1,300,000 tons annual production of steel. Seventy-four per cent of the French iron industries, therefore, are immobilized. A great deal of the information concerning the fate of French industries

behind the German lines is anonymous. Privately, however, the report that every machine that can be utilized in Germany has been taken, as well as all the money and products of the occupied regions, has been verified by reliable manufacturers, who have means of communication that they are careful not to reveal. The usual German system was applied to the distribution of the machines. A stock com-

pany of German manufacturers managed this part of the economic war. This company sent engineers to Belgium and northern France to select such machines as might be worth taking. These were shipped to Cologne and a complete catalog was printed and sent to German manufacturers, offering them at prices ranging from 50 per cent of their value up. In this way German factories making

shells for the army were able to increase their lathe equipment on good terms. The stock company took 15 per cent commission on the sale and the real owner received a requisition payable sometimes by the Reichsbank, more often by the Bank of France—six months after the conclusion of the war. The requisition price is generally based on the cost price, less depreciation of 10 per cent

a year, with a minimum value of 50 per cent.

War Fund Has History.
(Correspondence of the Associated Press.) ROME, July 1.—Among the funds which are pouring into the committees in every city of Italy to provide comforts and necessities for those who are suffering directly or indirectly through the war, an interesting contribution of nearly \$500 has

been received by the committee for civil preparation at Bologna. The committee existed during the war of independence in 1860, and this sum, which was then only \$50, was the balance which remained to the fund after the war was over. It was deposited in the name of Count Salina, a well-known patriot of the town and in forty-nine years it has more than quintupled itself.

Desirable Merchandise Being Hurried Out in Brandeis Stores'
