In the corn market wet weather and the lightness of stocks and of country offerings tended to suppress bearish attacks so far as the July option was concerned. The deferred months, however, were clearly affected by the wheat weakness. Oats were governed chiefly by the action of other grains. Crop reports taken as a whole were against the buils.

Lowest levels so far this year were prutures. Lowest levels so far this year were reached in the price of provisions. The opening of the week found pachers still in a bearish mood, and white up to a last hour they had said little and done less, it was generally understood that they wanted about a 50c reduction in lamb values.

Sellers, who were pricing their holdings on a steady basis, decided to wait things out again this morning, and as a consequence, nothing sold till late. For that matter it was nearly roon when the toe was finally broken, and bulk of the lambs started moving scaleward on a lugist lower basis. Bulk of the sales were made at 35 Majs. Id, the latter figure being the day's top on westerns, although a deck of natives sold at high as \$3.15. General opinion was that quality was hardly as good as on last week's close.

Sheep were in very limited supply, and these were really not enough tere to make a basis for quotations. What few little bunches were here brought good strong figures. Two loads of feeder yearlings sold early at \$0.00, and a little package of fat wethers reached \$6.55. There were no good owes effected, the best here bringing \$5.50.

NEW YORK STOCK MARKET AFFAIRS AT SOUTH OMAHA

Steel Takes the Lead and an Ad- Germaine Towl, in Mexico City, vance Noted Generally All Along the Line of Offerings.

GOOD-SIZED BLOCKS ARE SOLD

From an irregular and healtant opening today's stock market gradually turned strong under the lead of United States Steel and the ac-called war leaves, in which some notable gains were recorded, with a new high price for Bethlehem Steel at 1%. The reature of the final hour, when the day's highest quotations were recorded, was the instatent demand for United States Steel, which changed hands in individual lots of 1,000 to 4,500 shares at the best price in some days.

Steel strength was attributed mainly to its favorable June tonnage statement issued after last Saturday's close, but the large short interest in shares also centributed in a measure toward the advance. American Can was another active industrial, ranking aimost second to Steel at a gain of 34.

vance. American Can was another active industrial, ranking almost second to Steel at a gain of \$14.

War shares were conspicuous throughout the session, albeit the demand for these issues lost none of the wonted professional character. Among the more striking gains in this group were American Coal Products. Dipoints: General Motor and New York Air Brake, 10 each, and Bethlehem Steel, 2. Various other industrials and equipment coming within the scope of war issues rose \$1 to \$points.

There were no especial developments to account for today's sharp advance. In point of fact the market's rebound probably resulted mainly from an overextension of bearish commitments, together with the belief that differences between Washington and Berlin are likely to be adjusted in orderly fashion.

Representative rallway shares were the day, particularly Canadian Facific, Union Pacific and Reading, the latter evincing marked heaviness. These stocks, as well as others of lesser prominence, more than retrieved their losses later. Canadian Pacific especially being assisted by denial of reports that the British government contemplates the nationalization of that proporty. Total sales of stocks amounted to \$5,000 shares.

There was further selling of bonds for Surope, but these offerings made only a slight impression on values. Total sales, par value, aggregated \$1,830,000. Inited States bonds were unchanged on call.

As a result these tremendously fertile fields are given up to a profusion of weeds and wild flowers, which present a spectacle as brilliant as a California garden multiplied in area fifth and N streets Saturday night by until it stretches over the whole Vardar valley. Everything grows in great luxuri-

ance and in the most vivid colors. The more familiar wild flowers seen here are daisies, popples and huge thistles ten feet high. The popples are of an intense crimson, while here and there are patches of cultivated opium poppies, in full white flowers. More riotous in coloring are flowers not easily identified by an American visitor—mossy fields of purple weed 100 feet across, a clover-like plant with tiny blossoms of intense coralred, tall lilac flowers, clumps of blue and silver-gray, various types of yellow and crimson blossoms. Here and there the solid tapesty of vegetation is broken by little lakes or ponds, frinzed with rushes as thick as a man's arm and tall as small. as thick as a man's arm and tall as small trees. BRITISH OFFICIALS AVOID

(Correspondence of the Associated Press) BRITISH HEADQUARTERS, France. fuly 1. One of the first considerations of the British army officials is the NEW YORK -- CHICAGO avoidance of all friction with the inhabitants of the occupied districts of France and the maintenance of most cordial relations with the French soldiers. A principal factor in keeping on good terms with the allied army nas been the steadfast insistence on the courtesies of dis-

When, however, the salute is given by a French private, the acknowledgement is made by all the officers.
