

NEW YORK STOCK MARKET

Enormous Dealings in War and Related Shares Feature Operations.

RAILWAY ISSUES ARE QUIET

NEW YORK, Sept. 17.—Enormous dealings in war shares and other stocks related thereto, mostly at substantial gains, featured today's operations. Advances in this group ran from 3 to 6 points, with more noteworthy gains in a few isolated instances. Railroads were even more quiet than usual, but were relatively steady, despite the acute weakness of these stocks abroad.

Great Northern Ore Certificates, Colorado Fuel, United States Steel, Republic Steel, Crucible Steel, Westinghouse and Studebaker, more or less in the order given, comprised the active features. Many rumors were circulated in connection with the heavy trading in these stocks, none of which was confirmable and some of which taxed speculative credulity to the utmost. Persistent "tip" was that a gigantic deal or combination was under way involving the Great Northern Ore, Colorado Fuel and Republic Steel. So far as they related to the two first named, these rumors were authoritatively denied.

The market was strong from the outset, General Motors being the outstanding feature by reason of its 50 per cent cash dividend distributions. The stock opened at 200, a gain of 17, beating its previous record by a rise further to 221, but closed at 220. Colorado Fuel came back at first, but soon started on another upward course, which carried it to 228, a maximum gain of 24, closing at 224. Great Northern Ore made a maximum gain of 4 1/2, Studebaker also made a new record, rising 2 1/2 to 120 1/2. Willys-Overland, Goodrich and other motors reflected the rise in General Motors by making material improvement. Reactions from top quotations in these stocks were nominal compared with actual gains. United States Steel managed to rise to 75 1/2, a gain of 1 1/4 in the face of heavy offerings, closing with a net advance of 1/2.

Sales amounted to 727,000 shares. Regardless of the statement that the fundamental features of the Anglo-French loan have been completed, the movement of exchange on London indicated that negotiations will remain in a tentative state. Continental exchange was generally higher, with a lessening of bonds were higher with a lessening of European selling. Total sales par value aggregated \$2,225,000. United States bonds were unchanged on call.

GOOD OIL IS STRUCK AT GREYBULL WYOMING

Word comes to Burlington officials that at the town of Greybull, Wyo., eight miles north of Basin, oil has been struck at a depth of 600 feet. It is asserted that the flow is 500 barrels per day. The well is inside the town limits and is the property of the Lincoln Townsite company. The townsite company is an organization by Burlington officials and is the owner of the townsite along the Wyoming lines of the road.

Just what will be done with the product of the Greybull well is not known at this time. It has been capped and will be kept in this condition until some plan is developed for the disposition of the oil.

For years it has been believed that oil existed in the vicinity of Greybull, but this is the first time that a producing well has been put down. In this well, before it was capped, the oil came to

PHONOGRAPH RECORDS PLEASING TO B. SUNDAY

"Billy" Sunday and "Ma" had a phonograph feast after the meeting Thursday evening. It was the first time "Billy" has indulged in the entertainment here. A local company has supplied the machine and records and "Billy" had "Ma" play them all for him. Some of them he insisted on hearing several times, being particularly pleased with several selections from grand opera and one humorous record.
