Fathers of Ten or More in This Club

SPRINGFIELD, Ill., Oct. 2.—Members of the famous Fathers' club of Illinois are swamping the secretary, William F. McCoy of Springfield with requests for photographs of the club's president, Governor Edward P. Dunne, and his family of thirteen children.

The club was organized in Springfield in June, 1913, at a banquet given by the Sangamon County Alfalfa Growers' association, where Governor Dunne delivered an address in which he criticized the modern tendency of young people to marry, move into a flat and then get themselves a cat.

It is planned by the members to urge the State Board of Agriculture, which has encouraged the organization, to provide a grand champion trophy for the man in attendance at the next state fair who furnishes evidence of being the father of the largest number of children (dead or alive) in Illinois.

CROTHERS TALKS TO UNIVERSITY MEN

First Formal Luncheon of the Year in the New Quarters of the Club.

ADDRESS IS ON SCHOLARSHIP. Dr. Samuel McCord Crothers, pastor of First Unitarian church, Cambridge, and a writer of national prominence, pleaded the cause of scholarship in opposition to the dollar as a measure of success in America at the first formal luncheon held in the beautiful new home of the Omaha University club at noon.

Dr. Crothers reinforced his arguments with the dry humor which is noticeable in all his writings and speeches. He first put his theme in the form of a declaration that he advocated "making the college a center of education."

His message to college graduates was that "there is a great opportunity in the cities to make circles in which more disinterested ideals are recognized. The college should teach us how the scholar and the true man of science think and feel and teach us in our broad winning to appreciate truth and beauty for their own sake."

"Release Men from Fear." "Education should release men from the fear of the crowd," said Dr. Crothers. "The artist is right who says, 'I'd rather starve and be true to my art, than to cater to lesser purposes.'"

Dr. Crothers made several pointed remarks concerning colleges in America as they are at present. Some of these were as follows: "The danger to the American college comes from its own increase in numbers and a fall in quality."

"If four years in college do not give the graduate a different idea of life than he would have had if he had stayed away, then the time is wasted."

"A great revolt on the part of scholars is coming in American colleges. It is called 'Have an Ideal.'"

"The college man should have an idea of truth for truth's sake and beauty for beauty's sake, which the ordinary man does not have."

"The man who can get the most money for the college is elected president."

Referring to the influence which men of wealth have upon colleges, Dr. Crothers remarked: "If the old tribal Indians paid for the education of their children in Indian schools, they probably would demand a professorship of scalping."

Start Paving On Military Avenue

Work of repaving Military avenue, Hamilton street to the city limits, will be started Monday morning. The district is nearly three-fourths of a mile long and the estimated cost of the improvement will be \$8,000.

Commissioner Jardine states the old concrete will be used by the city, probably on sewer construction work to be done in the northwest part of the city. The street car company will begin on Monday to do their part of the paving work on North Thirtieth street, beyond Fort street. At the same time the contractor will start laying the curb. It is believed this thoroughfare will be reopened about the last of October.
