CONTROL OF SAXON TO HARRY W. FORD

Hugh Chalmers Disposes of His Holdings in Company to His Partner.

SCORES BIG SUCCESS

A deal of big significance in motor manufacturing circles has become known in the announcement by Hugh Chalmers and Harry W. Ford, that Mr. Ford has purchased all of Mr. Chalmers' holdings in the Saxon Motor company. By so doing Ford becomes the largest individual stockholder and the dominant figure in the successful Saxon company, which he has served as president and general manager from its organization.

The big stock purchase (involving a cash transaction of \$500,000) establishes the Saxon company as an independent institution which, in the space of eighteen months, since it began shipping cars, has risen to the position of seventh among all Detroit motor companies, and tenth among the motor companies of the entire world in the number of cars built and sold annually.

The Saxon Motor company was incorporated November 1, 1918, by Hugh Chalmers and eight members of his Chalmers Photo Motor company organization, it being Mr. Chalmers' idea that his company would prove a successful busines venture and that the Saxon holdings of his younger associates would prove valuable and morning. profitable to them. The original organ-izers, besides Mr. Chalmers and Mr. man connot speak English, and his rela-Ford, were Lee Counselman, Percy Owen, George W. Dunham, H. H. Pinney, C. A. Pfeffer, C. A. Woodruff, C. C. Hinckley Mesers. Finney, Pfeffer, Woodruff and Hinckley sold their interests some time ago. Mr. Owen is vice president of the \$1,000. Saxon company, and Mr. Counselman and Mr. Dunham are directors, but not actively engaged in the management of Fair's Profits Now

"I have every confidence in the suc-Chalmers. "My only reason for selling my interest was to be perfectly free to give my entire time to the Chalmers company. Upon deciding to sell my Saxon stock. I was delighted, in view of my long association with Harry Ford and my friendship for him, to give him an option to buy it. Harry Ford, I believe, is already recognized by those who know him as one of the best all-around executives in the automobile industry. For rapidity of operation, skillful, and efficient use of all the materials given him to work with, I think few have exceeded in this line of work the record made by Ford. His showing with the Saxon company speaks for itself, and I am proud to have a graduate of the Chalmers' organization score such a виссень.

The various officials of the Chalmers company, who with Mr. Chalmers organized the Saxon company, were unantmous in selecting Mr. Ford as president of the new company at the time of its organisation, and have loyally supported him in his work throughout.

At first the company specialized on the Saxon roadster, a two-passenger car selling at \$395, then the lowest-priced automobile made. Since that time, the manufacture of the roadster has been continued, but the line has been widened by the addition of the \$785 Saxon sixcylinder touring car. This latter car was brought out at the New York show last January and created as big a sensation as the Saxon roadster did the previous

Luxury and Common Sense Combined

Chalmers designers spent two years to make the Palanguin worthy. Can othere give you as good in two menths? has a positive self-starter. The win-

Y/E made the greatest forward step ever made in fine body building when we announced this splendid touring and closed car combination which gives you both for practically the price

We made of the Palanguin a car that commanded instant respect and response, because of its combined beauty and utility. It is a car that reflects a sounder reasoning in automobile mak-

Other Makers Followed

And, under various guises, this combination has been the most extensively copied car in the history of the automobile.

Other manufacturers immediately sensed the public trend toward the Palanquin, and as rapidly as possible many of them have announced cars built along similar lines.

But you know that a counterfeit, however good, is always a counterfeit. Insist on having the Palanquin. Compare it, detail for detail, with those that have trailed after. You will easily be able to see the difference.

A Splendid Car for Women

It is an ideal car for women, for it is unusually easy to handle in traffic and dows are fitted with heavy silk curtains. The seats may be covered with a splendid grade of silver gray, double texture silk mohair at slight extra cost.

Buy the Palanquin now, during this fine autumn weather. Give your family the comfort, pleasure and distinction of a limousine this winter.

Then, when summer comes, remove the Palanquin top-which comes apart corner of your garage—and you have a perfectly appointed, complete touring car for summer service.

A Sensible Price, Too

Isn't this the most common sense car you ever saw? Is it any wonder that others have so extensively copied it?

And you will find the price just as sensible. The cost of the touring car is \$1350. The touring car and Palanquin, both complete, sell for \$1700only \$350 more than the touring car

Let your Chalmers dealer show you how fine this combination car is. Words alone can't express it. He will furnish you drawings for crests and mono-

NOODRICH Tires have thus far been "known" only to People who used them.

To these they have been known chiefly by the uniformity of Mileage they delivered, per dollar

will you know them

invested by the user.

—Also by the "Fair List" price Propaganda, of the B. F. Goodrich Co. which this year saved some \$25,000,000 to U. S. Car-Owners, through uncovering the "Padded Price-List" imposition on Tire Consum-

UT, henceforth "Goodrich Tires" will be known at sight even to people who never hope to own a Car.

Known by the fact that the standard Goodrich Fabric Tire will have the same stylish BLACK Tread appearance as the aristocratic "Silvertown" Tire (which cannot yet be turned out in half the quantity the Market calls for.)

No increase over the reasonably low Goodrich Fair-List Price as established, is asked for the new, and highly distinctive, Goodrich Black Tread Tire.

So, why not have your Car Up-to-the-minute, when you can equip it with these very "smart" Gobdrich "Barefoot" Tires.

ND here is how these Barefoot Tires act in Automobiling,-

— When the weight of the car bears on the clinging, "Hyper-Rubber" in their Treads, and the power is applied to go ahead or reverse, the stretch in the "Hyper-Rubber" Sole of the Goodrich "Barefoot" Tire acts as a sort of Lubricant between the Fabric Structure of the Tire and the Road.

Then the Hyper-Rubber "Toes," of the Goodrich Safety-Tread Tire CLING to the pavement (instead of crieding against it) just as your Bare Foot would aling

grinding against it) just as your Bare Foot would cling to a slippery surface—without Grind, and so, with the minimum of Frictional Heat or Wear for maximum

Goodrich "Hyper-Rubber" is also made into Goodrich Motor Cycle, and Bicycle, Tires, as well as into Goodrich Rubber Boots, THE B. F. GOODRICH CO. Over-Shoes, Soles and
