#### PECULIAR CASE FROM SIOUX the French frontier.

(From a Staff Correspondent.) LINCOLN, Dec. 6 .- (Special.) - James Strong, convicted of murder in Sloux county, who has served ten years of a life sentence, was furloughed by Governor Morehead and left today for Pittsburgh, where he expects to get employment, that being his former home.

penitentiary. He has been one of the most trusted of the trusties in that institution and Warden Fenton recom-mended his furlough because it appeared to him that the man has no right to be longer confined in the place. Two Convicted.

He with another negro by the name of Strong, who, however, is not related. were convicted of the murder of a may in Sioux county. In bringing in a verdict of "guilty" the jury meant it only for the other man. They were tried together and when the judge sentenced both of them to life imprisonment, the foreman of the jury protested to the judge that they did ont intend that James Strong should be included in the findings of the

Judge Takes Hand. However, Judge Westover, the presiding judge, is said to have replied: "You have done your duty and now I will do mine.

All members of the jury joined in a letter stating the facts to the Board of Pardons and the governor and it was upon these showings and the fact that Strong seemed to be out of place in a penitentiary that the governor let him

#### Artificial Stone Work on Boom in the State sider.

(From a Staff Correspondent.) LINCOLN, Dec. 6.—(Special.)—Reports filed in the labor commissioner's office for the year 1914 by manufacturers of artificial stone, show the total capital invested to be \$212,029.83. The total value stock used for the year was \$179,-990.47. Total value of production, \$340,899.65. It is estimated that ninety-seven per cent of the total production was sold in Nebraska. The total for the year paid in wages was \$110,437.79 to a total of 259 employes, making an average for the year of \$2.76 per day.

The above figures show the activity for the year 1914 of seventy-five Nebrasks manufacturers of artificial stone

# Fire Destroys

CALLAWAY, Neb., Dec. 6 .- (Special port was completely destroyed by fire last night. Three streams of water failed to check the flames and the building and stock were a complete loss.

The loss will amount to about \$15,000, about half covered by insurance.

# BOOKWALTER WILL PAY

#### Famous Beauty Tells Hair Curling Secrets

"I cannot too strongly condemn the use of the hot curling-iron," says Rita. Moya. "It means death to the hair eventually. Moreover it is entirely unnecessary. The hair can be made beautifully wavy and curly to any extent and in any form desired, merely by using such a simple thing as pure silmerine. This perfectly harmless liquid should be applied to the hair with a clean tooth brush at night. In the morning you will find that a very beautiful natural wave and curliness has resulted, and the effect will last a considerable time.

"The liquid silmerine is very beneficial and is not sticky or greasy. Neither does it streak the hair or stain the scalp. You need not get more than a few ounces from your druggist. The best way is to divide the front and back hair into from four to six strands and to moisten each strand thoroughly from root to tip."—Advertisement.

the representative ware of this wonderful metal-Aluminum. Beauty of design and finish are just as individual of "1892" Ware as the distinction we possess of being the originators of Aluminum cooking utensils in this country. Handy little contrivances add greatly to their general utility and your fondness for using them.

cooking utensils and the Altill greater teeling of leftel centent in knowing that

"1892" Pure Spun Aluminum Ware is 99 36 % pure, stands high and alone as

Heavy gauge sheets, perfectly treated, go into the making of "1892" Ware—thick enough to give body and strength to the shape and assure a long active service, but, light enough to be of exceptional advantage in handling.

Aluminum as a kitchen ware, needs no introduction to American housewives this day and age-nearly every woman knows the advantages, both economical and sanitary, in the use of Aluminum for cooking utensils.

Every "1892" Pure Spun Aluminum utensil has been trade marked-a mark that stands for the highest quality Aluminum Ware that the market affords. Look for this mark, it is your assur-

ance that you are not not being deceived into buying anything but the best. We have made it easy for you to know "1892" Ware by putting on this symbol of perfection.

There are Scores of Various Shapes and Styles A utensil for every kitchen need has been made to supply that specific requirement. Certain shaped kettles or pans are made for economical and scientific reasons—water bells on less heat, or heat spreads at certain angles with greater intensity, all these have reasons or principles for that application to each case.

Tea Kettle and Oatmeal Cooker; a combination of two important kitchen utensils. The cooker sets down in the kettle, resting on the beaded seat. Kettle can be used separ-One cover sufficient for either vessel. Polished outside satin finish inside.

Berlin Sauce Pan; one of the most beautiful designs in our entire line. The gradual and gentle swell in the sides make it one of the most efficient. Water boils more evenly and at less consumption of heat than most so called Berlin shapes,-will not boil over owing to the shape. The water

boils in instead of out or over.

Percolating Coffee Pot: ient combination utensils, can be used either as a Coffee Percolator or as a straight Tea Pot. An important feature of the percolator stand is the quick action gained by steam activity and perfect per-

Oatmeal or Rice Cooker; the regulation double boiler combination. Quick to heat and boil. A cooking process that makes oatmeal or rice a great deal more palatable and easy to prepare. Large water comsupply of water, more evenly distributed and requires less attention when boiling.

Extra Spun

Fry Pan or Skillet: wood handle reinforced and triple aluminum riveted. Spun from extra heavy sheets, even texture and gauge. No seams or joints to catch or lodge food particles, always clean and sanitary. Double lipped, deep sides. Heavy enough for durability; light enough for easy handling.

Deep Preserving Kettle. Often a need for a deep kettle comes to hand, especially during preserving season. Large sheets of extra thick, even gauge Aluminum are used in stamping and shaping the kettle. Top is heavily beaded which also gives strength and body to the
