Features of the Trading and Closing Prices on Board of Trade. CHICAGO, Jan. 12.—Wheat jumped in value today chiefly on account of a possibility that severe damage to the winter crop might result from the widespread cold wave. Although top prices were not main ained, the market closed strong, 114c to 14,613c net higher, with May at \$1.25 and July at \$1.25%. Corn gained we to 26. Corn gained we to 26. a shade to 25c.
Advances in the market forced quotations up to within 'sc of the hishest price record of the 1915 crop. The bulge was checked by heavy profit taking.

Predictions of sharp falling off in receipts as a result of the bilizard, and the fact that shipments from Argentina and Australia were light, and the vessel rates from Argentina were continuing to soar helped the bull side of the market.

Corn went to a new high price record for this season's crop, going about Nc. despite immense profit-taking sales by holders. It was feared that stormy weather would curtail receipts. Besides, exporters were said to be active buyers, both at Atlantic and guif ports.

Oats advanced with corn. Improvement in the eastern embargo situation was an aid to the upturn.

Provisions were unusually active, with the public buying on a large scale.

Further Shrinkage in Quoted Values Attends Early Opera-

tions. IS PROFESSIONAL TRADING

NEW TORK, Jan. 12.—Further shrink-age in the quoted values of special stocks attended early operations in today's mar-ket, with recoveries amounting to some very substantial gains before the close. Forenoon declines of 2 to 5 points in such issues as Crucible Steel, Baidwin Locome-tive and a few others of the munitions or allied groups were caused in large part by the aggressive tactics of the short interests, which latter were driven to cover.

part by the aggressive tactics or the short interests, which lafer were driven to cover.

Trading was more professional than usual, investors maintaining their attitude of aloofness. Overnight developments in Mexico gave rise to renewed apprehension in that quarter, as was seen in the early weakness of Mexicon Petroleium and American Smelting. The rally of the afternoon was led by United Status Steel, that stock recovering from 8. Its minimum price for the current movement, to 85%, and closing with a not gain of 1 point. High-grade rails also participated in the forward movement, notably Canadian Pacific, 8t, Paul, Union Pacific, Reading and New York Central.

Conspicuous among the very active and strong specialities was Mercantile Marive, the common rising 1 to 20%, the preferred 7% to 7% and the 4% per cent hends 2% to the righ record quotation of 8%. Although official details were lacking, it was reported that a definite agreement had been reached between the orposing interests in the proposed reorgenization. American Can was again one of the most prominent industrials, its strength being accompanied by rumours of additional war contracts and possible action bearing upon dividends. Dealings tapered off in the final hour, that period being devoted to a few of the high-pri 8 specialities, some of which scored assistional advances.
