Little Mary Pickford, whose pretty curly locks have been so much admired, writes that she has never used the curling iron. She fails to see the wisdom of burning the life out of the hair.

That the heated from is ruinous to the hair is being more and more appreciated. Many are discarding this instrument of lorture in favor of plain liquid silmerine. This is not only harmless, but is really beneficial to the hair. Instead of giving one's tresses a burnt-out, lifeless appearance, it gives them a bright lustre, and the curliness looks altogether natural. It is a simple thing to procure a few oinces of liquid silmerine from the druggist and apply a little at night with a clean tooth brush. The hair should be moistened the full length, from root to tip. The beautiful wavy effect upon arising is agreeably surprising.—Advertisement.

### NEW FEVER CASES NUMBER SIXTEEN

Six Taken to the Emergency Hospital-One an Ice Cutter of Ashland.

#### SEVEN QUARANTINES ARE OFF

Sixteen new scarlet fever cases were reported to the health office during the last twenty-four hours. Six patients were removed to the city hospital. Oliver Lane of Ashland, Neb., is an ice cutter who applied at the free dispensary on Douglas street for treatment and his case was diagnosed as scarlet fever.

In two instances during the last day there were two cases in each home. Most of the new cases affect children. Seven quarantines were removed Tuesday.

Health Commissioner Connell reports nothing particularly new in the situation. The inspectors are busy quarantining new places and removing quarantines from convalescents.

## **Opening of Valuable Government Irrigated Homestead Lands**

43 Farms Averaging 100 Acres Each

#### Location of These Lands

4,000 acres of homestead irrigated lands adjacent to the reliable government canal in the North Platte Valley, from eight to twelve miles northeast of Bayard, and from six to eight miles Northeast of Minatare, Nebraska. Besides these 43 farms offered for entry there are yet available for entry 41 other homesteads under the same government canal in the older section of the Valley.

#### Character of Lands

They are platted in farm units of from 40 to 160 acres. The lands are adapted for alfalfa, wheat, oats, sugar beets, potatoes and the like. Besides the grain production there is the live stock industry for which this valley has become so well known.

#### Terms

The lands are free and are allotted under the homestead laws. The government permanent water right will cost \$55 an acre: 20 years time for payment; first payment \$2.75 per acre. No further payments for five years and no interest whatever is charged. The usual land office fee varies from \$6.00 to \$14.00.

#### How To Obtain a Homestead

These lands are reached via Alliance and Bridgeport, Neb. At either Bayard, Minatare, Scottsbluff or Angera local residents for the usual charges will conduct you by automobile to these lands where the candidate may make his selection. After having decided upon a location the candidate should obtain a certificate from the Government Project Manager, at Mitchell, Neb., which is secured by the payment in advance of the first payment of \$2.75 per acre. This certificate should secured by the payment in advance of the first payment of \$2.75 per acre. This certificate should then be filed together with a homestead affidavit in the Land Office at Alliance, Neb., any time from MARCH 19TH UP TO 9:06 A. M. MARCH 24TH. The drawing will be held at Alliance, Neb., March 24th, 1916. Each homestead will be drawn for by the different candidates for such particular piece. The unsuccessful candidate is entitled to another selection if that has not been drawn. The prior payment of \$2.75 per acre for the certificate and the Land office fee, will be refunded by the Government to those who do not obtain a selection.

#### The North Platte Valley

There is no richer section of the West than this region. Valley farms under cultiva-tion run in value from \$75 to \$150 an acre or even higher. It is hardly necessary to comment upon the immediate or future value of these farms to be drawn for.

Our publication, "The North Platte Valley," may be had on request. It describes the older portions of the Valley and will give one an excellent idea of that locality. Free on request. Write me for the folder or for information regarding these pro-
