COMING POWER FOR THE AUTO

Investigation and Test of Power Derived from Water and Chemicals.

FUEL AT A CENT A GALLON

The engaging possibility of running an automobile with a few gallons of water and a mysterious green chemical as motive power, the whole costing less than a cent a gallon, caused William E. Haskell, publisher of the Chicago Herald, to visit Louis Emrich, the inventor of the mixture, at the latter's home in Farmdale, Ill., last Sunday.

Mr. Haskell, who said he made the long trip from Chicago for the sole purpose of making a personal investigation of the discovery, confessed to a reporter for The Times that he embarked upon his mission with considerable skepticism. Having been an enthusiastic owner of automobiles since 1885, he was anxious, he said, to witness a demonstration of the discovery that had been widely published in the last few days as promising to put a dent in the revenues of the Standard Oil company.

Mr. Haskell confessed that in spite of the account published in some of the New York evening newspapers, he approached the proposition with caution, and he said he was particularly anxious to see the inventor in person. He found Mr. Emrich standing on the lawn of his pretty little home with a couple of newspaper men from Philadelphia who had come over to see for themselves the wonder they had read about. So many agents of the Standard Oil company had been to see Mr. Emrich in the guise of newspaper men that his manner was at first a trifle forbidding, but after he established his identity he expressed his willingness to give me a first-hand demonstration.

A small cycle car of simple construction, with a four-cylinder engine of nominal design about the size of the engine used in the Ford car, was chosen for the test. The fuel tank was under the hood, directly back of the engine, and had a capacity of not more than three gallons. It was provided with a petcock to drain it, and a small copper wire led directly to the carburetor, which was also supplied with a petcock.

"I first examined the entire construction of the car to make sure that there was no place to conceal another fuel tank, and then drained the tank of every drop of fluid it contained, leaving it dry on my hands, smoking it, and trying it by evaporation. It looked like water, dried like water, felt like water, and had a slight bitter-almond odor like that of prussic acid. I also looked into the tank through the large filling opening, measured the inside of the tank with a stick to be sure there was no false bottom, and convinced myself that the tank was absolutely empty, and that nothing in any shape or form could reach the carburetor except through the small copper pipe from the bottom.

"I took an ordinary white china pitcher and filled it from a hose faucet that protruded from the side of the barn. I took a drink from the pitcher and what I drank was pure water. I then took a small vial from his pocket and poured into the water in the pitcher about an ounce of fluid slightly tinged with green. This I stirred into the water with a stick, and then I poured the contents of the pitcher into the tank of the car, which had been under my eye all the time the pitcher was being filled.

"I then tested the fluid from the petcock at the bottom of the tank and at the carburetor and found the fluid exactly the same as that previously poured from the pitcher. A couple of turns at the starting crank and the engine started, racing fiercely with an open throttle. It ran even and true and never missed an explosion. I then got into the car and drove it all around the village of Farmdale, and the vibrations of the engine were always vigorous and the explosions always even.

Mr. Haskell said he later had a talk with the inventor, who expressed the fear that he would have to dispose of his discovery for a small price, owing to the fact that the water and chemical compound was susceptible of simple analysis, and that although he might patent the formula, anybody could obtain it from the patent office for very little money.

"He told me he introduced the chemical that gave the bitter almond odor merely to disguise another odor that might reveal the identity of the more important ingredients," said Mr. Haskell. "He said the ingredients were so cheap and common no one could possibly make a car of them."

Mr. Haskell said he was frankly astonished by the demonstration and felt that he had been a personal witness of the "beginning of an industrial revolution."

"If any one else had tried to convince me of what I had witnessed myself, I would not have believed him," was the closing comment—New York Times.

Commercial League Saturday Games. Armour's against Union Pacific Passenger Department, Armour Park, at 2:30 p. m.

TRAIN OF CADILLACS WILL SOON REACH OMAHA. General Agent Miller of the Northwestern Railway Co. at Omaha, Ill., said today that the train of twenty-five Cadillacs, which are to be used for the purpose of demonstrating the power of the automobile, will reach Omaha on Monday.

SECOND UNIT OF MILWAUKEE COAST LINE ELECTRIFIED. The second unit of the Milwaukee Coast Line, which was inaugurated last week, has been electrified, and the line is now being operated as a unit.

MANY OMAHA PEOPLE TO METHODIST CONFERENCE. The annual conference of the Methodist church of the Central States is to be held in St. Louis, Mo., May 1, 2 and 3.

MULLEN STARTS YANKEES ON PENNANT CHASE.

Charles Peters, crack wrestler of this section of the country, has accepted the offer to wrestle at the Union Stock yards, for twenty-four hours ending at 2 o'clock yesterday.

CHARLES MULLEN.

Charlie Peters and Demetral to Meet Here May 1. Demetral said that Peters had promised him a match some time ago but plans were cancelled when Peters was stricken with the grip. Then Demetral and Demetral demanded a match with Peters before the latter met Joe Stecher.

Clear Weather Rules All Over the State. According to yesterday reports to the railroad, the rain has ceased and fair weather has returned to Nebraska. Thursday night the temperatures over the state ranged from 22 to 48 degrees above zero. Everywhere there was a brisk wind, which, it is asserted, precluded the possibility of a damaging frost.

Material Arrives for New U. P. Bridge. Material for the reconstruction of the Union Pacific bridge over the Missouri river between Omaha and Council Bluffs continues to arrive. The steel will start coming early in June. Men are now at work on the east end of the bridge, putting in the false work.

Man Who Gave "Cigar Advice" Had Better Steer Clear of Dan

Dan Butler is looking for the man who told him the best way to keep cigars fresh was to place an apple in the humidifier. He followed this advice last Christmas time, to his great sorrow. This week he opened several cans of Christmas cigars and discovered that they were covered with mold. The milkman and the ice man are "amoking up."

POOL HALL MAN SERVED WITH FEDERAL WARRANT. John M. Hotalo, who operates a pool hall in Florence, was served with a warrant for failure to pay the special government tax on pool halls. A fine of \$50 and six months in jail are the penalties of failure to pay that tax.

JUDGE LESLIE CLOSES THE SUBURBAN HOTEL. After almost half the population of Irvington Neb. had testified against George Brenner and his "suburban hotel" at that place, District Judge Leslie last Thursday afternoon issued a permanent injunction closing it.

AMUSEMENTS.
