

WILL CLEAR CHECKS WITHOUT CHARGE

Federal Reserve Board Announces New Plan of Handling Collections After June 15.

COST IS TO BE PAID BY BANKS

WASHINGTON, April 29.—The Federal Reserve board announced today that it would put into effect June 15 its new plan for country-wide clearing and collection.

A circular announcing its decision was mailed today by the board to 7,600 member banks.

The federal reserve banks will accept at par all checks from members whether drawn against other member banks, non-member banks or private banks.

The actual cost without profit of the clearing and collection of checks will be paid by the federal reserve bank and assessed against the member banks in proportion to their sendings.

The whole plan is based on generally-accepted principles under which clearing and collection plans have long been operated.

A federal reserve bank will not debit a member bank's reserve account with items forwarded for collection until remittance of the member bank in payment of such items shall have been received.

The list of casualties includes many have been picked off by Sinn Fein snipers for no other reason than that they were believed to be loyal.

The cordons of troops is being drawn gradually, but surely, around the rebel strongholds. The authorities are making every effort to avoid unnecessary bloodshed and damage.

Members of the Sinn Fein requisitioned all motor cars entering the city and used them for transporting rifles and ammunition to concentration points.

At the law courts they indulged in an orgy of destruction. They sacrificed many valuable books from the reference library and tore up quantities of documents.

"I am able to state that Lady Wimperston (wife of the lord lieutenant of Ireland) and Sir Robert and Lady Anderson, about whom there was much anxiety earlier in the week are safe. All visitors to Ireland are being questioned closely and no one is allowed to enter or leave Dublin without a permit.

AMERICAN COLD STORAGE BEEF POPULAR IN FRANCE

PARIS, April 28.—"Frigid," the French mail American cold storage beef, has taken so well in France that its popularity has, for the time being at least, defeated the purpose of its importation—that is to say, the easing of retail prices of meat.

REPUBLICAN VOTE FAR AHEAD OF 1914

Twelve to Fifteen Thousand More Ballots Cast Than at Last Primary.

RESULT ON THE DELEGATES

(From a Staff Correspondent.)

LINCOLN, April 29.—(Special.)—The republican vote this year at the primary will probably show from 12,000 to 15,000 more than was cast at the last primary.

The bull moose party has become practically extinct in spite of the fact that at the 1914 primary 2,324 votes were cast by the new party.

The vote indicates that the democrats will poll about 10,000 more votes than they did at the last primary, their vote at that time being 87,297, a bigger vote than was cast by the party at any previous election.

Official returns from the Fourth district show that W. I. Farley of Aurora has outdistanced W. M. Colton of York for second place in the republican district delegate race by 156 votes and with Peter Jensen will represent the Fourth district at Chicago.

On members of the supreme court, with Keith and Douglas out and Lancaster in, Douglas and Lancaster to hear from, gives the democratic vote on president as 54,169.

TYPHOID AT FRONT CHECKED

Efficient Methods of Army Medical Corps Show Results in the War Zone.

DREAD TETANUS IS WIPED OUT

LONDON, April 28.—There is less typhoid at the front today than there is measles, according to Dr. Wilfred Grenfell, head of the Labrador Medical Missions, who has been for three months with the Harvard surgical unit, and who is now returning to his work in Labrador.

Looks at typhoid, he remarked. Heretofore while armies have been decimated by it. When the English took over the trenches west of Ypres, where typhoid was endemic in the villages, the Allies had already 6,000 cases of this disease.

The sanitary service of all towns and villages near the line has been taken over by the army medical corps. Sewers and drains have been put in order, garbage and filth disposed of at the least possible cost.

Water Thoroughly Tested. Water supplies are all the time being tested and retasted by the ambulance laboratories. One sees everywhere the trail of their work in labels hanging to melancholy looking taps, such as, "This water is not to be used until chlorinated."

Tetanus, a most terrible and fatal danger of mud associated with wounds, is being met with inoculation so soon after the event that it has become an almost negligible factor in war mortality.

Trench feet at first distressed thousands of our soldiers. Today it is no longer a problem. A batch of such cases is now sent down by the medical officer in the trench with an apology and an explanation, as if it were a misdemeanor.

One sees criticism on the one hand that operations are entrusted to incompetent hands, and on the other that extravagant salaries are paid for illustrious names. Neither of these statements has any truth in it.

To us, the team work of these hospital units, each with its expert in various lines, the pathologist, the X-ray men, the diagnosticians, the therapists, the operating surgeons, and the commanding executive medical officers, suggest an ideal model for the future in civil life.
