Mr. Mohler, had he asked to be retired under the pension system as es-tablished, would be entitled to 1 per cent of his average salary for each year of his service, and being with the road less than ten years, this would be only 10 per cent of a sal-\$36,000 which he is now drawing. To deal with him more liberally, however, he is to be kept in an advisory capacity with a compensation of

Expect Other Developments.

The gossippers will have it that, while ill-health is the impelling reason for the Mohler resignation, the impending reorganization goes back to the advent of Averill Harriman here and his installation of so-called efficiency methods. Young Mr. Harriman has been business all through, in total discrete of the sound of machine of making the sound of the sound in total disregard of tradition or personal friendship or local considera-tions. He has been stirring things up in the purchasing department and it is expected that there will be something doing there. The engineer-ing department is still another supposed to have attracted his attention and which may also look for something to happen before very long if not right away.

Circulating under cover are stories of certain contracts that have been questioned from the New York end and for which the explanations offered have not been accepted as satisfactory. On the other hand, the passenger, freight and legal departments are all said to be "in the clear."
