CARRANZA NOTE IS

Message is Considered the Most Insulting Document Ever Received by the United States.

TROOPS STAY WHERE THEY ARE

Washington, June 2 .- General Carranza's note demanding withdrawal (From a Statt Correspondent) tanza's note demanding withdrawal Lincoln, June 2,—(Special.)—Farm- of American troops from Mexico has tion of President Wilson to maintain demonstrated. It was/stated authoritatively today that General Pershing's force would remain where it is until that time arrived.

A reply will be made to General Carranza, but the form it will take had not been determined tonight. President Wilson read the hasty translation of the long communication last night. A corrected text is be-ing prepared by the State department for his information.

Note Very Offensive. While official comment is withheld it is understood that the tone of the document is regarded as decidedly ofit, such as the thinly veiled accusation that the president is playing domestic politics in retaining the troops in rexico, may draw a sharp rebuke. It is doubtful, according to authorities on the international correspondence of the United States if the government has received a communication couched in as offensive terms and containing as many apparent violations of the ordinary uses of diplo-matic courtesy as this 12,000-word arraignment of its good fairn and hon-

esty of purpose.

President Wilson himself will decide what course shall be pursued. So far as could be learned tonight, no conferences or preliminary inquiries have yet been initiated to determine the nature of the reply.

Not Even Considered.

Apparently none is necessary as far as the withdrawal of the troops s concerned. There are no indications that possibility, is even being considered

tion exercises tomorrow at the Naval no cabinet meeting tomorrow. This in itself, will delay any early reply to Carranza and it is generally be-lieved that no answer will be framed for a week or ten days.

No New Orders.

No new orders went to General Funsion beyond a request by officials of the general staff for detailed in-formation as to disposition of Carranza troops. In view of the note' open threat of an attack on General Pershing's column, it was thought wise to give attention to the military problem, although no doubt is felt as to the complete security of the American force under any circumstances.
