

# Chemists Say That No Natural Waters Are Absolutely Pure

"We cannot tell by analysis with certainty that a water is or is not actually infected with disease germs. I do not mean that it is absolutely impossible to say that a water contains, for instance, germs of typhoid fever, for typhoid germs may be and have been isolated from water samples, but our tests are not so reliable that if we obtain a negative result we could say that the water was not infected."

Every glass of Schlitz in Brown Bottles means safety from germs in drinking water.

## Drink Schlitz in Brown Bottles

Its carbonic acid gas hinders the development of bacteria that may already have lodged in your system.

Schlitz is the only beer sold nationwide of whose purity you can be absolutely sure. The Brown Bottle keeps it pure.
