M. P. Starts Work Repairing Viaduct Damaged by Fire

The Missouri Pacific has a large force of men at work repairing and reconstructing that portion of the Locust street viaduct recently destroyed by fire. The work is to be pushed with the intention of having the structure ready for traffic not later than July 1.

In the rebuilding of the Locust street viaduct about 600 feet of the east end of the structure will have to be supplied with steel, the former set having been badly warped by the heat. Temporarily this will be left in place and taken out later. In the meantime, the floor will be replanked and leveled up and put in condition for use
